GREAT BASIN NATURALIST MEMOIRS

A Catalog of Scolytidae and Platypodidae (Coleoptera), Part 2: Taxonomic Index

No. 13 Brigham Young University, Provo, Utah 1992

Stephen L. Wood[1] and Donald E. Bright, Jr.[2]

ABSTRACT.—Cataloged in two volumes is the world fauna of Scolytidae (including two subfamilies, 25 tribes, 225 genera, and about 5,812 species) and of Platypodidae (including three subfamilies, seven tribes, 32 genera, and 1,463 species). The higher categories are listed phylogenetically, together with pertinent bibliographic citations of literature listed in a previously published bibliography. Within each genus the species are listed alphabetically together with: (1) a citation of the original description (and original genus, if different from the present genus), (2) the kind of type and its sex, if known, (3) type locality (with lectotype designation, if applicable), (4) type repository, (5) a representation of published figures, (6) geographical distribution, (7) host distribution, (8) three categories of notes, and (9) citations of references to all published literature from 1758 to 1991. Reference citations for each species are divided into eight subject areas, with authors listed alphabetically (including year and page citations) within each of the subject areas. Synonyms for genera and for species-group names are listed by chronological priority below the valid name for the taxon together with type validation data, notes, and references. Infrasubspecific names are cited under notes of the valid taxon. An appendix to the catalog includes: (a) a world host-list, with the beetle species reported to attack each plant species listed, and (b) a supplement to the previously published bibliography (Wood & Bright 1987) that updates the original to the end of 1989. An index lists all nominate taxa and their associated nomen nudums. This is the first serious attempt to catalog the world fauna of Scolytidae since 1910 and Platypodidae since 1914.

The following pages contain the first serious attempt to list and catalog the world fauna of Scolytidae since Hagedorn (1910d) and of Platypodidae since Strohmeyer (1914b, 1914c). Also included is a supplement to the bibliography that was Part 1 of this catalog, that updates the literature citations to the end of 1989. Citations of taxonomic and biogeographic articles are included to 1991.

Items of special interest and concern to us that have arisen during preparation of this volume include the following: (a) The quantity of known biological information was a surprise. It was expected that at least 20 percent of all nominate species would be cited only once by the original description and that an additional 20 percent would be cited fewer than five times. A superficial review suggests that species cited only once constitute less than 5 percent of the total, and those cited fewer than five times only slightly more than an additional 5 percent. (b) The rate at which species are being transported through commerce to establish breeding populations in extra-territorial areas of the earth should be a matter for worldwide alarm. Following a century when scarcely one species per decade reached the USA, at least six species were established there between 1985 and 1989; four additional species were reported in 1990 and three more in 1991. The economic impact of these introduced species is already being felt and will increase. The fact that three of these 13 reproduce by the normal bisexual method suggests that a significant gap in plant inspection procedures at

[2] Biosystematics Research Centre, Canada Department of Agriculture, Ottawa, Ontario, Canada K1A 0C6.

ports of entry exists and should be a matter for great concern to agriculture and forestry. More extensive and more thorough surveys designed to detect introduced species, especially in the vicinity of major ports of entry, are urgently needed. Similar patterns of spread through commerce are a worldwide concern for all nations; none are exempt. (c) Closely related to the preceding factor is the need for more thorough training and additional research opportunities for developing insect taxonomists. We are not aware of any serious young taxonomic specialists in Scolytidae or Platypodidae either in graduate school or in professional service anywhere in the world. The identification of these insects is often unusually difficult and professional competence requires 10 to 20 years of experience in this field. Amateur and half-trained specialists frequently make gross errors in judgment, as attested by the number and distribution of synonyms listed in this volume. These errors are frequently costly at a level that is frightening to anyone who studies the consequences of them. Immediate attention to this problem is needed for all insect groups having enormous economic concern, such as the Scolytidae. All species of Scolytidae are internal plant parasites and, consequently, are potential vectors of plant disease or are of concern due to direct attack on plant hosts.

Schedl Factor in Scolytidae Research

This catalog would not be complete, or even understandable, without at least a brief comment on the procedures and activities of Karl Eduard Schedl (1898-1979). Schedl was a major factor in the study of Scolytidae and Platypodidae for more than 50 years. He became interested in Scolytidae at the age of 17 when he observed the frass produced by an *Ips* species that was attacking a broken pine that fell across the World War I military trench in which he was concealed. Following the war, he received training in forest ecology and soon thereafter became interested in systematics. He published 342 articles on bark beetle taxonomy and is the author of more than 2,000 nominate species. Although he occasionally used the word "evolution," or other terms adopted from the New Systematics, his concept of the species was entirely morphological in the pre-1940 sense. His use of the subspecies designation was not that of a geographical race, but of any minute morphological deviation from his "type" (usually they were no more than aberrations). He told SLW that he did not accept the International Code on Zoological Nomenclature as binding for him; for this reason, he formulated his own code of nomenclature which was not written or discussed with colleagues.

Schedl had the habit of placing a manuscript name on a specimen he could not identify. These names often then remained in his collection for decades and were cited repeatedly in the literature by himself or others before they were formally described or associated with a previously named species. Another confusing habit, both to himself and to colleagues, was his recognition of a "male holotype" and a "female holotype" for each species. This habit led, on numerous occasions, to the double description of species (and creation of homonymous synonyms). Fortunately, he published a list of the Platypodidae type material in his collection (Schedl 1978a) and, later, a similar volume for Scolytidae (Schedl 1979c). These catalogs are only partly complete, but list the "holotypes," lectotypes, and neotypes in his collection. Many of these designations are invalid and, consequently, should be used with caution. Many of the species he had previously named from syntypic series were incorrectly given a "holotype," most of the lectotypes are listed with no indication of their geographical origin or of other data associated with the selection, and, in our opinion, none of the neotypes meet the requirements of the Code.

Another item requiring an explanation, in order for the reader to understand this catalog, is how a significant portion of the Eggers Collection came into the possession of Schedl. Near the end of World War II, Hans Eggers, the acknowledged world authority on Scolytidae at that time, contacted W. H. Anderson, curator of Scolytidae and Platypodidae at the Smithsonian Institution, and offered to sell his collection to them for $4,000. The Smithsonian accepted the offer and paid the full amount to Eggers in advance. Eggers began to pack and ship the collection to Washington, but he died when less than one-third of it had been sent. Because of the military occupation of Germany and travel difficulties in Europe at the close of the war, a European entomologist was engaged to complete the packing and shipping of the collection. That entomologist was Karl E. Schedl (Anderson,

W. H. & Anderson 1971:1-2). Only a fragment of that portion of the Eggers Collection placed in the care of Schedl arrived in Washington, while a substantial portion of both type and non-type material appeared in the collection of Schedl.

Schedl (1979c:2) published an account of how this significant portion of the Eggers Collection came into his hands. He told this same, but much more detailed, account to SLW in September 1965 at Lienz. However sincere this Schedl account might have been, it is contradicted by an account given by Mrs. Viktor Butovitsch (daughter of Hans and Elsa Eggers) on separate occasions to L. G. E. Kalshoven and F. G. Browne and reported to SLW. In her account, Schedl simply took what he wanted for his own use. The documentable facts bearing on this transaction are: (1) At the time of her husband's death, Elsa Eggers was senile to the point that "she did not even know her own name." After Hans died, their daughter was her legal guardian and conducted all of her personal business, none of which involved the collection or Schedl. (2) In 1952 and again in 1961, W. H. Anderson and S. L. Wood together examined and reviewed a large number (more than 20) of Smithsonian Institution (USNM) loan forms that were typewritten, single-spaced, and signed by Karl E. Schedl acknowledging receipt of several hundred primary and secondary types taken on loan from the Eggers Collection while Schedl prepared it for shipment. These loan forms had been imposed upon Schedl by the U.S. military attache who supervised Schedl's packing and sorting of the collection. Schedl apparently did not know those forms were sent directly to the Smithsonian Institution. According to W. H. Anderson, and D. M. Anderson (his successor), and confirmed by our own independent observations, none of that material was ever returned to Washington. In our catalog, problems related to conflicting statements on repositories are cited repeatedly. Similar problems with unreturned loans from the Forest Research Institute, Dehra Dun, from CSIRO, Canberra, and from other institutions are cited throughout the catalog.

In order for the user of this catalog to understand how a dozen Eichhoff types came into the possession of Schedl, the following is given. As told by Schedl to SLW in September 1965, near the close of World War II, Schedl was a major in the German army and had some responsibility for the management of forested areas in the Nazi (German) occupied countries of Europe. Schedl was in Poland when the eastern front collapsed, and before he fled he stopped at the Stettin Museum where the Dohrn Collection was housed (that collection included a dozen or more of Eichhoff types). When Schedl reached the museum, it had been abandoned except for the curator of Coleoptera who was just leaving. According to Schedl, when he asked the curator about the Eichhoff types, the curator told him to take them and flee for his life. Except for these specimens, the material in the Stettin Museum was destroyed by the war.

Materials and Methods

As mentioned in the Introduction to Part 1 of this catalog (Wood & Bright 1987), the catalog had its beginnings in 1946 when SLW began taxonomic and author card files in conjunction with a systematic search of literature treating Scolytidae and Platypodidae worldwide. These card files were continued until about 1980, but are reasonably complete only to 1970. These files are supplemented by a pinned collection of more than 100,000 specimens of Scolytidae and 3,000 of Platypodidae and a large collection of duplicate material preserved in ethanol. Of this material, most, including more than 2,000 biological species, were collected by himself from North and South America, Asia, Australia, Europe, Japan, New Guinea, and Sri Lanka. In addition, from 1960 to 1990, SLW exchanged identified specimens with several major museums and with Browne, Krivolutskaya, Kurenzov, Murayama, Schedl, etc. He has provided an identification service to professional colleagues in exchange for a portion of the specimens submitted by them for identification from 1945 until the present time. In order to authenticate the identification of species, he has taken examples for direct comparison to primary types to: AMNH (New York), CAS (San Francisco), MCZ (Cambridge), USNM (Washington), CNCI (Ottawa) in North America; BMNH (London), IZL (Leningrad), IZM (Moscow), MZU (Helsinki), MNHN (Paris), NHMW (Wien), Schedl Collection (Lienz) in Europe; FRI (Dehra Dun), Nobuchi Collection (Ibaraki) in Asia. Numerous primary and secondary types have been examined through brief loans from numerous other museums and private sources. He has examined authentic specimens

of about two-thirds of the nominate species listed below.

DEB became acquainted with cataloging procedures during 1961-1963 while he was a graduate student working with SLW. This interest intensified during the 1970s, and in 1981, the authors united their efforts to compile this catalog. DEB has collected extensively in Canada, USA, and Mexico in North America and in Borneo. He has been a research scientist at the Canadian National Collection of Insects, Arachnids, and Nematodes (CNCI, Ottawa) since 1966. He has visited the following museums for the purpose of studying type material for this project and related research: CAS (San Francisco), FMNH (Chicago), MCZ (Cambridge), USNM (Washington), Wood Collection in North America; BMNH (London), MNHN (Paris), NHMW (Wien) in Europe. Numerous additional primary types have been examined through brief loans from other museums and private sources. An identification service, similar to that outlined above, has been provided since 1966.

In order for the user to understand and deal effectively with errors that may be found in the catalog, an understanding of the procedures followed in compiling it is essential. Basic information on each taxon included in the catalog was organized on data sheets of two kinds: (1) genus-group category sheets, and (2) species-group category sheets. On these sheets, the name, author(s), type data, type repository data, original genus, subsequent genus, source of original description, valid name of taxon, notes, geographical distribution, and hosts were listed on one side of the sheet. On the reverse or back side of each sheet, citations were written by hand under each of the eight categories cited in the introduction of Part 1 of this catalog (Wood & Bright 1987:3-16). SLW was responsible for the review of literature published from 1758 to 1959; he and his staff worked at the M. L. Bean Life Science Museum, Brigham Young University, Provo, Utah, USA. DEB was responsible for the review of literature from 1960 to 1989; he and his staff worked at the Canadian National Collection of Insects, Arachnids, and Nematodes, Canada Department of Agriculture, Ottawa, Ontario, Canada.

In the review of literature available to us (Wood & Bright 1987, references not marked by an [*] asterisk), each of us (SLW and DEB) extracted names to be indexed and wrote the beetle names, author, year of publication (including subletters), and page numbers on slips of paper. These data were then copied by technical staff on the back side of the data sheets cited above in the appropriate subject areas on those sheets. Many of the references marked with an asterisk (*) in the 1987 volume have since been found and the data have been indexed.

The senior author entered: (Item A) the basic taxonomic and distributional data from the data sheets into an IBM/PS Model 30 computer that had been networked with other museum computers to expand capacity. Each nominate taxon was then assigned a code number based on (a) three digits to identify the genus name, (b) three digits to identify the valid species name, and (c) two digits to identify the subspecies or synonym names. A word processor specialist then entered by computer number (Item B) all citations of each taxon in the appropriate subject areas for literature published from 1758 to 1959. The same procedure was followed at Ottawa for entering on a similar computer (Item C) all citations from 1960 to 1989. Copies of data diskettes, along with a hard copy of their contents, were then sent from Ottawa to Provo. The word processor specialist then combined in the computer Items B and C, alphabetized and edited the citations, then transferred the combined Items B and C to Item A to produce a rough draft of the full text of the catalog. On a few occasions, an error was made in entering the proper code number. We hope we have found and corrected all such errors, but the user should be alerted to the fact that all may not have been found.

At this point, the senior author then reviewed his taxonomic card files that were a composite of his entries from original literature that had been supplemented by entries from similar files microfilmed for him by the Smithsonian Institution and representing 50 years of independent research at Washington. Entries in the rough draft data base were then checked and supplemented by the card file entries, thus significantly expanding and verifying entries in the rough draft. Hard copies of the corrected manuscipt were then prepared and given to each author for detailed review and were checked item by item with the original data sheets. The final draft was prepared following entry of these corrections.

In the review of original articles, names were often cited on only one page even though the

name of that taxon may have appeared many times within that article. We note also that, in using the supplementary card file, indexers who prepared those files may have cited (a) only page one of the article, or (b) the entire article (e.g., pages 1-40) as applying to this taxon, when in reality the name is cited only once on page 34. Even though this may be misleading, it enabled us to cite definite references to numerous articles we could not examine (those marked by an [*] asterisk in the bibliography).

The assignment of articles to eight subject areas, while a good idea, was not as practical as one might have supposed. Many published articles were clearly assignable to one or more definite subject areas; others were not. We sometimes disagreed on the proper assignment, and even found ourselves assigning a given article to one subject area on one day and to a different subject area the next. One should pay attention to all eight subject areas when reviewing literature for a more restricted subject.

We fully realize that cataloging is an on-going process to which many contribute. The articles we have found and reviewed, for the most part, represent only those segments of literature in which key words attracted reviewers' attention. There is a large quantity of literature hidden in the archives of ecology, forestry, systematics, etc., which has not yet come to the attention of catalogers, that will be very useful. Perhaps this catalog will stimulate others to contribute additional information from such hidden sources.

PROCEDURES

Species contained in this catalog are organized under two families: Scolytidae and Platypodidae. All species assigned to these families from 1758 to 1991 and their synonyms known to us are included. Within each family, the subfamilies, tribes, and genera are organized phylogenetically as presented in Wood (1986a) for Scolytidae. Because there is no modern classification of Platypodidae available, this family is organized on a tentative phylogenetic arrangement that is based on a combination of Strohmeyer (1914b, 1914c), Schedl (1939p), and tentative concepts of SLW. The references listed under family, subfamily, and tribe headings are not intended to be exhaustive, but include only those works thought to be significant in the development of classification of the group. Citations of references listed under each species are as complete as our resources permitted. As indicated above, the cutoff date is 1989 for all subject areas except for taxonomic and geographical data.

The species within each genus that are recognized here as valid are listed in bold type in alphabetical order with their authors. The author name is followed in regular type by: (a) the year and page in which the name was first validated in nomenclature (this date is the one given in Part 1 of the bibliography of this catalog [Wood & Bright 1987] regardless of other considerations, and, in some instances, is known to be technically incorrect; most discrepancies are noted). When the species was originally named in a genus other than the one to which it is now assigned, that original genus is given in parentheses following the page number and before the period [.]. (b) The period is followed by an indication of the kind of primary type on which the taxon is based (holotype, lectotype, neotype, syntype) and the sex of the type, if known. The type information is concluded by a semicolon [;]. (c) The semicolon is followed by the type locality, as given in the original publication. When a discrepancy between the published type locality and that given on the labels of the type is known, the change is noted. Several authors, notably Schedl, listed all localities from which both primary and secondary types came; when this situation was found, we listed all localities. The type locality information is concluded with a semicolon [;]. (d) The semicolon is followed by a designation of the type repository as published with the original description. When the designated repository is different from the present location of the type, the change is noted. For example, several hundred of the Eggers types that belong to the Smithsonian Institution are presently in NHMW, Wien (see above remarks under "Schedl Factor . . ."). The names of most repositories are reduced to initials of the repository, and these initials are followed by the name of the city (or for Madagascar, by the name of the island). The full names of the repositories are given at the end of this Introduction. The full names of infrequently cited repositories are given in full. Personal collections are cited by the name of the owner, followed by the city name, if known. (e) When lectotypes have been designated, the name, year, and page of lectotype designation are given following a comma after the repository name and city.

Indented below each valid species name, the

following may appear: (a) figures: the citation of figures is given only when a figure of suitable quality is available. Poor quality figures and multiple citations were avoided. (b) Geographical distribution is given alphabetically with the countries of a particular continent clustered but separated from one another by a slash [/]. Subdivisions within a country are separated by commas. A few departures from normal geographical designations are incorporated in this section: (1) the Bahama Islands and Trinidad Island are treated as islands of the Antilles Islands, not as part of their adjacent continents; (2) Sakhalin Island (USSR), the Japanese Islands, Taiwan, and Hong Kong are all treated as part of Asia; (3) the Andaman Islands and Nicobar Islands are treated as part of India; (4) Malaya refers only to the continental peninsula and includes Singapore, it is not synonymous with Malaysia; (5) in order to conserve space for the frequently cited Malayan Archipelago, the inaccurate designation "Indonesia" was employed to include most of Indonesia, but excluded all of New Guinea, and included insular Malaysia; and (6) African islands were listed separately but clustered with African countries, except Madagascar which is treated as a separate land mass. (c) Hosts are listed alphabetically by the scientific names used by the authors of the articles cited. In most instances, we did not modernize the nomenclature or correct errors in spelling of hosts unless we were thoroughly familiar with the names. (d) Notes fall into three categories that are designated by numbers: category (1) notes include information that impacts nomenclature; category (2) notes pertain to synonymy; and category (3) notes convey significant messages from the authors of the present catalog to the reader and cite redescriptions, nomen nudums, and other information of importance.

Subspecies are geographical races that form distinctive populations that may intergrade with other subspecies. Because bark and ambrosia beetles are essentially internal plant parasites that are subjected while within their host to very limited environmental stresses, geographical races are uncommon in these families. Subspecies are recognized here only when sufficiently thorough studies have been made to convince the authors that recognizable geographical races exist. Almost all of Schedl's subspecies, and those of most other authors prior to 1960, are either aberrations that have no status in nomenclature or are cryptic (or sibling) species that are actually good species that lack obvious diagnostic characters. The names of subspecies recognized here have the subspecific and author names in bold type and are indented below the name of the species to which they belong. When subspecies are recognized, the names of synonyms of each subspecies are listed below the bold type name of the subspecies to which they belong.

Synonyms are indented below the valid names to which they belong; they are given in italics in chronological priority. The data on their types are listed as given for the valid species names to which we have added the original and other significant citations that establish synonymy.

Nomen nudums that have been cited in synonymy are listed in the index and in the category (3) Notes under the valid names. Nomen nudums of unknown species affinity were omitted from this catalog.

Under the side-heading "References," below each nominate taxon, the citations to published literature are presented. These are organized under the eight subject areas described in Wood & Bright (1987:16). These citations are organized alphabetically by author name(s). Author names are spelled as in Wood & Bright (1987) and exclude diacritic marks or spelling changes used to compensate for the removal of diacritic marks (except, Dobner =Doebner).

Eight genera, of which five are known only as fossils, are listed in the Incerta Cedis category. The types of two living genera in this category were from Africa and are now lost. Their placement must await additional information. The eighth genus was named so recently that we have not had time to locate the types.

ACKNOWLEDGMENTS

This segment of the catalog is an index to the work of others. We recognize and appreciate the efforts of the thousands of authors who have contributed toward the expansion of our knowledge of the Scolytidae and Platypodidae. We sincerely appreciate the help we have received from hundreds of librarians who have made special efforts to procure photocopies of needed articles for our use. We also thank the many curators of collections who assisted us as we examined type material at their museums, and those who arranged for loans that enabled us to resolve numerous taxonomic problems.

We are most appreciative to a dedicated staff who endured much or all of the seven years required by this project, for their help in this monotonous and boring task. The staff at Brigham Young University consisted of Rita Farias Espinel (1 year), Nadja Kummer (1 year), Imelda Lom (1 year), Pilar Pizarro Sweany (3 years) who aided in the extraction of citations; Carla Jolayne Rice (2 years) operated the computer; Dr. C. Selby Herrin (7 years) did all of the computer programming, consulting, maintenance, and management. The staff at Ottawa consisted of Jennifer Read (4 years) who aided with bibliography preparation, Robert E. Skidmore (2 years) was a general project assistant, Derrik Bell (1 year) was a computer entry specialist, Larry Spears (2 years) was the computer programmer and consultant.

The work at Brigham Young University was financed through major research awards received from the U. S. Department of Agriculture, Competitive Research Grants Program grant number 87-CRCR-1-2582, and through the National Science Foundation, Biological Research Resources Program award number 8711632. The work at Ottawa was financed by the Canada Department of Agriculture.

We thank our colleagues who kindly consented to prepare translations of this Introduction for the benefit of users.

INTRODUCTION

Les pages qui suivent représentent le premier essai sérieux d'un catalogage de la faune mondiale des Scolytidae depuis Hagedorn (1910d) et des Platypodidae depuis Strohmeyer (1914b, 1914c). Est également incorporé un supplément de mise à jour de la bibliographie (cf. 1ère partie de ce catalogue) jusqu'à la fin de 1989. Les notes de systématique et de biogéographie sont incluses jusqu'en 1991.

Les faits d'un interêt particulier qui sont apparus durant la préparation de ce volume son les suivants: (a) la quantité d'informations biologiques connues a été une surprise. Nous pensions qu'au moins 20% des espèces nominales ne seraient citées qu'une seule fois par la description originale, et qu'environ 20% des autres espèces seraient citées moins de 5 fois. Une estimation rapide montre que les espèces qui ne sont citées qu'une fois ne représentent que moins de 5% du total, et que celles citées moins de 5 fois representent un peu plus de 5%. (b) Le taux d'introduction des espèces par le biais des échanges commerciaux et qui s'établissent hors de leur zone d'origine doit être un sujet d'inquiétude au niveau mondial. Apres un siècle durant lequel à peine un espèce par décennie atteignait les Etats-Unis d'Amerique, au moins six espèces s'y son établies entre 1985 et 1989; quatre autres espèces ont été repertoriées en 1990, et encore trois autres en 1991. L'impact économique de ces espèces introduites se fait d'ores et déjà sentir et ne fera que s'accroître. Le fait que trois de ces treize espèces se reproduisent normalement suggère qu'il existe une lacune très significative dans les procédures phytosanitaires portuaires et ceci doit être un sujet de préoccupation pour l'agriculture et la sylviculture. Des procédures plus rigoureuses destinées a détecter d'éventuelles introductions, en particulier à proximité des terminaux protuaires, devraient être mises en place de manière urgente. Ce type de dissémination par les circuits commerciaux est un sujet de préoccupation pour toutes les Nations, aucune n'en est exempte. (c) En rapport étroit avec le facteur précédent, apparaît la nécessité impérieuse de développer la taxonomie des insectes et de former sérieusement des taxonomistes. A notre connaissance, il n'y a actuellement pas dans le monde de jeunes taxonomistes spécialisés dans l'étude des Scolytidae ou des Platypodidae, que ce soit dans les Universités, ou dans des organismes publics. L'identification de ces insectes est souvent d'une rare difficulté, et une compétence professionnelle dans ce domaine ne s'acquiert que sur une période de 10 à 20 ans. Les amateurs et les professionnels non spécialistes commettent souvent de grossiéres erreurs de jugement comme cela est attesté dans le présent volume par le nombre des synonymes. Ces erreurs sont souvent coûteuses par les conséquences qu'elles entraînent. Une attention immédiate à ces problèmes d'introduction est indispensable pour tous les groupes d'insectes d'importance économique comme les Scolytidae. Toutes les espèces de cette famille sont des parasites internes de plantes et sont de ce fait des vecteurs potentiels de maladies ou des déprédateurs directs des plantes-hôtes.

Le cas Schedl

Notre catalogue serait incomplet, ou même incompréhensible, sans au moins un bref commentaire sur le comportement et les activités de

Karl Eduard Schedl (1898-1979). Schedl fut un acteur important dans l'étude des Scolytidae et des Platypodidae pendant plus de cinquante ans. Il s'interessa aux Scolytidae vers l'age de 17 ans lorsqu'il observa le "frass" produit par une espèce d'*Ips* attaquant un pin cassé qui était tombé en travers d'une tranchée dans laquelle il se trouvait pendant la Première Guerre mondiale. Après cette guerre il suivit des cours d'entomologie forestière et s'intéressa rapidement à la systématique des Scolytidae. Il a publié 342 notes de taxonomie et est l'auteur de plus de 2 000 espèces nominales. Bien qu'utilisant parfois le mot "évolution" ou d'autres termes adoptés par la "Nouvelle Systématique," son concept personnel de l'espèce était entièrement morphologique, dans le sens pre-1940. L'utilisation qu'il fait de la sous-espèce ne concerne pas une "race" geographique, mais uniquement de très faibles variations morphologiques déviant du "type" (il ne s'agissait de rien d'autre que d'abérrations). Il raconta un jour à SLW qu'il considérait que les règles du Code international de nomenclature zoologique n'étainent pas un obligation pour lui. Pour cette raison il formula son propre code de nomenclature qui ne fut jamais écrit, et qui de ce fait ne put jamais être discuté.

Schedl avait pour habitude de placer un nom provisoire sous chaque individu qu'il ne pouvait identifier immédiatement. Quelquesuns de ces noms sont restés ainsi pendant des décennies, bien que lui et d'autres les aient cité de nombreuses fois dans la littérature, avant qu'ils ne soient formellement publiés ou rapportés à une espèce déjà connue. Une autre habitude déroutante qui lui était propre, ainsi qu'a d'autres collegues, était la désignation d'un holotype mâle et d'un holotype femelle pour chaque espèce. Cette habitude amena en de nombreuses occasions à une double description des espèces (et donc à la creation de synonymes qui sont aussi des homonymes). Fort heureusement il a publié une liste des matériaux typiques de Platypodidae de sa collection (Schedl 1978a), et un peu plus tard un volume similaire pour les Scolytidae (1979c). Ces catalogues son incomplets, mais recensent les "holotypes," lectotypes et neotypes de sa collection. Beaucoup de ces designations sont invalides et doivent en conséquence être utilisées avec prudence. Un grand nombre de ses "holotypes" proviennent de séries syntypiques, la plupart des lectotypes son désignés sans indication d'origine géographique ou d'éléments associés à ce choix. Enfin à notre avis, aucun des néotypes n'est conforme aux règles du Code.

Un dernier élément nécessitant une explication afin que les utilisateurs du catalogue comprennent bien le problème, es comment une partie de la Collection Eggers parvint en possession de Schedl. Vers la fin de la Seconde Guerre mondiale, Hans Eggers, le spécialiste mondial des Scolytidae à cette époque, contacta W. H. Anderson, Conservateur des Scolytidae et Platypodidae à la Smithsonian Institution et offrit de vendre sa collection pour 4 000 $. La Smithsonian accepta l'offre et paya la totalité de la somme immédiatement. Eggers commença le conditionnement et l'expédition de sa collection à Washington, mais décéda brutalement alors que seulement un tiers de la collection avait été expédiée. Du fait de l'occupation militaire en Allemagne et des difficultés de déplacement en Europe à la fin de la guerre, un entomologiste européen fut embauché pour terminer l'expedition. Cet entomologiste était Karl E. Schedl (Anderson, W. H. & Anderson 1971:1-2). Force est de constater que seulement une petite partie du reste de la collection Eggers confiée aux soins de Schedl arriva à Washington, alors qu'une partie substantielle du matériel typique et non-typique se retrouva dans la collection Schedl.

Schedl (1979c:2) a expliqué comment cette part significative de la collection Eggers est entrée en sa possession. Il répéta ceci, de manière beaucoup plus détaillée a SLW en septembre 1965 à Lienz. Cependant, pour sincère que soit le récit de Schedl il est en contradiction avec ce que racontra Mme Butovitsch (femme de Viktor Butovitsch et fille de Hans et Elsa Eggers) à diverses occasions à L. G. E. Kalshoven et F. G. Browne, propos qui furent rapportés à SLW. Dans cette version, Schedl aurait simplement conservé ce qui lui plaisait pour son usage personnel. Les faits avérés en rapport avec la transaction sont les suivants: (1) A la mort de son mari, Elsa Eggers était sénile au point "de ne pouvoir se souvenir de son propre nom." Apres la mort de Hans, leur fille devenue le "tuteur" legal s'occupait de toutes ses affaires, mais en aucun cas de ce qui concernait la collection de son père ou de Schedl. (2) En 1952, et de nouveau en 1961, W. H. Anderson et S. L. Wood en étudiant un grand nombre (plus de 20) feuilles de prêt de la Smithsonian, constatèrent qu'elles étaient

toutes tapées à la machine, à intervale simple, et signées par K. E. Schedl qui reconnaissait donc *de facto* avoir en communication plusieurs centaines de types primaires et secondaires pris dans la collection Eggers pendant qu'il préparait l'expédition du reste de cette collection. La rédaction de ces feuilles de prêt fut imposée à Schedl par l'Attache militaire U.S. qui supervisait le tri et la préparation de la collection. Il semble que Schedl ignorait que ces feuilles étaient envoyées immediatement à la Smithsonian à Washington. Selon W. H. Anderson et D. M. Anderson (son successeur), et confirmé par nos propres observations, aucun de ces matériaux ne fut jamais rendu à Washington. Dans notre catalogue, nous soulevons de nombreux cas d'incohérence sur le lieu de conservation de ces matériaux. D'autres problèmes de cette nature concernant des prêts du Research Institute, Dehra Dun; du CSIRO, Canberra; et d'autres instituts son cités tout au long du catalogue.

Enfin, pour que l'utilisateur de notre catalogue sache comment une douzaine de types de Eichhoff parvinrent en possession de Schedl, nous pouvons rapporter ce que Schedl lui-même raconta à SLW en Septembre 1965. Vers la fin de la guerre, Schedl était officier dans l'armée Allemand et occupait des fonctions de responsabilité dans la gestion des régions forestières des pays occupés par les troupes Allemand. Schedl était alors en Pologne quand le front Est s'écroula. Avant de s'enfuir il s'arrêta au Musée de Stettin où était conservée la collection Dohrn (qui contenait une douzaine ou plus de types de Eichhoff). Lorsque Schedl arriva au Musée, seul le conservateur de la section Coléoptères était encore présent, mais s'apprêtait à fuir. Selon les dires de Schedl, lorqu'il demanda à ce conservateur les types de Eichhoff, celuici lui dit de les prendre et de s'enfuir. Toutes les collections du Musée de Stettin furent completement detruites, sauf ces quelques spéciments.

Materiels et Methodes

Comme il est fait mention dans l'Introduction de la Partie 1 (Wood & Bright 1987), les prémices de ce catalogue remontent à 1946 lorsque SLW commença un fichier taxonomique et d'auteurs, en même temps qu'il entreprenait de manière systématique des recherches sur la littérature traitant des Scolytidae et des Platypodidae du monde. Ces fichiers furent continués jusqu'aux environs de 1980, mais ne sont, à cette date, vraiment complets que jusqu'en 1970. Ces fichiers son accompagnés d'une collection d'insectes piqués comprenant plus de 100 000 specimens de Scolytidae et 3 000 Platypodidae, ainsi qu'une importante collection de doubles conservés en alcool. La plupart de ce matériel, incluant en outre plus de 2 000 espèces biologiques, fut récolté par lui-même sur le continent américain, en Asie, en Australie, en Europe, au Japon, en Nouvelle-Guinée et au Sri Lanka. De plus, de 1960 à 1990, SLW a échangé des spécimens identifiés avec plusieurs Musées ainsi qu'avec Browne, Krivolutskaya, Kurenzov, Murayama, Schedl, etc. Il a fournit des identifications à ses collègues professionnels en échange d'une partie du matériel soumis de 1945 à aujourd'hui. Afin de s'assurer de l'identité des espèces, il a procédé a des comparaisons directes avec les types primaires des institutions suivantes: AMNH (New York), CAS (San Francisco), MCZ (Cambridge, Mass.), USNM (Washington), CNCI (Ottawa) en Amérique du Nord; BMNH (Londres), IZL (St. Peterbourg), IZM (Moscou), MZU (Helsinki), MNHN (Paris), NHMW (Vienne), la Collection Schedl (Lienz) en Europe; FRI (Dehra Dun), la Collection Nobuchi (Ibaraki) en Asie. De nombreux types primaires et secondaires ont été étudiés à l'occasion de prêts de nombreux autres Musées ou collections privées. Il a examiné les spécimens originaux d'environ deux tiers des espèces nominales citées ci-après.

DEB s'engagea dans ce projet en 1961-1963, lorsque étudiant, il travaillait avec SLW. Son intérêt s'est intensifié dans les années 1970, et en 1981 ils unirent leurs efforts pour competer et compiler ce catalogue. DEB a récolté de manière intensive au Canada, aux USA, au Mexique et a Bornéo. DEB est chercheur au Canadian National Collection of Insects, Arachnids and Nematodes (CNCI, Ottawa) depuis 1966. Dans le cadre de ses recherches et de la réalisation du présent project, il a effectué des missions d'etude des matériels typiques dans les Musées suivants: CAS (San Francisco), FMNH (Chicago), MCZ (Cambridge, Mass.), USNM (Washington), la Collection Wood pour l'Amérique du Nord; BMNH (Londres), MNHN (Paris), NHMW (Vienne) en Europe. De nombreux types primaires ont également été etudiés à l'occasion de prêts de nombreux

autres Musées ou collections privées. Un service d'identification, du même type que celui cité plus haut, a été mis en place depuis 1966.

De façon à ce que l'utilisateur comprenne et sache gérer les erreurs qui pourront être relevées dans le catalogue, il nous semble nécessaire de décrire les méthodes et procédures qui ont été utilisées pour son edification.

Les informations de base concernant chaque taxon ont été saisies sur des fiches de deux sortes: (1) fiches du groupe-genre, et (2) fiches du groupe-espèce. Sur ces fiches figurent le nom, le (les) auteur(s), les renseignements concernant le type, labels (etiquettes), lieu de dépôt, nom de genre original, nom de genre actuel, référence de la description originale, nom valide du taxon, notes diverses, distribution géographique ainsi que les plantes-hôtes. Au revers de ces fiches sont reportées à la main des références de rapportant aux huit rubriques citées dans l'Introduction de la Partie 1 de ce catalogue (Wood & Bright 1987:3-16). SLW est responsable pour ce qui concerne la littérature publiée de 1758 à 1959. Lui et son équipe ont travaillé au Monte L. Bean Life Science Museum, Brigham Young University, Provo, Utah, USA. DEB est responsable de la littérature des années 1960 à 1989. Lui et son équipe ont travaillé à la Canadian National Collection of Insects, Arachnids and Nematodes, Canada Department of Agriculture, Ottawa, Ontario, Canada.

Dans la littérature que nous avons pu consulter (Wood & Bright 1987), references sans asterisque [*], chacun de nous (SLW et DEB) a relevé les noms à indexer et a extrait le nom de l'insecte, l'auteur, l'année de publication (y compris l'indexation alphabétique) et les ont reporté sur des fiches. Ces renseignements furent ensuite recopiés par des collaborateurs de l'équipe au dos des fiches décrites précédemment, dans les différentes rubriques. Beaucoup des références marquées d'un astérisque [*] dans le volume de 1987 ont été consultées depuis et leur contenu a donc été indexé.

SLW a saisi: (rubrique A) les renseignements taxonomiques et biogéographiques de base sur un IBM/PS2 Model 60, relié par réseau à d'autres ordinateurs afin d'étendre ses capacités. A chaque taxon un numéro de code était attribue de la manière suivante: (a) trois chiffres pour identifier le nom du genre, (b) trois chiffres pour identifier le nom valide de l'espèce, et (c) deux chiffres pour identifier la sous-espèce ou les noms synonymes. Un spécialiste en traîtement de texte a saisi ensuite (rubrique B) toutes les citations pour chaque taxon dans les champs appropriés pour la littérature couvrant la période 1758-1959. La même procédure a été suivie à Ottawa pour la saisie sur un ordinateur similaire (rubrique C) de toutes les mentions entre 1960 et 1989. Des disquettes des informations ainsi que des copies-papiers étaient alors envoyées d'Ottawa à Provo. Le spécialiste en traîtement de texte réunissait alors les éléments B et C, procédait à leur classement, puis tranférait l'ensemble dans la rubrique A pour produire une copie brute du texte complet du catalogue. A quelques occasions il y eut des erreurs de saisie dans le code. Nous espérons avoir retrouvé et corrigé toutes ces erreurs, mais nous devons prévenir l'utilisateur qu'il peut en subsister encore quelques unes.

A ce moment, le premier auteur a repris toutes ses fiches qui étaient un composite de ses relevés dans la littérature originale complétées par des renseignements tirés de fiches similaires microfilmées provenant de la Smithsonian Institution et qui représentaient 50 années de travaux équivalents et indépendants à Washington. Les saisies du texte brut étaient alors vérifiées et complétées avec ces fiches, ce qui accroissait significativement leur volume et permettait de comparer les saisies du text brut. Des copies-papier du manuscrit corrigé étaient fournies à chaque auteur pour vérification et comparées rubrique par rubrique avec les relevés originaux. Le text définitif était alors mis au point en tenant compte de ces corrections.

Dans la bibliographie originale, les noms des taxons étaient souvent cités par une seule page même si le nom du taxon apparaissait plusssieurs fois dans le cours de l'article. Nous avon également noté que, en utilisant les fiches complémentaires, les personnes qui avaient préparés ces fiches avaient pu: (a) seulement fait apparaître la première page de l'article, ou (b) la pagination compléte (e.g., pages 1-40) s'appliquant à ce taxon, alors que son nom n'était cité qu'une seule fois page 34. Bien que ceci puisse être déroutant, cette situation nous permet de donner des références complètes à de nombreuses publications que nous n'avons pu consulter nous-mêmes, celles précédées d'un astérique [*] dans la bibliographie.

L'attribution des articles dans nos 8 rubriques, bien que répresentant une bonne idée, ne fut pas aussi aisée que nous l'avions supposé.

Beaucoup des articles publiés pouvaient facilement être classés dans une ou deux rubriques, alors que d'autres ne l'étaient pas. Nous nous sommes souvent opposés sur l'attribution à donner, et nous sommes même trouvés dans la situation ou un jour l'attribution était faite dans une rubrique et dans une autre rubrique le lendemain. Nous vous recommandons la plus grande attention sur le choix dans les 8 rubriques si vous rechercher des sujets très précis.

Nous avons clairement réalisé que le catalogage était une opération à laquelle beaucoup de choses contribuent. La plupart des articles que nous avons trouvés et analysés, ne représentent qu'une partie de la littérature dans laquelle des mots-clés ont attiré l'attention des "reviewers." Il y a une énorme quantité de renseignements cachés dans les publications d'écologie, de sylviculture, de systématique, etc., qui n'a pas encore attiré l'attention, et qui seront de la plus grande utilité. Nous espérons que le présent catalogue pourra stimuler nos collègues qui nous ferons connaître des références utiles dans cette littérature "cachée."

Procedures

Les espèces mentionnées dans cet ouvrage sont rangées dans deux familles: Scolytidae et Platypodidae. Toutes les espèces assignées à ces familles entre 1758 et 1991, ainsi que les synonymes qui nous sont connus sont également incluses. Pour les Scolytidae, l'arrangement des sous-familles, tribus et genres suit la phylogénie de Wood (1986a). Du fait de l'absence de classification récente des Platypodidae, cette famille est présentée selon une hypothèse de phylogenie reposant sur une combinaison de Strohmeyer (1914b, 1914c), Schedl (1939p) et les hypothèses de SLW. Les références citées pour le groupe-famille, les sous-familles et tribus ne se prétendent pas exhaustives, mais ne comprennent que les références que nous penson significatives dans l'étude de la classification supérieure. Les références données pour chaque espèce son aussi complètes que possible. Comme déjà signalé précédemment, la date limite pour les références est 1989 por toutes les rubriques, et 1991 pour la systématique et la biogéographie.

Les espèces que nous reconnaissons valides dans chaque genre sont imprimées en charactères gras, par ordre alphabétique avec le nom de leur descripteur. Le nom du descripteur est suivi en charactères "bas-de-casse" par: (a) l'année de parution et la page à laquelle le nom fut validé pour la première fois dans la nomenclature (la date est celle donnée dans la Partie 1 [Wood & Bright 1987], sans autre considération, même si dans quelques cas nous la savons incorrecte; la plupart de ces divergences sont notées). Quand l'espèce fut originellement décrite dans un autre genre que celui auquel elle est maintenant rattachée, le genre original est donné entre parenthèses () après la pagination et avant le point [.]. (b) Ce point est suivi d'indications sur la catégorie de type sur lequel le taxon est fondé (holotype, lectotype, néotype, syntype), ainsi que le sexe de ce type s'il est connu. Ces informations sur le type son suivies d'un point-virgule [;]. (c) Ce point-virgule est suivi de la localité typique donnée dans la publication originale. Quand une divergence entre la localité-type publiée et celle portée par les étiquettes du specimen a été relevée, elle est signalée. Plusieurs auteurs, notament Schedl, faisaient figurer la totalité des localities des types primaires et secondaires. Dans une telle situation, nous avons également fait figurer l'ensemble de ces localitiés. Ces renseignements sont suivis d'un point-virgule [;]. Ce point-virgule est suivi d'une indication du lieu de conservation du type tel qu'il a été publié dans la description originale. Quand le lieu de conservation est différent de celui publié, la modification est signalée. Par exemple, plusieurs centaines de types d'Eggers appartenant à la Smithsonian Institution sont actuellement conservés a Vienne (NHMW) (voir ci-dessus les remarques dans le paragraphe "Le cas Schedl"). Les noms de la plupart des institutions où sont déposés les types sont réduits à leurs initiales qui sont suivies du nom de la ville (ou pour Madagascar par le nom de l'île). Les noms complets de ces institutions sont données à la fin de l'introduction. Les noms non abrégés figurent pour les institutions citées peu fréquemment. Les collections personnelles sont citées par le nom de leur propriétaire, suivi du nom de la ville si elle est connue. (c) Quand des lectotypes ont été designées, le nom, l'année et la page de designation sont données après la virgule suivant les renseignements sur le lieu de dépôt.

En retrait, sous chaque nom d'espèce valide, peuvent apparaître les renseignements suivant: (a) figures: la mention d'une figure est donnée seulement lorsque celle-ce est de qualité

suffisante. Les figures peu significatives et ses citations multiples sont évitées. (b) La distribution géographique est donnée alphabétiquement par pays pour chaque continent qui sont séparés les uns des autres par une barre penchée [/]. Les subdivisions par pays sont séparées par des virgules. Quelques exceptions existent: (1) les îles Bahamas et celles formant la Trinidad sont traitées comme des îles des Antilles et non comme des morceaux des pays voisins; (2) les Iles Shakalines (CEI), les îles de l'archipel nippon, Taiwan et Hong-Kong sont traîtées comme des portions de l'Asie; (3) Andaman et Nocobar son considérées comme des morceaux de l'Inde; (4) "Malaya" se rapporte uniquement a la partie continentale de la peninsule et comprende Singapoure. Ce terme n'est pas synonyme de "Malaysia;" (5) afin réduire l'espace utilisé par le terme fréquemment publié de "Malayan Archipelago," le terme impropre de "Indonesia" a été utilisé pour couvrir la plus grande partie de l'Indonésie, mais en excluant la totalité de la Nouvelle-Guinée, tout en conservant la "Malaysia" insulaire; (6) les îles africaines sont nommées séparément mais sont rattachées aux pays du continent, sauf Madagascar qui est traîté comme un bloc continental. (c) Les plantes-hôtes figurent par ordre alphabétique en suivant les noms scientifiques utilisés par les auteurs cités. Dans la plupart des cas, nous n'avons pas réactualisé la nomenclature botanique ou corrigé les fautes d'impression, sauf quand nous étions très au courant des corrections à apporter sur certain noms. (d) Les publications rentrent dans 3 catégories qui sont désignées par des chiffres: les publications de la Catégorie (1) contiennent des informations concernant la nomenclature; les publications de la Catégorie (2) concernent la synonymie; et les notes de la Catégorie (3) renferment des renseignements provenant des auteurs du présent catalogue et citent les redescriptions, les *nominae nudae* et d'autres informations de première importance.

Les sous-espèces constituent des races géographiques qui forment des populations distinctes mais qui peuvent chevaucher avec d'autres sous-espèces. Parce que les Scolytidae et les Platypodidae son essentiellement des parasites internes de plantes, ils sont peu suject (tant qu'ils sont dans leur hote) aux "stress" environnementaux, de ce fait, les races géographiques sont peu nombreuses dans ces deux familles. Nous n'avons reconnu ici des sous-espèces que lorsque des travaux suffisemment précis existent pour convaincre les auteurs de la réalité d'une race géographique. De fait, la quasi totalité des sous-espèces décrites par Schedl, et celles de la plupart des auteurs, décrites antérieurement à 1960, sont soit des abérrations qui ne possèdent aucun statut dans la nomenclature ou sont des espèces cryptiques (sibling-species) qui nécessitent une redéfinition de leurs caractères. Les noms des sous-espèces reconnues dans le présent ouvrage sont imprimés en caractères gras ainsi que le nom de leur auteur et sont en retrait par rapport au nom de l'espèce. Quand des sous-espèces sont reconnues, les noms des synonyms de chaque sous-espèce figurent sous le nom en caractère gras auquel elle doivent être rapportées.

Les synonymes son placés en retrait sous le nom valide auxquels ils doivent être rapportées; ils apparaissent en caractères italiques dans l'ordre chronologique de priorité. Les renseignements donnés sur les types de ces synonymes figurent sous la même forme que pour les espèces valides, nous y avon ajouté les citations originales ou significatives pour ce qui concerne la synonymie.

Les *nominae nudae* qui sont placés en synonymie figurent dans l'index et dans la catégorie Notes (3) sous leur nom valide. Les *nominae nudae* des espèces dont les affinités spécifiques sont inconnues ne figurent pas dans le catalogue.

Dans les références, sous chaque taxon nominal, figurent les citations publiées dans la littérature. Celles-si sont regroupées dans les 8 rubriques proposées dans Wood & Bright (1987:16). Ces mentions apparaissent par ordre alphabétique de nom(s) d'auteur(s). Les noms d'auteurs apparaissent comme dans Wood & Bright (1987) et ne tiennent pas compte des signes diacritiques ou des modifications d'orthographe relatives cette absence de signes diacritiques (sauf Dobner =Doebner).

Huit genres qui ne sont connus que comme fossiles figurent dans la categorie *Incertae Sedis*. Les types de deux genres afrotropicaux actuels, mais perdus, figurent dans cette rubrique, leur position systématique ne pouvant être précisée sans autres information les concernant. Le huitieme genre a été décrit si récemment que nous n'avons pu encore localiser les types.

REMERCIEMENTS

Nous sommes reconnaissants aux milliers d'entomologists qui ont contribué a l'accroissement de nos connaissances sur les Scolytidae et les Platypodidae. Nous avon très sincerèment apprécié l'aide particulière reçue de centaines de bibliothécaires qui nous ont procuré les photocopies d'articles qui nous étaient nécessaires. Nous remercions également les nombreux conservateurs qui ont apporté leur aide dans l'étude de materiaux typiques déposés dans leurs institutions, ainsi que ceux qui nous ont communiqué des matériaux permettant de résoudre de nombreux problèmes taxonomiques.

Nous sommes particulièrement reconnaissants à notre équipe durant les sept années qui furent nécessaires pour mener à bien ce travail, pour les taches répétitives et souvent lassantes qu'ils ont eu à effectuer. L'équipe à Brigham Young University était composée de Rita Farías Espinel (1 année), Nadja Kummer (1 année), Imelda Lom (1 année), Pilar Pizarro Sweany (3 années) qui nous ont aidé dans "l'extraction" des citations; Carla Jolayne Rice (2 années) pour son travail a l'ordinateur; le Dr. C. Selby Herrin qui eut pendant 7 ans la responsabilité de la préparation des programmes informatiques, la maintenance et l'organisation. L'équipe d' Ottawa comprenait Jennifer Read (4 années) qui s'occupa de la préparation de la bibliographie, Robert E. Skidmore (2 années), assistant principal du projet, Derrik Bell (1 année) spécialiste de la saisie informatique, Larry Spears (2 années), programmeur et consultant.

Le travail à Brigham Young University a été financé par les principaux fonds de recherche de l'U.S. Department of Agriculture, Competitive Research Grants Program (fonds 87-CRCR-1-2582) et par la National Science Foundation, Biological Research Resources Program (no. 8711632). Le travail à Ottawa a été financé par le Canada Department of Agriculture.

Nous remercions également nos collègues qui ont assuré les traductions de cette introduction.

Traduit et adapte par J. J. Menier, MNHN, Paris.

EINLEITUNG

Die folgenden Seiten enthalten den ersten ernsthaften Versuch seit Hagedorn (1910d) die Weltfauna der Scolytiden und seit Strohmeyer (1914b, 1914c) die der Platypodiden aufzulisten und zu katalogisieren. Auch ist eine Ergänzung zur Bibliographie beigefügt, die als Band 1 dieses Katalogs erschien, und die Literature bis Ende 1989 erfasst. Zitate der systematischen und biogeographischen Literatur sind bis einschliesslich 1991 angemerkt.

Während der Erstellung dieses Bandes ergab sich eine Reihe von Tatsachen besonderen Interesses, darunter: (a) Der Umfang der biologischen Information war eine Überraschung. Es war erwartet, dass mindestens 20 Prozent der beschriebenen Arten lediglich einman in Form der Originalbeschreibung zitiert wurden und das weitere 20 Prozent weniger als 5 mal zu finden seien. Ein erster Überblick lässt vermuten, dass veniger als 5 Prozent der Arten nur einman zitiert wurden und wenig mehr als weitere 5 Prozent der gesamten Zitate weniger als 5 Veröffentlichungen betrafen. (b) Alarmierend ist die Rate, mit der Arten durch den Handel ausserhalb ihres Verbreitungsgebietes verschleppt werden und sich dort vermehren. Nach einem Jahrhundert, in dem kaum eine Art pro Jahrzehnt die USA erreichte, wurden zwischen 1985 und 1989 mindest 6 Arten eingeschleppt; weitere vier 1990 und 1991 zusätzlich drei. Der wirtschaftliche Impakt der eingeschleppten Arten ist bereits fühlbar und wird zunehmen. Die Tatsche, dass sich drie dieser 13 Arten ganz normal bisexuell fortpflanzen, lässt auf fehlerhaften Verfahren bei der Einfuhrkontrolle schliessen und sollte Land- und Forstwirtschaft nachdenklich stimmen. Häufigere und gründlichere Kontrollverfahren für die Entdeckung eingeschleppter Schädlinge sind besonderes in der Nähe von Einfuhrhäften dringend notwendig. Die Verschleppung durch den Handel ist eine weltweite Sorge für alle Nationen, keine ausgenomen. (c) Verbunden mit dieser Sorge ist der Bedarf an besserer Ausbildung und zusatzlichen Forschungsmöglichkeiten für Systematiker in der Entomologie. Uns ist kein junger Specialist bekannt, der sich ernsthaft mit der Taxonomie der Scolytiden oder Platypodiden befasst sei es als Graduierter oder Berufstätiger irgendwo in der Welt. Die Bestimmung dieser Insekten is oft ungewöhnlich schwierig und professionelle Kompetenz bedarf einer 10 bis 20 jährigen Erfahrung. Amateure und inkompetente Fachkräfte machen grobe Fehler wie sich aus der Zahl und Verbreitung der in diesem Band aufgeführten

Synonyma ergibt. Dergleichen Fehler können so kostspielig sein, dass jedem schwindlig wird, der die Konsequenzen bedenkt. Dieses Problem bedarf der schnellen und erhöhten Aufmerksamkeit für alle Insektengruppen mit grosser wirtschaftlicher Bedeutung wie den Scolytiden. Alle Borkenkäferarten sind minierende Pflanzenschädlinge und folglich potentielle Vektoren von Pflanzenkrankheiten neben dem direkten Befall der Wirtspflanzen.

Schedl und die Borkenkafer-Forschung

Dieser Katalog wäre nicht vollständig oder verständlich ohne auf die Methoden und Arbeiten von Karl Eduard Schedl (1898-1979) einzugehen. Für mehr als 50 Jahre war Schedl ein "Hauptfaktor" im Studium der Scolytiden und der Platypodiden. Sein Interesse an Borkenkäfer begann mit 17 Jahren als er das Bohrmehl einer *Ips*-Art in einer Kiefer beobachtete, die im Ersten Weltkrieg über einen Schützengraben gefallen war, in dem er sich befand. Nach dem Krieg studierte er Forstwissenschaften und interessierte sich alsbald für die Systematik. Er veröffentlichte 342 Artikel über die Borkenkäfer-Taxonomie und beschrieb mehr als 2,000 Arten. Obgleich er gelegentlich den Begriff "Evolution" oder andere Termini der Neuen Systematik benutzte, so war sein Konzept vom Artbegriff ein ausschliesslich morphologisches der Vorkriegszeit. Seine Beschreibung von Unterarten beruhte nicht auf geographischen Rassen sondern auf minuziösen Abweichungen von seinem "Typ" (gewöhnlich waren dies lediglich Aberrationen). SLW erzählte er, dass er den "International Code on Zoological Nomenclature" nicht für sich verbindlich halte; er verfuhr deshalb nach eigenen Regeln, die weder aufgeschrieben noch mit Kollegen diskutiert wurden.

Schedl pflegte einem Insekt, das er nicht bestimmen konnte, einen Manuskriptnamen zu geben. Diese Namen blieben oft für Jahrzehnte in seinem Sammlungen bestehen und wurden von ihm oder anderen wiederholt zitiert bevor sie formal beschrieben oder einer früher beschriebenen Art zugeordnet wurden. Eine andere Gepflogenheit, die ihn selbst und andere verwirrte, war die Beschreibung eines "Mänchen-Holotyps" und eines "Weibchen-Holotyps" für jede Art. Dieses Verfahren führte vielfach zur Doppelbeschreibung einer Art (und homonymen Synonyma). Zum Glück veroffentlichte er eine List der Typenmaterials, das sich in seiner Sammlung befand, zunächst für die Platypodiden (Schedl 1978a), später für die Scolytiden (Schedl 1979c). Diese Kataloge sind nur teilweise vollständig führen aber "Holotypen," die Lectotypen und Neotypen in seiner Sammlung auf. Viele der Zuordnungen sind ungültig und sollten deshalb mit Vorsicht benutzt werden. Viele Arten, die er zuvor aus syntypischen Serien benannt hatte, erhielten unkorrekter Weise einen "Holotyp," die meisten Lectotypen werden ohne Hinweis auf die geographische Herkunft oder anderen Daten ihrer Auswahl aufgeführt und u.E. entspricht keiner der Neotypen den Anforderungen des "International Codes."

Um dem Leser den Katalog verständlich zu machen, wäre auch zu erläutern, wie ein bedeutender Teil der Eggers Sammlung in den Besitz Schedl's kam. Gegen Ende des Zweiten Weltkrieges nahm Hans Eggers, seiner Zeit die weltweit anerkannte Authorität auf dem Gebiet der Borkenkäfer, Verbindung mit W. H. Anderson, dem Kurator für Scolytiden und Platypodiden am Smithsonian Institut auf und bot ihm seine Sammlung für $4,000 an. Das Institut akzeptierte das Angebot und bezahlte Eggers im Voraus. Eggers begann damit die Sammlung zu verpacken und nach Washington zu senden, starb aber bevor ein Drittel der Sammlung unterwegs war. Wegen der militärischen Besetzung Deutschlands und den Reiseschwierigkeiten in Europa zu Kriegsende wurde ein europäischer Entomologe engagiert, der die Versendung der Sammlung abwickeln sollte. Dieser Entomologe war Karl E. Schedl (Anderson, W. H. & Anderson 1971:1-2). Lediglich ein Bruchteil der Eggers Summlung, die Schedl übergeben war, kam in Washington an, während ein beachtlicher Teil des Typen- und Nichtypenmaterials in Schedl's Sammlung auftauchte.

Schedl (1979c:2) berichtete wie dieser bedeutende Teil der Eggers Sammlung in seine Hände kam. Dasselbe erzählte er SLW im September 1965 in Lienz ausführlicher. Wie aufrichtig Schedl's Bericht auch gewesen sein mag, er steht im Gegensatz su dem, war Frau (Mrs.) Viktor Butovitsch (Tochter von Hans und Elsa Eggers) bei unterschiedlichen Gelegenheiten L. G. E. Kalshoven und F. G. Browne erzählt hat und SLW berichtet wurde. Ihr

zufolge nahm sich Schedl einfach was er haben wollte. Dokumentierbare Fakten dieser Transaktion sind: (1) Beim Tod ihres Mannes war Elsa Eggers so senil, dass "sie nicht einmal ihren eigenen Namen wusste." Nach Hans Tod war die Tochter ihr gesetzmässiger Vormund und führte all ihre persönlichen Geschäfte, keines betraf die Sammlung oder Schedl. (2) 1952 und wiederum 1961 haben W. H. Anderson und S. L. Wood zusammen eine grössere Zahl (mehr als 20) von (USNM) Leihscheinen des Smithsonian Institut durchgeschen; auf den maschinen-geschriebenen und unterszeichneten Formalaren bestätigt Karl E. Schedl den Empfang von mehreren hundert primären und sekundären Typen, ausgeliehen von der Eggers Sammlung während er sie für den Versand vorbereitete. Der U. S. Militär-Attaché, der Schedl's Verpacken und Sortieren der Sammlung beaufsichtigte, hatte Schedl die Leihscheine auferlegt. Offenbar wusste Schedl aber nicht, dass diese Leihscheine direkt an das Smithsonian Institute gesandt wurden. W. H. Anderson und D. M. Anderson (seinem Nachfolger) zufolge sowie bestätigt durch eigene unabhängige Beobachtungen wurde das Material niemals Washington zurückgegeben. In unserem Katalog werden wiederholt Probleme zitiert die widersprüchliche Angaben über Sammlungsorte betreffen. Ähnliche Probleme bestehen mit nicht zurückgegebenen Ausleihen vom Forest Research Institute, Dehra Dun, vom CSIRO, Canberra, und anderen Institutionen und sind im Katalog erwähnt.

Zum Verständnis der Katalogbenutzer wird im folgenden erläutert wie Schedl in den Besitz eines Dutzend der Eichhoff Typen gelangte. Wie Schedl im September 1965 erzählte, war Schedl zu Ende des Zweiten Weltkrieges Major im deutschen Heer und mit der Bewirtschaftung von Wäldern in den besetzten Gebieten betraut. Als die Ostfront zusammenbrach war Schedl in Polen. Bevor er floh besuchte er das Stettiner Museum wo sich die Dohrn Sammlung befand (die Sammlung enhielt ein Dutzend oder mehr Eichhoff Typen). Als Schedl das Museum erreichte, war es verlassen mit Ausnahme des Kurators für Coleopteren. Gemäss Schedl empfahl im der Kurator die Eichhoff Typen, nach denen er gefragt hatte, mitzunehmen und um sein Laben zu rennen. Abgesehen von diesen Exemplaren wurde das Material des Stettiner Museums durch Kriegseinwirkung vernichtet.

Material und Methoden

Wie in der Einleitung zum Teil 1 des Katalogs (Wood & Bright 1987) erwähnt wurde der Katalog 1946 begonnen, indem SLW anfing Sach- und Autorenregister im Rahmen einer systematischen Erfassung der Scolytiden- und Platypodiden-Literatur aufzustellen. Diese Karteien wurden bis 1980 geführt, sind aber nur bis 1970 einigermassen vollständig. Diese Karteien wurden durch eine Sammlung von mehr als 100,000 genadelten Exemplaren der Scolytidae und 3,000 Platypodidae sowie eine umfangreiche Duplikatensammlung in Ethanol ergänzt. Das meiste Material, das mehr als 2,000 biologische Arten umschliesst, hat er selbst in Nord- und Sudamerika, Asien, Australien, Europa, Japan, Neu Guinea und Sri Lanka gesammelt. Zusätzlich hat SLW 1960 bis 1990 bestimmte Exemplare mit mehreren grossen Museen sowie mit Browne, Krivolutskaya, Kurenzov, Murayama, Schedl etc. ausgetauscht. Im Austausch gegen einem Teil der Exemplare hat er seit 1945 bis heute für Kollegen eingesandtes material bestimmt. Um die Bestimmung von Arten authentisch abzusichern hat er Proben mit den primären Typen verglichen beim: AMNH (New York), CAS (San Francisco), MCZ (Cambridge), USNM (Washington), CNCI (Ottawa) in Nordamerika; beim BMNH (London), IZL (St. Petersburg/Leningrad), IZM (Moskau), MZU (Helsinki), MNHN (Paris), NHMW (Wien), Schedl Sammlung (Lienz) in Europa; FRI (Dehra Dun), Nobuchi Sammlung (Ibaraki) in Asien. Auf dem Weg der Ausleihe wurden zahlreiche primäre und sekundäre Typen von vielen anderen Museen und aus privaten Quellen examiniert. Er hat die authentischen Exemplare von etwa zwei Dritteln der aufgeführten Arten untersucht.

DEB wurde mit dem Katalogisieren vertraut als er 1961-1963 als Student mit SLW arbeitete. Sein Interesse verstärkte sich in den 1970ern und beide Authoren vereinigten ihre Krafte 1981, um diesen Katalog zu schaffen. DEB sammelte weitgehend in Canada, USA, dem nordamerikanischen Mexico und in Borneo. Seit 1966 is er als Wissenschaftler in der Forschung an der Canadian National Collection of Insects, Arachnids, and Nematodes (CNCI, Ottawa) tätig. Er besuchte zum Studium des Typenmaterials für dieses Projekt und verwandte Forschung die folgenden Museen: CAS

(San Francisco), FMNH (Chicago), MCZ (Cambridge), USNM (Washington), Wood Collection in Nordamerika; BMNH (London), MNHN (Paris), NHMW (Wien) in Europa. Kurzfristige Ausleihen von anderen Museen und aus privaten Quellen dienten der Untersuchung weiterer Ersttypen. Ein Bestimmungs-Service, ähnlich dem oben beschriebenen, wurde seit 1966 angeboten.

Um dem Benutzer den Umgang mit Fehlern zu erleichtern, die im Katalog enthalten sein mögen, is es wichtig zu verstehen, in welcher Prozedur die Aufstellung erfolgte. Die Grundinformation über jedes Taxon im Katalog wurde auf zwei verschiedene Blätter verteilt: (1) Gattungs-Gruppen-Blätter und (2) Blätter der Artengruppen-Kategorie. Auf diesen Blättern wurde auf der einen Seite der Name, Autor(en), Angaben über Type, Aufbewahrungsort, ursprüngliche Gattung, spätere Gattung, Quelle der Original beschreibung, gültiger Name des Taxons, Notizen, geographische Verbreitung und Wirtspflanzen aufgeführt. Auf der Rückseite des Blättes wurden mit Handschrift unter jeder der acht, in der Einleitung des Teils 1 erwähnten Kategorien (Wood & Bright 1987:3-16) die Zitate eingetragen. SLW war für die Durchsicht der Literatur von 1758-1959 verantwortlich; er und seine Mitarbeiter arbeiteten im M. L. Bean Life Science Museum, Brigham Young University, Provo, Utah, USA. DEB war für die Literaturdurchsicht von 1960-1989 verantwortlich; er und seine Mitarbeiter waren an der Canadian National Collection of Insects, Arachnids, and Nematodes, Canada Department of Agriculture, Ottawa, Ontario, Canada, tätig.

Bei der Durchsicht der uns zugänglichen Literatur (Wood & Bright 1987, Quellenangaben ohne Stern-Markierung) wählte jeder von uns (SLW und DEB) Namen aus, die im Index erfasst werden sollten, und schrieb Käfernamen, Autor, Publikationsjahr (einschliesslich des zugeordneten Buchstaben) und Seitenzahlen auf Papierschnitzel. Diese Daten wurden von technischen Mitarbeitern auf die Rückseite der oben erwähnten Datenblätter im entsprechenden Gegenstandsbereich übertragen. Viele der Literaturangaben, die noch in dem Band von 1987 mit einem Stern (*) versehen waren, wurden inzwischen gefunden und deren Daten im Index aufgenommen.

Der Erste Autor übertrug: (Item A) die grundsätzlichen taxonomischen Daten und die Verbreitung von den Datenblättern in einen IBM/PS Model 60-Komputer, der mit anderen Museums-Komputern verbunden war, um die Kapazitä zu erhöhen. Jedes nominate Taxon erhielt dann eine Kodexnummer bestehend aus (a) drei Digits für die Identifizierung des Gattungsnamen, (b) drei Digits für den gültigen Artenamen und (c) zwei Digits für die Identifizierung der Unterart oder einer synonymen Bezeichnung. Ein Word-Prozessor-Spezialist fütterte dann mithilfe einer Komputernummer (Item B) alle Zitate eines Taxons in die entsprechende Gegenstandskategorie der Literatur von 1758-1959. Dasselbe Verfahren wurde in Ottawa für das Einbringen aller Zitate von 1960-1989 in einen ähnlichen Komputer (Item C) angewendet. Kopien der Disketten wurden darauf von Ottawa nach Provo gesandt. Der Word-Prozessor Spezialist kombinierte Item B und C, alphabetisierte und redigierte die Zitate. Er übertrug dann die kombinierten B und C Informationen auf Item A um einen Entwurf des vollen Textes des Katalogs ausdrucken zu lassen. Gelegentlich war die Eingabe der richtigen Kodenummer fehlerhaft. Wir hoffen aber, dass wir all diese Fehler gefunden und korrigiert haben. Der Leser sei jodoch darauf hingewiessen, dass vielleicht nicht alle Fehler gefunden wurden.

Daraufhin sah der Erstautor seine taxonomische Kartei durch, die seine Eintragungen von der Originalliteratur mit den Eintragungen ähnlicher Karteien zusammenfasste, die das Smithsonian Institut ihm als Mikrofilm zur Verfügung stellte und 50 Jahre unabhängige Forschungsarbeit in Washington repräsentiert. Die Eintragungen auf dem ersten Ausdruck wurden durchgesehen und durch die Kartei-Eintragungen ergänzt; auf diese Weise wurde der Inhalt des Entwurfs erweitert und verifiziert. Harte Kopien des korrigierten Manuskripts wurden dann jedem Autor zu eingehenden Durchsicht gegeben und Stück für Stück mit dem Originaltext der Datenblätter verglichen. Nach Eintragung dieser Korrekturen erfolgte der endgültige Ausdruck.

Bei der Bearbeitung der Originalartikel wurden Namen oftmals nur auf einem Blatt zitiert, obgleich der Name des Taxons mehrmals in dem Artikel erwähnt wurde. Wir bemerken auch, dass in der erganzenden Kartei (a) nur die erste Seite des Artikels oder (b) der gesamte Artikel (z.B. p. 1-40), der das Taxon betrifft, genannt wird, wenn in Wirklichkeit der Name

nur einmal auf Seite 34 erwähnt ist. Obgleich dies irreführend sein mag, es gab uns die Möglichkeit definitive Hinweise auf Arbeiten zu geben, die wir nicht einsehen konnten (solche Artikel, die in der Bibliograpie mit einem [*] Stern versehen sind).

Die Zuordnung der Artikel zu acht Sachgebieten war zwar eine gute Idee doch nicht so praktisch wie man denken möchte. Viele Publikationen waren einwandfrei einem oder mehreren Sachgebieten zuzuordnen, andere jedoch nicht. Manchmal konnten wir uns über die Zuordnung nicht einigen und bemerkten, dass wir selbst einen gegebenen Artikel an einem Tage so am anderen Tage einem anderen Sachgebiet zuordneten. Bei der Suche nach einer sehr speziellen information sollte man deshalb alle acht Sachgebiete berücksichtigen.

Wir wissen, dass Katalogisieren ein fortdauernder Vorgang ist, zu dem viele beitragen. Die Artikel, die wir gefunden und verarbeitet haben, repräsentieren insgesamt nur jene Literaturstellen, die durch Schlüsselworte auffielen. Es gibt eine grosse Menge Literatur in den Archiven der Ökologie, Forstwirtschaft, Systematik usw., die sehr nützlich wäre doch noch nicht von Katalogen erfasst wurde. Vielleicht stimuliert dieser Katalog Andere zusätzliche informationen aus verborgenen Quellen beizusteuern.

VERFAHREN

Die in diesem Katalog aufgeführten Arten erscheinen unter zwei Familien: Scolytidae und Platypodidae. Soweit uns bekannt, wurden alle Arten, die diesen Familien von 1758 bis 1991 zugeordnet wurden, mit ihren Synonyma aufgenommen. Innerhalb der Familien wurde die Unterfamilie, der Tribus und die Gattung phylogenetisch angeordnet wie bei Wood (1986a) für die Scolytidae. Da es keine neuere Klassifikation für Platypodiden gibt, wurde für diese Familie eine vorläufige Aufstellung vorgenommen, die sich auf Strohmeyer (1914b, 1914c), Schedl (1939p) und vorläufige Konzepte von SLW stützt. Die unter Familie, Unterfamilie und Tribus gemachten Literaturhinweise sollen nicht vollständig sein sondern auf solche Arbeiten hinweisen, die für die Entwicklung einer Klassifizierung wichtig sind. Die Literaturhinweise zu jeder Art sind so wollständig wie es uns möglich war. Wie erwähnt ist das Enddatum für alle Sachgebiete 1989 mit Ausnahme der taxonomischen und geographischen Informationen.

Die Arten innerhalb jeder Gattung, die als gültig anzusehen sind, werden in alphabetischer Reihenfolge mit Autor(en) fettgedruckt aufgeführt. Der Autorenname folgt in gewöhnlicher Schrift nach: (a) Jahr und Site der ersten gültigen Einführung in die Nomenklatur. (Dieses Datum entspricht dem in Teil 1 der Bibliographie dieses Katalogs [Wood & Bright 1987] ohne Berücksichtigung anderer Überlegungen, obgleich dies in einiger Fällen technisch inkorrekt ist; die meisten Widersprüche sind vermerkt.) Wenn eine Art ursprünglich einen anderen Gattungsnamen trug als heute, wird der alte Gattungsname in Klammern nach der Seite und vor dem Punkt (.) genannt. (b) Dem Punkt folgt ein Hinweis auf die Art des Primärtyps, auf dem die Beschreibung des Taxons basiert (Holotyp, Lectotyp, Neotyp, Syntyp) und das Geschlect soweit bekannt. Die Typeninformation endet mit einem Semikolon (;). (c) Dem Semikolon folgt der Fundort wie in der Originalveroffentlichung angegeben. Widersprüche zwischen publizierten Typenfundort und dem auf dem Etikett angegebenen sind vermerkt. Mehrere Autoren, besonderes Schedl, führen alle Orte auf, von denen sowohl Primär- wie Sekundärtypen kamen; in diesem Fall haben wir alle Fundorte aufgeführt. Die Fundortinformation endet mit einem Semikolon (;). (d) Dem Semikolon folgt die Angabe über die Deponierung der Typen wien sie in der Originalbeschreibung veröffentlicht wurde. Weicht der angegebene Aufbewahrungsort von dem heutigen ab, so wird der Wechsel vermerkt. So befinden sich z.B. heute mehrere hundert der Eggers Typen, die dem Smithsonian Institut gehören, im NHMW, Wien (s. die Bermerkungen unter "Schedl und die Borkenkäferforschung"). Die Namen der meisten Deponierungsorte sind auf die Anfangsbuchstaben beschränkt; dieser Bezeichnung folgt der Ortsname (oder für Madagascar der Name der Insel). Die vollständigen Namen der Deponierungsorte sind am Ende der Einleitung aufgeführt. Die vollen Namen der gelegentlich zitierten Deponierungsorte sind ausgeschrieben. Private Sammlungen sind mit dem Namen des Eigentümers bezeichnet, gefolgt vom Ortsnamen soweit bekannt. (e) Wurden Lectotypen ausgeworfen, folgen Name, Jahr und Seite

dieser Lectotypendesignierung einem Komma (,) nach der Angabe von Sammlung und Ortsnamen.

Unter jedem gültigen Artnamen mag eingetragen sein: (a) Abbildungen: Auf Abbildungen wird nur hingewiesen, wenn sie in geeigneter Güte vorliegen. Abbildungen geringer Qualität und Mehrfachzitate wurden vermieden. (b) Die geographiche Verbreitung wird alphabetisch innerhalb eines Kontinents mit Schrägstrichen (/) zwischen den Kontenenten angegeben. Landesteile sind durch ein Komma (,) getrennt. Einige Abweichungen von den üblichen geographischen Bezeichnungen sind: (1) die Bahamas und Trinidad werden als Antillen behandelt, nicht als Teile der angrenzenden Kontinente; (2) Sachalin (Russland), die japanischen Inseln, Taiwan und Hong Kong wurden als Teil Asiens behandelt; (3) die Andamanen und Nikobaren als Teil Indiens; (4) Malaya bezeichnet nur die kontinentale Halbinsel und schliesst Singapore ein, es ist nicht synonym mit Malaysia; (5) um Platz für das häufig zitierte malayische Archipel zu behalten, wurde die ungenaue Bezeichnung "Indonesien" benutzt. Es schliesst fast ganz Indonesien ohne New Guinea und das insulare Malaysien ein; und (6) afrikanische Inseln wurden getrennt aufgeführt aber mit den afrikanischen Ländern zusammengefasst, während Madagaskar als separate Landmasse behandelt wird. (c) Wirtspflanzen werden alphabetisch mit dem wissenschaftlichen Namen angegeben, den die Autoren in ihren Artikeln benutzen. In den meisten Fällen haben wir davon abgesehen die Nomenklatur zu ändern oder orthographische Fehler zu korrigieren, es sei, wir waren mit dem Namen völlig vertraut. (d) Mit Nummern versehene Bemerkungen gehören drei Kategorien an: Kategorie (1), die Information betrifft die Nomenklatur; Kategorie (2), die Bemerkungen betreffen Synonyma; und Kategorie (3), die Bemerkungen enthalten wichtige Mitteilungen der Autoren dieses Katalogs für den Leser und zitieren Wiederbeschreibungen, nomina nuda und andere wichtige Informationen.

Unterarten sind geographische Rassen, die eigene Populationen bilden sich aber mit anderen Unterarten vermischen können. Da Borken- und Ambrosiakäfer als subcortikale Parasiten in der Wirtspflanze sehr begrenztem Umweltstress ausgesetzt sind, treten geographische Rassen in diesen Familien seltener auf. Unterarten werden hier nur bestätigt, wenn fundierte Untersuchungen die Autoren von der tatsächlichen Existenz einer geographischen Rasse überzeugen. Fast alle der Schedl'schen Unterarten und jene der meisten anderen Autoren vor 1960 sind entweder Aberrationen ohne Nomenklaturstatus oder "cryptic (or sibling)" Arten, also gute Arten, denen offensichtliche diagnostische Merkmale fehlen. Die Namen der anerkannten Unterarten und ihrer Autoren sind fett gedruckt und unter dem Namen der Art eingesetzt, su der sie gehören.

Synonyma sind unter dem gültigen Namen genannt, zu dem sie gehören; sie sind nach ihrer chronologischen Priorität kursiv wiedergegeben. Die Angaben über ihre Typen sind entsprechend dem gültigen Artennamen aufgelistet, unter dem sie vereint wurden. Wir haben das Originalzitat und andere wichtegen Hinweise hinzugefügt, welche die Synonymie etablieren.

Nomina nuda sind im Index und in den Kategory (3) Bemerkungen unter dem gültigen Namen vermerkt. Die Nomina nuda unbekannter Artenzuordnung wurden aus diesem Katalog herausgelassen.

Unter "References" befinden sich die Literaturhinweise unter jedem Taxon. Diese sind unter acht Sachgebieten angeordnet wie in Wood & Bright (1987:16) beschrieben. Die Anordnung dieser Zitate ist alphabetisch nach Autorennamen. Autorennamen werden wie in Wood & Bright (1987) unter Weglassung diakritischer Zeichen oder orthographischer Anpassung buchstabiert mit Ausname des Umlauts (Dobner =Doebner).

Acht Gattungen, von denen fünf nur als Fossil bekannt sind, werden in der Kategorie Incerta Sedis genannt. Die Typen von zwei lebenden Gattungen kamen von Afrika und gingen verloren. Ihre Plazierung bedarf weiterer informationen. Die achte Gattung wurde so kurzlich beschrieben, dass wir keine Zeit hatten die Typen zu lokalisieren.

Danksagungen

Dieser Teil des Katalogs ist ein Index der Arbeit Anderer. Wir anerkennen und schätzen die Anstrengungen Tausender von Autoren, die Beiträge zur Kenntnis der Scolytiden und Platypodiden geleistet haben. Wir fühlen uns tief für die Hilfe verpflichtet, die wir von Hunderten von Bibliothekaren erfahren haben; sie bemühten sich uns Fotokopien der

benötigten Arbeiten zu besorgen. Wir danken auch vielen Kuratoren von Sammlungen, die uns bei der Prüfung des Typenmaterials in ihren Museen halfen oder solches ausliehen. Dies hat uns geholfen zahlreiche taxonomische Probleme zu lösen.

Äusserst dankbar sind wir einer motivierten Mitarbeiterschaft, die viele oder alle der sieben Jahre dieses Projektes durchhielten, für ihre Hilfe bei dieser monotonen und langweiligen Aufgabe. Die Mitarbeiter an der Brigham Young Universität waren Rita Farias Espinel (1 Jahr), Nadja Kummer (1 Jahr), Imelda Lom (1 Jahr), Pilar Pizzaro Sweany (3 Jahre), der bei Literaturauszügen half; Carla Jolayne Rice (2 Jahre) bediente den Komputer; Dr. C. Selby Herrin (7 Jahre) bewaltigte die gesampt Programmierung, Beratung, Wartung und Management. Die Mitarbeiter in Ottawa waren Jennifer Read (4 Jahre) die bei der Herstellung der Bibliographie half; Robert E. Skidmore (2 Jahre) war allgemeiner Projektassistent; Derrik Bell (1 Jahr) als Komputer-Spezialist; Larry Spears (2 Jahre) als Programmierer und Berater.

Die Arbeiten an der Brigham Young Universität wurde durch Drittmittel finanziert. Forschungsmittel bewilligten das U.S. Department of Agriculture, Competitive Research Grants Program grant number 87-CRCR-1-2582, die National Science Foundation, Biological Research Resources Program award number 8711632. Die Arbeiten in Ottawa wurden vom Canada Department of Agriculture finanziert. (Translation—J. P. Vité).

INTRODUCCIÓN

Las páginas que siguen contienen el primer intento serio de relacionar y catalogar la fauna mundial de Scolytidae desde Hagedorn (1910d) y de Platypodidae desde Strohmeyer (1914b, 1914c). También se incluye un suplemento a la bibliografía que constituyó la 1ª Parte de este catálogo, que pone al día las referencias bibliográficas hasta el año 1989 inclusive. Las citas de artículos taxonómicos y biogeográficos incluyen hasta 1991.

Entre los temas de especial interés, o en las que nos hemos visto particularmente implicados, podemos mencionar: (a) La cantidad de información biológica conocida resultó sorprendente. Se consideraba que al menos un 20% de todas las especies nominadas habrían sido citadas solamente una vez aparte de la descripción original, y que otro 20% habrían sido citadas menos de 5 veces. Una revisión superficial sugiere que las especies citadas sólo una vez representan menos del 5% del total, y que aquellas citadas menos de 5 veces sólo representan un porcentaje ligeramente superior a otro 5%. (b) Los niveles de transporte de especies a través del comercio, estableciéndose poblaciones reproductoras en áreas extradistribucionales del planeta, deberia ser un tema preocupante a nivel mundial. Después de un siglo en que las especies que llegaban a los Estados Unidos superaban escasamente una por década, entre 1985 y 1989 se establecieron al menos seis especies, cuatro especies más fueron registradas en 1990, y tres más en 1991. El impacto económico de estas especies introducidas ya se está percibiendo y se incrementará. El hecho de que tres de esas trece especies se reproduzcan por la via bisexual normal sugiere que existen lagunas significativas en los procedimientos de inspección de plantas en los puertos de entrada. Ello debería ser un tema de gran importancia en los campos agrícola y forestal. Se precisan urgentamente controles más profundo y más rigurosos, diseñados para detectar especies introducidas, especialmente en la vecindad de los puertos de entrada más importantes. Los patrones de dispersión de este tipo, a través del comercio, tienen una implicación mundial y conciernen a todos los paises, sin excepción. (c) Un punto estrechamente relacionado con el anterior es la necesidad de un adiestramiento en mayor profundidad, y más oportunidades de investigación, para los taxónomos de insectos que se hallan en periodo de formación. Cualquier taxónomo joven y serio, especialista en Scolytidae y Platypodidae, ya sea en la Universidad o en un servicio profesional en cualquier parte del mundo, resulta prácticamente ignorado. Pero la identificación de estos insectos a menudo es particularmente difícil, y llegar a alcanzar una competencia profesional requiere de 10 a 20 años de experiencia en el tema. Los aficionados y los especialistas pobremente adiestrados, con frecuencia cometen errores serios de criterio, como lo muestran el número y la repartición de los sinonimos recogidos en este volumen. Con frecuencia esos errores son tan lamentables que llegan a asustar a cualquiera que estudie sus consecuencias. Este problema requiere una atención inmediata

en todos aquellos groupos que, como los Scolytidae, tienen enormes implicaciones económicas. Todas las especies de Scolytidae son parasitos endogenos de plantas y, en consecuencia, constituyen vectores potenciales de enfermedades de plantas o bien enemigos directos de la planta hospedante.

Schedl y los Scolytidae

Este catálogo no estaría completo, o incluso sería incomprensible, sin un breve comentario acerca de los métodos y de las actividades de Karl Eduard Schedl (1898-1979). Durante más de 50 años, Schedl ejerció una gran influencia en el estudio de los Scolytidae y de los Platypodidae. Se interesó en los Scolytidae a la edad de 17 años, durante la Primera Guerra Mundial, cuando observó los vestigios del ataque de una especie de *Ips* en un pino caído sobre la trinchera donde se hallaba refugiado. Después de la guerra, recibió una formación en ecología forestal y poco después pasó a interesarse en la sistemática. Publicó 342 artículos sobre taxonomía de escolítidos, y fue el autor de más de 2.000 especies nominadas. Aunque ocasionalmente utilizó la palabra "evolucion" y otros términos adoptados de la Sistemática Moderna, su concepto de especie fue enteramente morfológico, en el sentido asumido antes de 1940. Su utilización de la designación de subespecies no era en el sentido de una raza geográfica, sino en el de cualquier minúscula desviación morfologica de su "tipo" (en general no eran más que aberraciones). Le explicó a SLW que no aceptaba el Codigo Internacional de Nomenclatura Zoológica como vinculante para él; por esta razón, formulo su propio código de nomenclatura, el cual no fue nunca escrito o debatido con otros colegas.

Schedl tenia la costumbre de poner nombres inéditos a aquellos ejemplares que no podía identificar. Esos nombres a menudo permanecían en su colección durantes decadas y fueron citados repetidamente en la literatura, tanto por el propio Schedl como por otros autores, antes de que fueran descritos formalmente o bien asociados con especies previamente nominadas. Otra costumbre que llevaba a confusión, tanto para él como para sus colegas, era que reconocía un "holotipo macho" y un "holotipo hembra" para cada especie. En numerosas ocasiones esta costumbre ha conducido a descripciones dobles de especies (y al establecimiento de sinónimos y homónimos). Afortunadamente, publicó una lista del material típico de Platypodidae de su colección (Schedl 1978a) y, más tarde, un volumen similar dedicado a los Scolytidae (Schedl 1979c). Estos catálogos sólo son parcialmente completos, pero dan una relación de "holotipos," lectotipos y neotipos de su colección. Muchas de esas designaciones no son válidas y, en consecuencia, deberian usarse con cautela. Se mencionan "holotipos" en muchas de las especies que había nominado previamento a partir de series sintípicas, muchos de los lectotipos se relacionan sin indicar el orígen geográfico o los datos en los que se basa la elección de los mismos, y, en nuestra opinión, ninguno de los neotipos cumple los requisitos del Código.

Para una mejor comprensión de este catálogo es necesario explicar el sistema por el cual Schedl consiguio una porción significativa de la colección de Eggers. Hacia el final de la Segunda Guerra Mundial, Hans Eggers, reconocido como la autoridad mundial en Scolytidae en esta época, contactó con W. H. Anderson, conservador de Scolytidae y Platypodidae en el Smithsonian Institution, y ofreció vender su colección a esa institución por 4.000 dolares. El Smithsonian Institution aceptó la oferta y pagó por adelantado a Eggers la cantidad total estipulada. Eggers empezó a embalar y a remitir la colección a Washington, pero murió habiendo enviado menos de un tercio de la misma. A causa de la ocupación militar de Alemania y de las dificultades para viajar por Europa a finales de la guerra, un entomólogo europeo se encargó de completar el embalaje y envió de la colección. Ese entomólogo fue Karl E. Schedl (Anderson, W. H. & Anderson 1971:1-2). Solamente una porción de la parte de la colección puesta bajo la tutela de Schedl llegó a Washington, mientras que una parte sustancial del material, tanto típico como no típico, apareció en la colección de Schedl.

Schedl (1979c:2) publicó el relato de como llegó a sus manos esta porción significativa de la colección de Eggers. Este mismo relato, aunque mucho más detallado, se lo contó a SLW en Lienz, en Septiembre de 1965. Sin embargo, por muy sincera que haya sido esta explicación, se contradice con lo relatado por la Sra. Butovitsch (esposa de Viktor Butovitsch e hija de Hans y de Elsa Eggers) en ocasiones diferentes a L. G. E. Kalshoven y F. G. Browne y referido a SLW. Según este relato, Schedl simplemente

tomó lo que precisaba para su propio uso. En relación con este asunto, los hechos documentados son: (1) Cuando su marido murió, Elsa Eggers se hallaba en estado senil, hasta el punto de que "incluso no sabiá cual era su propio nombre." Después de la muerte de Hans, su hija era su representante legal y gestionaba todos sus asuntos personales, ninguno de los cuales tenía relación con la colección o de Dr. Schedl. (2) En 1952, y de nuevo en 1961, W. H. Anderson y S. L. Wood examinaron y repasaron conjunctamente una gran cantidad (más de 20) de hojas de préstamo del Smithsonian Institution (USNM), mecanografiadas a simple espacio y firmadas por Karl E. Schedl reconociendo haber recibido cientos de tipos primarios y secundarios sacados de la Colección Eggers mientras Schedl preparaba la misma para su envío. Dichas hojas de préstamo fueron firmadas por Schedl a instancias del agregado militar americano que supervisó el ambalaje y la preparación de la colección. Aparentamente, Schedl ignoraba que esas hojas fueron enviadas directamente al Smithsonian Institution. Segun W. H. Anderson y D. M. Anderson (su sucesor), estos materiales no fueron nunca devueltos a Washington, lo cual confirma las observaciones propias hechas independientemente. En nuestro catálogo, se cita repetidamente las diferentes explicaciones relacionadas con la problematica sobre el deposito de los materiales. A lo largo del catálogo también se citan problemas similares de préstamos no devueltos y pertenecientes al Forest Research Institute, Dehra Dun, y al CSIRO, Canberra.

La explicación que sigue es para que el lector comprenda como una docena de tipos de Eichhoff llegaron a la colección de Schedl. Según contó Schedl a SLW en Septiembre de 1965, cerca del final de la Segunda Guerra Mundial, Schedl era comandante del ejercito aleman y tenía ciertas responsabilidades en la gestión de bosques de los países ocupados por Alemania. Schedl se hallaba en Polonia cuando cayó el frente del Este y, antes de efectuar la retirada, pasó por el Stettin Museum, donde se conservaba la coleccion Dohrn (la cual incluía una docena o más de tipos de Eichhoff). Cuando Schedl llegó, el museo había sido abandonado por casi todo el personal excepto por el conservador de Coleoptera, el cual estaba a punto de marcharse. Según Schedl, cuando le pregunto al conservador por los tipos de Eichhoff, éste le dijo que los tomara y seguidamente huyó para salvarse. A excepción de estos ejemplares, los materiales del Stettin Museum fueron destruidos por la guerra.

Material y Métodos

Como ya se mencionó en la Introducción de la 1ª Parte de este catálogo (Wood & Bright 1987), los inicios del mismo tuvieron lugar en 1946, cuando SLW empezó a confeccionar fichas taxonómicas y de autores, en conjunción con una búsqueda sistemática de la literatura sobre Scolytidae y Platypodidae a nivel mundial. Esas fichas se hallan suplementadas por una colección de más de 100.000 ejemplares de Scolytidae y 3.000 de Platypodidae montados, y por una gran colección de material duplicado conservado en etanol. Gran parte de este material, incluyendo más de 2.000 especies biológicas, fue recolectado por él mismo en Norteamérica, Sudamérica, Asia, Australia, Europa, Japón, Nueva Guinea y Sri Lanka. Además, entre 1960 y 1990, SLW intercambió ejemplares identificados con diversos museos importantes y con Browne, Krivolutskaya, Kurenzov, Murayama, Schedl, etc. Ha proporcionado un servicio de identificación a colegas profesionales, recibiendo a cambio una parte de los ejemplares recibidos para estudio desde 1945 hasta la actualidad. Con el fin de confirmar la identificación de las especies, ha seleccionado ejemplares comparados directamente con tipos primarios en el AMNH (New York), CAS (San Francisco), MCZ (Cambridge), USNM (Washington), CNCI (Ottawa) en Norteamérica; BMNH (London), IZL (Leningrad/St. Petersburg), IZM (Moscow), MZU (Helsinki), MNHN (Paris), MHNW (Wien), Colección Schedl (Lienz) en Europa; FRI (Dehra Dun), Colección Nobuchi (Ibaraki) en Asia. Numerosos tipos primarios y secundarios han sido examinados a través de préstamos de corta duración facilitados por otros museos y de fuentes privadas. Ha examinado ejemplares confirmados de unos dos tercios de las especies nominadas que se relacionan más adelante.

DEB se familiarizó con los métodos de catalogación durante 1961-1963, mientras trabajaba con SLW como postgraduado. Este interés se incremento durante la década de 1970, y en 1981 ambos autores unieron sus esfuerzos para recopilar este catálogo. DEB ha realizado recolecciones exhaustivas en Canadá,

Estados Unidos y Mexico, por lo que se refiere a Norteamérica, asi como en Borneo. Ha sido investigador científico en la Canadian National Collection of Insects, Arachnids and Nematodes (CNCI, Ottawa) desde 1966. Con el fin de estudiar material típico para este proyecto e investigaciones relacionadas, ha visitado los siguientes museos: CAS (San Francisco), FMNH (Chicago), MCZ (Cambridge), USNM (Washington) y Colección Wood, por lo que se refiere a Norteamérica; BMNH (London), MNHN (Paris) y NHMW (Wien), en Europa. Numerosos tipos primarios adicionales han sido examinados a través de préstamos de corta duración de otros museos y de fuentes privadas. Desde 1966 ha proporcionado un servicio de identificación similar al descrito anteriormente.

En aras de una mayor comprensión y para que el usuario pueda enfrentarse de manera efectiva con los errores que puedan hallarse en este catálogo, es esencial que se entiendan los métodos seguidos en su recopilación. La información básica de cada taxón que se incluye en el catálogo ha sido organizada en hojas de datos de dos tipos: (1) hojas de datos a nivel de genero, y (2) hojas de datos a nivel de especie. En esas hojas, el nombre del autor(es), datos del tipo, lugar de depósito, género original, género subsiguiente, fuente de la descripción original, nombre válido del taxón, notas, distribución geográfica, y hospedantes, se anotaban en una cara de la hoja. Al reverso de la misma se escribian a mano las citas en cada una de las ocho categorias mencionadas en la 1ª Parte de este catálogo (Wood & Bright 1987:3-16). SLW se responsabilizó de revisar la literatura publicada entre 1758 y 1959; junto con su equipo, en el M. L. Bean Life Science Museum, Brigham Young University, Provo, Utah, Estados Unidos. DEB se responsabilizó de revisar la literatura desde 1960 a 1989; junto con su equipo, en la Canadian Collection of Insects, Arachnids and Nematodes, Canada Department of Agriculture, Ottawa, Ontario, Canada.

Durante la revisión de la literatura a que tuvimos acceso (Wood & Bright 1987, referencias no marcadas con un [*] asterisco), cada uno de nosotros (SLW y DEB) extrajo los nombres para ser incluídos en los índices y anotó sobre papel los nombres de los coleópteros, autor, año de publicación (incluyendo letras suplementarias), y número de páginas. Después, el equipo técnico copiaba estos datos en el reverso de las hojas antes mencionadas, sobre las áreas temáticas apropiadas de las mismas. Muchas de las referencias marcadas con un asterisco (*) en el volumen de 1987 had sido localizadas posteriormente y los datos se han incluido en los indices.

El primer autor registró: (Conjunto A) la infomación básica taxonómica y distribución de los coleópteros en las hojas de datos, en una ordenadora IBM/PS2 Modelo 60, conectado por una red informática con las ordenadoras del museo para ampliar su capacidad. A cada taxón nominado se le asignó un número de código basado en (a) tres dígitos para identificar el nombre genérico, (b) tres dígitos para identificar el nombre válido especifico, y (c) dos dígitos para identificar las subespecies o sinónimos. Después, un especialista en proceso de textos entró mediante notación de ordenadora (Conjunto B) todas las citas de cada taxón en las áreas temáticas apropiadas, recogidas en la literatura publicada entra 1758 y 1959. El mismo procedimiento fue seguido en Ottawa, entrando todas las citas entre 1960 y 1989 en una ordenadora similar (Conjunto C). Desde Ottawa se enviaron a Provo copias de los disquettes con los datos conjuntamente con una copia sobre papel del contenido de los mismos. El especialista en proceso de textos combinó entonces los Conjuntos B y C, editó en orden alfabético las citas y, a continuación, transfirió la combinación de los Conjuntos B y C al Conjunto A, obteniendo un primer borrador del texto completo del catálogo. En escasas ocasiones se había producido un error al introducir el número de código apropiado. Confiamos en haber detectado y corregido todos esos errores, pero el usuario debe estar advertido de que quizá nos ha pasado desapercibido alguno de ellos.

En esta fase, el primer autor revisó sus fichas taxonómicas, compuestas de datos de la literatura original y suplementadas con datos de fichas similares microfilmadas por el Smithsonian Institution por encargo suyo, y que representaba 50 años de investigación llevada a cabo independientemente en Washington. A continuación, las entradas del primer borrador de la base de datos fueron revisadas y se suplementaron con las entradas de las fichas, con lo cual se ampliaron y se verificaron. Seguidamente se prepararon copias sobre papel del manuscrito corregido para cada autor, para hacer una revisión detallada, contrastándolo punto por punto con las hojas de datos orig-

inales. Después de entrar las correcciones pertinentes se preparó el borrador final.

En la revisión de los articulos originales, los nombres a menudo eran citados en una sola página, incluso aunque el nombre del taxón en cuestión apareciera muchas veces en el artículo. Conviene también mencionar que al usar las fichas suplementarias, los recopiladores que prepararon esas fichas podían citar (a) sólo la primera página del artículo, o (b) el artículo completo (por ejemplo, páginas 1-40) correspondiente a un taxon en cuestión, mientras que, en realidad, el nombre se citaba una sola vez en la página 34. Incluso aunque esto pueda resultar equivoco, nos permitió citar referencias concretas de numerosos artículos que no pudimos examinar (aquellos marcados con un [*] asterisco en la bibliografía).

La asignación de los artículos a una de las ocho areas tematicas, aunque es una buena idea, no resultó tan práctica como suponíamos. Muchos de los artículos publicados eran claramente asignables a una o más áreas temáticas definidas, pero otros no. A veces discrepábamos sobre la asignación apropiada e incluso acontecía que un día asignábamos un artículo dado a una área temática y al día siguiente los asignábamos a otra distinta. Se deberían considerar las ocho áreas cuando se esté revisando la literatura de un tema específico.

Somos plenamente concientes de que la tarea de catalogación es un proceso contínuo al que muchos contribuyen. La mayoría de los artículos que hemos localizado y revisado representan sólo parte de la literatura en que las palabras clave atrajeron la atención de los revisores. Existe una gran cantidad de literatura diluida en los archivos de ecología, temas forestales, sistemática, etc., que debe ser muy útil, pero que no ha captado la atención de los catologadores. Este catálogo tal vez estimulará a otros a contribuir con información adicional procedente de esas fuentes.

Procedimiento

Las especies contenidas en esta catálogo se reparten en dos familias: Scolytidae y Platypodidae. Se incluyen todas las especies asignadas a estas familias desde 1758 hasta 1991 y los sinónimos que conocemos de las mismas. Dentro de cada familia las subfamilias, tribus y géneros se han ordenado filogenéticamente, a la manera presentada por Wood (1986a) para los Scolytidae. Dado que no hay una clasificatión moderna disponible de Platypididae, esta familia se ha organizado siguiendo una ordenacion filogenética tentativa basada en una combinación de las de Strohmeyer (1914b, 1914c), Schedl (1939p) y en conceptos tentativos de SLW. Las referencias que se relacionan en los niveles de familia, subfamilia y tribu no pretenden ser exhaustivas, sino incluir sólo aquellos trabajos que se han considerado relevantes para el desarrollo de la clasificación del grupo. Las citas de referencias que se incluyen en cada especie son tan completas como lo han permitido nuestras fuentes. Como ya hemos indicado, se ha llegado hasta el año 1989 en el caso de todas las áreas temáticas, excepto para los datos taxonómicos y geográficos.

Las especies de cada género que aquí se consideran como válidas, se relacionan en negrita y en orden alfabético, con el autor correspondiente. El nombre del autor va seguido, en letra redonda, de (a) el año y la página en que el nombre fue validado nomenclatorialmente por vez primera (esta fecha es la que se corresponde con la bibliografía de la 1ª Parte de este catálogo: Wood & Bright 1987) independientemente de otras consideraciones y, en algunos casos, se sabe que es técnicamente incorrecta; se mencionan numerosas discrepancias de este tipo. Cuando la especie fue originalmente nominada bajo un género distinto del que ahora se le asigna, este género original se menciona entra paréntesis, seguido del número de página y de un punto [.]. (b) El punto va seguido de una indicación de la clase de tipo primario sobre el que se basa el taxón (holotipo, lectotipo, neotipo, sintipo) y del sexo del mismo, si se conoce. La información concerniente al tipo se cierra con un punto y coma [;]. (c) Al punto y coma sigue la localidad típica, tal como viene dada en la publicación original. Cuando se ha observado una discrepancia entre la localidad tipica publicada y la que aparece en las etiquetas del tipo, se menciona dicho cambio. Algunos autores, particularmente Schedl, relacionaron la totalidad de las localidades de donde provenían todos los tipos, primarios y secundarios; en estos casos se han relacionado todas las localidades. La información de la localidad tipo se cierra con un punto y coma [;]. (d) Al punto y coma sigue la designación del depósito del tipo, tal y como aparece en la descripción original. Cuando el lugar de depósito designado es diferente del lugar donde

se halla actualmente el tipo, se menciona el cambio. Por ejemplo, varios cientos de tipos de Eggers que pertenecen en el Smithsonian Institution se hallan actualmente en el MHNW, Wien (veanse los comentarios del apartado "Schedl y los Scolytidae"). Los nombres de numerosas instituciónes de depósito de tipos se abrevian con las iniciales de las mismas, seguidas del nombre de la ciudad (o, como en el caso de Madagascar, por el nombre de una isla). Los nombres completos se relacionan al final de esta Introducción. Cuando se trata de instituciones escasamente citadas, se menciona el nombre completo. Las colecciones personales se citan con el nombre del propietario, seguido del nombre de la ciudad, si se conoce. (e) Cuando se han designado lectotipos, se indica el nombre, el año y la página de designación del lectotipo en cuestión, sigue una coma y el nombre de la institución y la ciudad.

Debajo de cada nombre específico válido, aparece siguidamente la siguiente información: (a) Figuras: sólo se mencionan citas de figuras cuando son de buena calidad. Se han evitado las citas a figuras de calidad mediocre, asi como una excesiva proliferación de citas. (b) La distribución geográfica se da en orden alfabético por países de un continente dado, uno a continuación de otro pero separados por barras [/]. Las subdivisiones dentro de un país se han separado con comas. Incluimos en esta sección unos cuantos casos que se apartan de las designaciones geográficas ordinarias: (1) las islas Bahamas y la isla Trinidad son tradados como islas pertenecientes a las Antillas, no como parte de sus continentes adyacentes; (2) la isla Sakhalin (USSR), el archipiélago de Japón, Taiwan y Hong Kong son tradadas como formando parte de Asia; (3) las islas de Andaman y Nicobar se tratan como parte de la India; (4) Malaya indica solamente la península continental e incluye Singapur, no es sinónima de Malasia; (5) con el fín de ahorrar espacio en el caso del archipiélago Malayo, que se cita con mucha frecuencia, se ha empleado la imprecisa designación "Indonesia" que incluye la mayor parte de Indonesia y Malasia insular, pero excluye Nueva Guinea; y (6) las islas africanas se relacionan separadamente pero incorporadas en la lista de paises africanos; se exceptúa Madagascar por ser tratada como una masa continental aparte. En muchos casos no hemos actualizado la nomenclatura o no hemos corregido los errores de los nombres de los hospedantes, a menos que se tratara de nombres muy familiares. (d) Las notas se dividen en tres categorías que se designan con números: las notas de la categoría (1) incluyen información especialmente relacionada con la nomenclatura; las notas de la categoría (2) se refieren a la sinonímia; y las notas de la categoría (3) contienen mensajes de los autores del presente catálogo para el lector que son de especial significación, y citan redescripciones, *nominae nudae* y otras informaciones de importancia.

Las subespecies son razas geográficas que forman poblaciones diferenciadas y que pueden itegrarse con otras poblaciones. Dado que los escolítidos y los platypódidos son esencialmente parásitos endogenos de plantas, y que mientras se hallan en el interior del hospedante estan sujetos a presiones ambientales muy limitadas, las razas geográficas son poco frecuentes en esas familias. En este catálogo sólo se reconocen subespecies cuando se han hecho estudios lo suficientemente profundos como para convencer a los autores de que existen razas geográficas reconocibles. Casi todas las subespecies de Schedl, y las de muchos otros autores anteriores a 1960, son, o bien abrerraciones sin categoría nomenclatorial formal, o bien especies crípticas (o gemelas), es decir, buenas especies que no tienen caracteres diagnósticos obvios. Los nombres de las subespecies reconocidas aquí, con los autores correspondientes, se presentan en negrita y seguidos debajo del nombre de la especie a la que pertenecen. Cuando se reconocen subespecies, los nombres de los sinónimos se relacionan debajo del nombre en negrita de la subespecie a que pertenecen.

Los sinónimos se sitúan debajo, y seguido, del nombre válido al cual pertenecen; se indican en cursivas y en orden cronológico. Los datos de sus tipos se relacionan como en el caso de los nombres de especies válidas, además se añade la cita original y otras referencias relevantes que conciernen al establecimiento de la sinonímia.

Los *nominae nudae* que han sido citados como sinónimos se relacionan en el índice y en las notas de la categoría (3), bajo los nombres válidos. En el presente trabajo los *nominae nudae* de los que no se conoce su afinidad con alguna especie han sido omitidos.

Bajo el subtitulo de "References" debajo de cada taxón nominado, se presentan las citas bibliográficas. Dichas citas se organizan en las ocho áreas temáticas descritas por Wood & Bright (1987:16), y estan ordenadas alfabéti-

camente por el nombre del autor(es). Los nombres de los autores se deletrean como en Wood & Bright (1987) y excluyen signos diacríticos o cambios de letras usadas para compensar dichos signos (excepto Dobner = Doebner).

Ocho géneros, cinco de los cuales sólo se conocen como fosiles, se relacionan en la categoría *Incertae Sedis*. Los tipos de dos géneros actuales que se incluyen en esta categoría procedían de Africa y se han perdido. Su ubicación deberá aguardar información adicional. El octavo género had sido nominado tan recientemente que no hemos tenido tiempo de localizar los tipos.

AGRADECIMIENTOS

Esta parte del catálogo es un índice del trabajo hecho por otros. Reconocemos y apreciamos los esfuerzos de cientos de autores que han contribuido a la ampliación de nuestros conocimientos sobre Scolytidae y Platypodidae. Apreciamos sinceramente la ayuda recibida de cientos de bibliotecarios que han puesto especial empeño en proporcionarnos fotocopias de los artículos que necesitabamos consultar. También agradecemos a los numerosos conservadores de colecciones el que nos ayudaran cuando examinábamos material típico de sus museos, y a aquellos que gestionaron los préstamos que nos permitieron resolver numerosos problemas taxonómicos.

Nuestro reconocimiento más especial va dedicado al equipo de colaboradores que se han mantenido durante todos, o casi todos, los siete años que ha precisado este proyecto, por su ayuda en la labor más monótona y tediosa. El equipo en Brigham Young University se compuso de Rita Farías Espinel (1 año), Nadja Kummer (1 año), Imelda Lom (1 año), Pilar Pizarro Sweany (3 años), quienes ayudaron en la extracción de citas, Carla Jolayne Rice (2 años) que manejó la ordenadora, y el Dr. C. Selby Herrin (7 años), que hizo toda la programación de ordenadores y relizó tareas consultivas, de mantenimiento y de gestión. El equipo de Ottawa se compuso de Jennifer Read (4 años) que ayudó en la preparación de la bibliografía, Robert E. Skidmore (2 años), ayudante del proyecto general, Derrik Bell (1 año) especialista en la entrada de datos a la ordenadora, y Larry Spears (2 años) que fue el programador de la ordenadora y asesor.

El trabajo en Brigham Young University fue financiado con importantes subvenciones para la investigación del U.S. Department of Agriculture, Competitive Research Grants Program, programa número 87-CRCR-1-2582, y de la National Science Foundation, Biological Research Resources Program, subvención número 8711632. El trabajo en Ottawa fue financiado por el Canada Depatment of Agriculture.

Nuestro más sincero agradecimiento a los colegas que prepararon las traducciones de esta Introducción, para mayor beneficio de los usuarios. (Translation—X. Belles, Barcelona, Spain).

KEY TO SUBJECT AREAS

(**ay**) = Anatomy, physiology, genetics, etc.

(**bv**) = Behavior, including all aspects of the study of pheromones.

(**cn**) = Surveys, manipulation of populations, economic damage, risk-ratings, epidemics, insecticides, chemical or cultural control, economic impact, quarantine; excluded is biological control.

(**ec**) = Predators, parasites, biological control, effect of weather and climate, disease agents or vectors, competition, interaction with fungi, interspecific competition.

(**hb**) = Habits, life cycle, host selection, population dynamics.

(**ds**) = Geographical distribution, host distribution, faunal lists, all references to fossils.

(**tx**) = Nomenclature, classification, keys for identification, taxonomic descriptions when those descriptions are a major feature, phylogeny.

(**ms**) = Reviews, articles about scientists, laboratory or field techniques, marginal or non-science articles; chemical synthesis of pheromones is identified as (bv ms).

Catalog of Scolytidae

Family Scolytidae Latreille

Notes: The following is a list of significant contributions to knowledge of higher classification in this family. This list is not intended to include all published references on this topic.

Dermestes (part)
References: Bechstein 1805; DeGeer 1775; Linnaeus 1758, 1767a.

Bostrichus (part)
References: Fabricius 1775, 1787, 1792.

Bostrichidae (division Xylophaga)
References: Altum 1874, 1881; Eichhoff 1864b: 17–48, 1868d; Erichson 1836: 45; Herbst 1793: 111; Latreille 1807: 275; Paykull 1800: 153; Redtenbacher 1845: 36; Westwood 1836.

Scolytus
References: Geoffroy 1762.

Scolytidarii
References: Latreille 1807: 273.

Scolytidae (also includes the French term Scolytides)

***subcostulatus alternans* (Chapuis)** 1869: 22 (*Hylastes*). Syntypes, sex?; Mexique; IRSNB, Brussels.

Distribution: North America (Chiapas, Chihuahua, Distrito Federal, Durango, Guerrero, Hidalgo, Mexico, Morelos, Puebla in Mexico/ S Arizona, S New Mexico in USA).

Hosts: *Pinus chihuahuana*, *P. leiophylla*, *P. ponderosa*, *P.* spp.

Notes: (1) Wood 1982b: 92 (reduced to subspecies). (3) Intergradation between subspecies occurs from central Arizona and New Mexico to northern Mexico.

***sulcatus* Eggers** 1933a: 97. Holotype, sex?; China: Szechuan, Tatsienlu Tjiji, Urwaldrodungen; Eggers Collection, in NHMW, Wien.

Distribution: Asia (Sichuan in China).

References: (**tx**) Eggers 1933a: 97–98; Sokanovskii 1959b: 93–94.

***transbaicalicus* Eggers** 1941b: 119. Holotype, sex?; Wladiwostok, USSR; USNM, Washington.

Figures: Nakane et al. 1963: pl. 191.

Distribution: Asia (Japan/ E USSR).

Hosts: *Pinus koraiensis*.

Notes: (1) Murayama 1963b: 61 (synonym of *interstitialis*). Sokanovskii 1958: 38 (synonym of *imitator*.

References: (**ds**) Nakane et al. 1963: 381; Nobuchi 1985c: 5. (**tx**) Anderson, W. H. & Anderson 1971: 34; Eggers 1941b: 119; Nakane 1963: 381; Nakane et al. 1963: pl. 191; Nobuchi 1964: 132, 1985c: 5; Sokanovskii 1958: 38.

***tuberculatus* Eggers** 1933a: 98. Holotype ♀: Tatsienlu Tjiji, Szechuan, China; USNM, Washington.

Distribution: Asia (Sichuan in China).

References: (**tx**) Anderson, W. H. & Anderson 1971: 34; Eggers 1933a: 98.

° ***tuberculifer* Wood** 1988: 32. Holotype, sex?; fossil in Baltic amber; Geologisch-Palaeontologische Inst. Albertus Univ., Konigsberg.

Distribution: Europe (fossil in Baltic amber).

References: (**tx**) Wood, S. L. 1988: 32.

tuberculatus Schedl 1947a: 28. Holotype, sex?; fossil in Baltic amber; Geologisch-Palaeontologische Inst. Albertus Univ., Konigsberg, preoccupied by Eggers 1933a: 198.

Genus *Hylastes* Erichson

HYLASTES ERICHSON 1836: 47. Type-species: *Bostrichus ater* Paykull, designated by Westwood 1840: 39, Thomson 1859: 146.

Keys: Blackman 1941: 3, Bright 1976: 47, and Wood 1982b: 93 for North America; Murayama 1963b: 48 for Japan; Tsai & Huang 1964: 23 for China; Pfeffer 1944b: 98 for Europe.

Notes: (3) Species named by Stebbing 1908b: 14–15 as *Hylastes himalayensis* and *H. longifoliae* belong to Cossoninae (Curculionidae) and are here transferred to that subfamily.

***angusticollis* Eggers** 1929c: 9. Holotype, sex?; Wladimir (Wolhynien), USSR; IZL, Leningrad.
Distribution: Europe (W US$R).
Hosts: *Picea* sp.
Notes: (3) Schedl 1979c: 20 (lectotype designation invalid). A report of this species from Belgium requires confirmation.
References: (**ds**) Kleine 1934a: 126; Leclercq 1971; Stark 1952: 219; Winter, T. G. 1983: 14. (**tx**) Eggers 1929c: 9; Schedl 1934f: 1636, 1979c: 20; Sokanovskii 1958: 38; Stark 1952: 219.

***asperatus* Wood** 1975a: 24. Holotype ♀; New Mexico [USA]; Wood Collection.
Distribution: North America (Coahuila in Mexico/ Arizona, New Mexico in USA).
Hosts: Presumably *Pinus* sp., *Pseudotsuga flahuatii*.
References: (**ds**) Atkinson & Equihua 1988: 90; Wood, S. L. 1982b: 104. (**tx**) McNamara 1984: 753; Wood, S. L. 1975a: 24, 1982b: 104.

***ater* (Paykull)** 1800: 153 (*Bostrichus*). Lectotype ♀; England: Surrey-Bramshill; not located, designated by Lekander 1965a: 185.
Figures: Stark 1952: 212 (adult).
Distribution: Africa (Azores Islands), Asia (Fujian, "Manchuria" [Heilongjiang?] in China/ Japan/ Korea/ Turkey/ E USSR), Australia (introduced), Europe (Austria/ Belgium/ Bulgaria/ Denmark/ England/ Finland, France/ Germany/ Greece/ Italy/ Netherlands/ Norway/ Poland/ Portugal/ Spain/ Sweden/ Switzerland/ W USSR/ Yugoslavia),

New Zealand (introduced), South America (introduced to Chile).
Hosts: *Pinus* spp., *Picea* spp., uncommon in *Abies* spp., *Taxus baccata*, *Pseudotsuga menziesii*.
Notes: (3) Stephens 1829a: 147 (*Ips boleti* Marsham, nomen nudum, *I. niger* Marsham, nomen nudum, synonymy).

***guatemalensis* (Wood)** 1967b: 89 (*Leperisinus*). Holotype ♀; Volcan Pacaya, Esquintla Prov., Guatemala; Wood Collection.
Distribution: North America (Guatemala).
Hosts: Three tree species, none resembling *Fraxinus*.
Notes: (1) Wood 1982b: 118 (to *Hylesinus*).
References: (**hb**) Wood, S. L. 1982b: 118. (**ds**) Wood, S. L. 1982b: 118. (**tx**) Wood, S. L. 1967b: 89–90, 1982b: 118.

° ***hydropicus* (Wickham)** 1916: 18 (*Apidocephalus*). Holotype, sex?; fossil in Miocene at Florissant, Colorado [USA]; not located.
Distribution: North America (fossil in Colorado Miocene in USA).
References: (**tx**) Wickham 1916: 18; Wood, S. L. 1992b: 80.

***irresolutus* Walker** 1859: 261. Holotype, sex?; Ceylon; BMNH, London, lost.
Distribution: Asia (Sri Lanka).
Notes: (1) Holotype lost, Blandford notes in BMNH, London, state that it was probably not a Scolytidae, but he did not indicate the correct family.
References: (**tx**) Gemminger & Harold 1872: 2674; Walker 1859: 261.

***laticollis* Blandford** 1894c: 65. Syntypes 3, sex?; Sapporo, Japan; BMNH, London.
Figures: Stark 1952: 164, 167 (adult), 165, 167 (galleries), Tsai & Li 1959: 80.
Distribution: Asia (Heilongjiang in China/ Japan/ Siberia, Ussuri in E USSR).
Hosts: *Fraxinus mandshurica japonica, F.*

lanuginosa serrata, F. rhynchophylla, F. spaethiana, Juglans sieboldiana.

fraxinoides Schedl 1959k: 39 (*Leperisinus*). Holotype?, ♀?; Kashmir, Putshai, Lolab, India, lost?. Synonymy: Wood 1985: 268.

Notes: (3) Schedl 1959k: 39 cites a holotype that was never returned to the Forest Research Institute, nor is it in his collection; all specimens sent to him are accounted for; his female paratype appears to be the missing holotype.

References: (**ds**) Beeson 1922: 496, 1941 (1961: 287); Kleine 1934a: 129. (**tx**) Schedl 1959j: 172, 1959k: 39; Wood, S. L. 1985: 268.

alternans Schedl 1959j: 172. Holotype ♂; Rawalpindi, Punjab, India; Schedl Collection in NHMW, Wien. Synonymy: Wood 1985: 268.

References: (**tx**) Schedl 1959j: 172, 1979c: 17; Wood, S. L. 1985: 268.

***mandshuricus* Eggers** 1922c: 15. Lectotype, sex?; Mandschurei an Esche; USNM, Washington, designated by Anderson & Anderson 1971: 19.

Distribution: Asia (Manchuria [Heilongjiang?] in China/ E USSR).

Hosts: *Fraxinus* sp.

References: (**hb**) Stark 1952: 173. (**ds**) Kleine 1934a: 129; Murayama 1939: 137, 1942a: 54; Schedl 1934f: 1634; Stark 1952: 173. (**tx**) Anderson, W. H. & Anderson 1971: 19; Eggers 1922c: 15; Murayama 1939: 137; Schedl 1934f: 1634, 1979c: 148; Stark 1952: 173.

***mexicanus* (Wood)** 1956c: 249 (*Leperisinus*). Holotype ♂; Tecamachalco, Puebla, Mexico; SMUK, Lawrence.

Distribution: North America (Aguascalientes, Durango, Puebla in Mexico/ SW Texas in USA).

Hosts: Oleaceae (*Fraxinus anomala* or similar).

References: (**hb**) Wood, S. L. 1956c: 249, 1982b: 115. (**ds**) Wood, S. L. 1956c: 249, 1982b: 115. (**tx**) Wood, S. L. 1956c: 249, 1982b: 115.

***nanulus* Schedl** 1940c: 433. Holotype, sex?; Kokoda, 1200 ft., Papua, New Guinea; BMNH, London.

Distribution: New Guinea.

References: (**tx**) Schedl 1940c: 433–436, 1946c: 96, 1979c: 163.

***nilgirinus* Eggers** 1923a: 133. Holotype, sex?; Nilgiri Hills, Ostindien; Hamburg Museum, lost.
Distribution: Asia (Kerala in India/ Sri Lanka), New Guinea, Philippine Islands.
Hosts: *Drypetes sepiaria, Flindersia* sp.
References: (**tx**) Eggers 1923a: 133, 1927c: 70; Schedl 1959j: 172.

persimilis Eggers 1927c: 70. Lectotype ♂; Philippinen: Mindoro, Provinz Mindoro, Calapan; USNM, Washington, designated by Anderson & Anderson 1971: 24. Synonymy: Schedl 1959i: 172.
References: (**tx**) Anderson, W. H. & Anderson 1971: 24; Eggers 1927c: 70; Schedl 1959i: 172, 1979c: 191.

robustus Schedl 1975e: 453 (*Trogloditica*). Holotype ♀; India: Madras, Nilgiri, 7 km a l'est de Coonoor, 1350 m; MHNG, Geneve. Synonymy: Wood 1985: 268.
References: (**tx**) Schedl 1975e: 453; Wood, S. L. 1985: 268.

***nobilis* Blandford** 1894c: 64. Holotype, sex?; Sapporo, Japan; BMNH, London.
Distribution: Asia (Japan/ E USSR).
Hosts: *Fraxinus mandshurica*.
References: (**cn**) Kurenzov 1951c: 78. (**ec**) Kurenzov 1951d: 24. (**hb**) Kurenzov 1948b: 126, 1951d: 24; Stark 1952: 162. pellitus (Schedl) 1955b: 288 (*Hylesinus*). Holotype ♀; Opulo, Samoa; Schedl Collection in NHMW, Wien. Synonymy: Beaver 1991: 91.
References: (**tx**) Beaver 1976b: 533, 1991: 91; Schedl 1955b: 288, 1979c: 187.

***pertinax* (Schedl)** 1975g: 217 (*Hylesinus*). Holotype ♀?; W New Guinea, Vogelkop; Schedl Collection in NHMW, Wien.
Distribution: New Guinea.
References: (**tx**) Schedl 1975g: 217, 1979c: 191.

***philippinensis* (Eggers)** 1923a: 137 (*Hylesinus*). Lectotype ♂; Los Banos auf Luzon (Philippine Islands); USNM, Washington, designated by Anderson & Anderson 1971: 24.
Distribution: Asia (Tonkin Island in Vietnam), New Guinea, Philippine Islands (Luzon), Samoan Islands.
Hosts: *Ficus* spp.

References: (**hb**) Beeson 1929: 221; Kalshoven 1956: 162. (**ds**) Beeson 1929: 221, 1938b: 288; Eggers 1926a: 299; Kleine 1934a: 129; Schedl 1979c: 192. (**tx**) Anderson, W. H. & Anderson 1971: 24; Beeson 1929: 221; Eggers 1923a: 137–138, 1926a: 299, 1927b: 406, 1930c: 10, 1939c: 114; Nunberg 1956d: 211; Schedl 1942a: 169, 1942c: 163, 1951k: 131, 142, 1954a: 138.

***robustus* (Eggers)** 1939d: 223 (*Hylesinus*). Holotype ♀; Fiji Ins. (Taveuni); BMNH, London.
Distribution: Australia (Queensland), Fiji Islands.
Notes: (3) Schedl 1950f: 42 (described male).
References: (**ds**) Browne 1974a: 64; Schedl 1962i: 75. (**tx**) Eggers 1939d: 223; Schedl 1950f: 36, 42, 1955b: 278, 284, 1979c: 212.

***sulcinodis* (Schedl)** 1974d: 458 (*Hylesinus*). Holotype, sex?; Panganda Logging Area, Watut Valley, Morobe Distr., New Guinea; CSIRO, Canberra.
Distribution: New Guinea.
References: (**tx**) Schedl 1974d: 458, 1979c: 246.

***varians* Lea** 1910: 147. Syntypes, sex?; Australia: N. S. Wales, Gosford: Sydney; presumably NMV, Melbourne.
Distribution: Australia (Queensland, New South Wales).
Hosts: *Ficus aspersa, F. europea, F. stenocarpa, Melicope neuroccoca, Morus alba, Pseudomorus brunoniana*, etc.
References: (**bv**) Gray, B. 1974c. (**hb**) Gray, B. 1974c; Hintze-Podufal & Druschke 1988. (**ds**) Schedl 1936g: 521, 1962i: 73, 1964f, 1965g: 25, 1971d: 428, 1971f: 147, 1972a: 143. ***wallacei* (Blandford)** 1896b: 197 (*Hylesinus*). Holotype ♂; Mysol (Malay Archipelago); BMNH, London.
Distribution: Asia (Singapore), Indonesia (Mysol Island), New Guinea.
Hosts: *Ficus* sp., *Dracontomelum mangiferum*.
References: (**ds**) Hagedorn 1910d: 19; Kleine 1912b: 17; Schedl 1936g: 521, 1979f: 103. (**tx**) Blandford 1896b: 197; Hagedorn 1910a: 49; Schedl 1979c: 269.

Genus *Hylesinopsis* Eggers

HYLESINOPSIS EGGERS 1920: 40. Type-species: *Hylesinopsis dubius* Eggers, monobasic.

Pseudohylesinus Eggers 1919: 234. Type-species: *Pseudohylesinus togonus* Eggers, monobasic, preoccupied by Swaine 1917: 11.
References: (**tx**) Eggers 1919: 234, 1922b: 165.

Metahylesinus Eggers 1922b: 165. Type-species: *Pseudohylesinus togonus* Eggers, automatic, replacement name for *Pseudohylesinus* Eggers 1919: 234. Synonymy: Wood 1984b: 225.
References: (**tx**) Eggers 1919: 234, 1922b: 165; Schedl 1950d: 2, 1951g: 1104, 1957d: 9, 188, 1957e: 865–883, 1958d: 188, 1959n: 75–83, 1960g: 75; Wood, S. L. 1984b: 225.

Pseudophloeotribus Eggers 1933e: 18. Type-species: *Pseudophloeotribus africanus* Eggers, monobasic. Synonymy: Schedl 1957d: 9, Wood 1984b: 225.
References: (**tx**) Eggers 1933e: 18; Schedl 1951g: 1104, 1957d: 9, 1960g: 75; Wood, S. L. 1984b: 225.

Trypographus Schedl 1950e: 213. Type-species: *Trypographus joveri* Schedl, monobasic. Synonymy: Wood 1983a: 648.
References: (**tx**) Schedl 1950e: 213, 1957e: 865–883, 1959n: 123–124; Wood, S. L. 1983a: 648.

Chilodendron Schedl 1953d: 74. Type-species: *Chilodendron planicolle* Schedl, monobasic. Synonymy: Wood 1983a: 648.
References: (**tx**) Schedl 1953d: 74; Wood, S. L. 1983a: 648.

Glochicopterus Schedl 1954e: 75. Type-species: *Glochicopterus baphiae* Schedl, monobasic. Synonymy: Wood 1983a: 648, 1984b: 225.
References: (**tx**) Schedl 1954e: 75, 1959n: 403–404, 1961k: 403; Wood, S. L. 1983a: 648, 1984b: 225.

Hapalophloeus Schedl 1965e: 363. Type-species: *Metahylesinus brinckei* Schedl, original designation. Synonymy: Wood 1984b: 225.
References: (**tx**) Schedl 1965e: 363; Wood, S. L. 1984b: 225.

Hemihylesinus Schedl 1967e: 224. Type-species: *Hemihylesinus endroedyi* Schedl, monobasic. Synonymy: Wood 1984b: 226.
References: (**tx**) Schedl 1967e: 224; Wood, S. L. 1984b: 226.

Aridiamerus Schedl 1982: 284. Type-species: *Aridiamerus angolensis* Schedl, monobasic. Synonymy: Wood 1988b: 188.
References: (**tx**) Schedl 1982: 284; Wood, S. L. 1988b: 188.

Keys: Lepesme 1942a: 203.
References: (**ay**) Nobuchi 1969a: 53. (**tx**) Eggers 1920: 40; Lepesme 1942a: 203; Schedl 1950e: 210–211, 213, 1959n: 127–130, 1960g: 127; Wood, S. L. 1986a: 39, 1988b: 188–189.

***acacicolens* Wood** 1987: 547. Holotype, sex?; Kenya: Riff Valley; NHMW, Wien, automatic.
Distribution: Africa (Kenya/ Zaire).
Hosts: *Acacia* sp.
References: (**tx**) Wood, S. L. 1987: 547.

africanus Schedl 1963h: 259 (*Alniphagus*). Holotype, ♂; Kenya: Riff Valley; NHMW, Wien, preoccupied by Eggers 1933e: 19.
References: (**tx**) Schedl 1963h: 259, 1979c: 14; Wood, S. L. 1987: 547.

***africanus* (Eggers)** 1933e: 19 (*Pseudophloeotribus*). Holotype, sex?; N. Rhodesia: Livingstone, Zambesi R.; BMNH, London.
Distribution: Africa (Zambia/ Zimbabwe).

Notes: (1) Schedl 1957d: 9 (to *Metahylesinus*, =*Hylesinopsis*).
References: (**ds**) Beaver & Loyttyniemi 1985a: 65. (**tx**) Eggers 1933e: 19; Schedl 1957d: 9, 1960g: 76.

***alluaudi* (Lepesme)** 1942a: 207 (*Kissophagus*). Holotype, sex?; Kenya: Molo, Nau Escarpment, Afrique orientale anglaise, Station 19, 2,420 m; MNHN, Paris.
Distribution: Africa (Kenya).
Notes: (1) Schedl 1962j: 188 (to *Chilodendron*, =*Hylesinopsis*).
References: (**tx**) Lepesme 1942a: 207; Schedl 1959n: 413, 1962j: 188.

***angolanus* Wood** 1988a: 32. Holotype ♂; Angola; Schedl Collection in NHMW, Wien, automatic.
Distribution: Africa (Angola).
References: (**tx**) Schedl 1982: 284; Wood, S. L. 1988a: 32, 1988b: 188.

angolensis Schedl 1982: 284 (*Aridiamerus*). Holotype ♂; Angola; Schedl Collection in NHMW, Wien, preoccupied by Schedl 1959p: 24.
Notes: (1) Wood 1988b: 188 (to *Hylesinopsis*).
References: (**ds**) Ferreira 1965: 1111. (**tx**) Schedl 1959p: 24, 1982: 284; Wood, S. L. 1988b: 188.

***angolensis* Schedl** 1959p: 24. Holotype, sex?; Riv. Tchimboma, affl. dr. Cuango-Muque pres des sources de celui-ci, litiere, Alto Chicapa, Angola; IRSNB, Brussels.
Distribution: Africa (Angola).
References: (**ds**) Schedl 1959p: 16, 24. (**tx**) Schedl 1959p: 16, 24.

***arabiae* Schedl** 1975h: 353. Holotype, sex?; Jemen, Wadi Zabid; NHMB, Budapest.
Distribution: Asia (Yemen in Arabian Peninsula).
References: (**tx**) Schedl 1975h: 353.

***atakorae* (Schedl)** 1951g: 1105 (*Rhopalopselion*). Syntypes 2, sex?; Togo, Klouto, Monts Togo, 500–800 m. Dahomey: Koussoukoingou, Atokoka, 600–700 m; A. Villiers Collection, and Schedl Collection in NHMW, Wien.
Distribution: Africa (Dahomey/ Togo).
Notes: (1) Schedl 1979c: 29 (citation of holotype invalid).
References: (**tx**) Nunberg 1956b: 200, 203; Schedl 1951g: 1103, 1105–1106, 1957d: 9, 1960g: 77, 1979c: 29.

***ater* (Nunberg)** 1967b: 315 (*Trypographus*). Holotype, sex?; Congo: Kivu, Kavimvira (Uvira); MRCB, Tervuren.
Figures: Nunberg 1967b: 335.
Distribution: Africa (Zaire).
References: (**tx**) Nunberg 1967b: 315, 335.

***baphiae* (Schedl)** 1954e: 75 (*Glochicopterus*). Syntypes, sex?; Gold Coast: Mpraeso and Sunyani; BMNH, London.
Figures: Schedl 1954e: 76 (antenna), Nunberg 1967b: 335.
Distribution: Africa (Ghana).
Hosts: *Baphia pubescens, Anthocleista nobilis*.
References: (**ds**) Browne 1973a: 279; Schedl 1961k: 404; Thompson, G. H. 1963: 45. (**tx**) Nunberg 1967b: 313, 335; Schedl 1954e: 49, 75–76, 1961k: 404, 1979c: 34.

***brincki* (Schedl)** 1957c: 323 (*Metahylesinus*). Syntypes, sex?; SW Africa: Kaokoveld, Sanitatas about 85 miles WSW Ohopoho. Koakoveld, Anabib (Orupembe) 100 miles W Ohopoho. Kaokoveld, Ohopoho. Transvaal: Kruger National Park, Letaba Camp; ZIDSU, Lund, Sweden.
Distribution: Africa (Namibia/ South Africa).
References: (**ds**) Schedl 1960g: 77, 1965e: 350, 1982: 278. (**tx**) Schedl 1957c: 323, 1960g: 77, 1963h: 262, 1965e: 350, 363.

***confusus* (Eggers)** 1935c: 300 (*Kissophagus*). Holotype, sex?; Uganda (Gura R., 7500 ft.); BMNH, London.
Figures: Schedl 1959n: 44 (adult, galleries).
Distribution: Africa (Cameroon/ Kenya/ Uganda/ Zaire).
Hosts: *Bosqueia angolensis, Ficus* cf *capensis, Rhus* sp.
References: (**hb**) Gardner 1957a: 31; Schedl 1959n: 44. (**ds**) Gardner 1957a: 31; Lepesme 1942a: 207; Mayne & Donis 1962: 304; Schedl 1961d: 177, 1965e: 350, 1972k: 295. (**tx**) Browne 1973a: 285; Eggers 1935c: 300; Lepesme 1942a: 207; Schedl 1948c: 664, 1954: 878, 1955f: 257, 1959n: 41.

***decellei* (Nunberg)** 1969a: 394 (*Trypographus*). Holotype, sex?; Ivory Coast: Bingerville; MRCB, Tervuren.
Distribution: Africa (Ivory Coast).
References: (**tx**) Nunberg 1969a: 394.

***dimorphus* (Schedl)** 1937f: 16, reprint p. 2 (*Metahylesinus*). Syntypes ♀; Kati (presumably West Africa); NHML, Luxemburg and Schedl Collection in NHMW, Wien.
Distribution: Africa (West Africa).
Notes: (1) Schedl 1979c: 81 (citation of holotype invalid).
References: (**tx**) Schedl 1937f: 16, 1960g: 77, 1979c: 81.

***dubius* Eggers** 1920: 40. Syntypes 2, sex?; Kinchana (Kongostaat); 1 in Hamburg Museum, lost, 1 in Schedl Collection in NHMW, Wien.
Figures: Schedl 1960g: 127.
Distribution: Africa (Angola/ Cameroon/ Ghana/ Liberia/ Uganda/ Zaire).
Hosts: *Bosqueia angolensis, Morus lactea, M. mesozygia, Treculia africana*.
Notes: (1) Schedl 1979c: 85 (citation of holotype invalid).
References: (**hb**) Browne 1963a: 231; Schedl 1960g: 127. (**ds**) Browne 1963a: 231; Ferreira 1965: 1111; Schedl 1959p: 16, 1960g: 127, 1965e: 351, 1966c: 223, 1972e: 279, 1972k: 295, 1977d:

277. (**tx**) Eggers 1920: 40; Schedl 1954e: 49, 1960g: 127, 1979c: 85.

***emarginatus* (Nunberg)** 1973: 6 (*Trypographus*). Holotype ♂?; Zaire: Massif Ruwenzori, P.N.A., riv. Mukandwe, affl. Talya, 1,580 m; MRCB, Tervuren.
Distribution: Africa (Zaire).
References: (**tx**) Nunberg 1973: 6.

***endroedyi* (Schedl)** 1967e: 224 (*Hemihylesinus*). Holotype, sex?; Brazzaville, Filou brook; Kindamba, Meyoi settlement (Congo); NHMB, Budapest.
Distribution: Africa (Zaire).
References: (**tx**) Schedl 1967e: 224, 1979c: 90.

***ericius* (Schaufuss)** 1897a: 217 (*Diamerus*). Holotype, sex?; Natal; Hamburg Museum, lost.
Distribution: Africa (Natal in South Africa).
References: (**tx**) Eggers 1922b: 165; Schaufuss 1897a: 217.

***fasciatus* (Hagedorn)** 1909a: 737 (*Kissophagus*). Holotype, sex?; Ostafrika, Amani; MNB, Berlin.
Distribution: Africa (Cameroon/ Nigeria/ Tanzania/ Zaire).
Hosts: *Ficus* spp., *Pygeum africanum*.
Notes: (1) Schedl 1962j: 188 (to *Chilodendron*, =*Hylesinopsis*).
References: (**hb**) Gardner 1957a: 31; Kleine 1932a: 296. (**ds**) Gardner 1957a: 31; Hagedorn 1909a: 737, 1910a: 25; Lee, R. Distribution: Africa (Ethiopia/ Zaire).
Notes: (1) Schedl 1962b: 188 (to *Chilodendron*, =*Hylesinopsis*).
References: (**ds**) Lepesme 1942a: 207. (**tx**) Anderson, W. H. & Anderson 1971: 26; Eggers 1932c: 28, 1943c: 64; Lepesme 1942a: 207; Schedl 1959n: 420, 1962b: 188.

***quadrituberculatus* (Schedl)** 1957d: 24 (*Metahylesinus*). Holotype ♂; Congo Belge, Yangambi; MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Baphia pubescens*, *B. soldheidii*.
References: (**ds**) Schedl 1960g: 80. (**tx**) Schedl 1957d: 24, 1960g: 80, 1963h: 262.

***rhodesianus* (Eggers)** 1933e: 19 (*Pseudophloeotribus*). Holotype, sex?; N Rhodesia: Mazabuka; BMNH, London.
Distribution: Africa (Zambia).
Hosts: *Lonchocarpus* sp.
Notes: (1) Schedl 1957d: 9 (to *Metahylesinus*, =*Hylesinopsis*).
References: (**ds**) Beaver & Loyttyniemi 1985a: 65. (**tx**) Eggers 1933e: 19–20; Schedl 1951g: 1105, 1957d: 9, 1960g: 81.

***saudiarabiae* (Schedl)** 1971d: 434 (*Chilodendron*). Holotype ♀; Arabie-Seoudite, Abha; MHNG, Geneve.
Distribution: Asia (Saudi Arabia).
Hosts: *Ficus* sp.
References: (**tx**) Schedl 1971d: 434, 1979c: 220.

***secutus* Wood** 1987: 547. Holotype ♀; Uganda, Mpanga; BMNH, London, automatic.
Distribution: Africa (Uganda).
References: (**tx**) Schedl 1965f: 4; Wood, S. L. 1987: 547.

africanus Schedl 1965f: 4 (*Hylesinus*). Holotype ♀; Uganda, Mpanga; BMNH, London, preoccupied by Eggers 1933a: 19.
References: (**tx**) Schedl 1965f: 4; Wood, S. L. 1987: 547.

***senegambiensis* (Schedl)** 1941d: 382 (*Hapalogenius*). Holotype, sex?; Senegambien; Schedl Collection in NHMW, Wien.
Distribution: Africa (Senegal).
References: (**tx**) Schedl 1941d: 382, 1960g: 81.

***seriatus* (Eggers)** 1940c: 228 (*Pseudophloeotribus*). Holotype, sex?; Congostaat: Rutshuru; MRCB, Tervuren.
Distribution: Africa (Kenya/ Zaire).
Hosts: *Albizzia gummifera*, *A.* sp., *Cinchona ledgeriana*.
Notes: (1) Schedl 1957d: 9 (to *Metahylesinus*, =*Hylesinopsis*).
References: (**tx**) Eggers 1940c: 228; Schedl 1957d: 9.

cinchonae Schedl 1952j: 8 (*Hapalogenius*). Holotype, sex?; Congo Belge, Kivu: Mulunga; MRCB, Tervuren. Synonymy: Wood 1992b:(in press).
References: (**ds**) Gardner 1957a: 31. (**tx**) Eggers 1940c: 228–229; Schedl 1952j: 8, 1957d: 18, 1961k: 401; Wood, S. L. 1992b:(in press).

***squamosus* (Eggers)** 1936b: 28 (*Pseudophloeotribus*). Holotype, sex?; Abyssinia: Mulu, above Muger Valley, circa 8,000 ft.; BMNH, London.
Distribution: Africa (Ethiopia).
Notes: (1) Schedl 1957d: 9 (to *Metahylesinus*, =*Hylesinopsis*).
References: (**tx**) Eggers 1936b: 28–29; Schedl 1957d: 9, 1960g: 82.

***striatus* (Schedl)** 1957e: 865 (*Metahylesinus*). Holotype, sex?; Tanganyika, Arusha; BMNH, London.
Distribution: Africa (Tanzania).
Hosts: *Acacia* sp.
References: (**ds**) Browne 1970: 539; Gardner 1957a: 31. (**tx**) Schedl 1957e: 865, 1960g: 82.

***sulcatus* (Eggers)** 1944b: 93 (*Metahylesinus*). Holotype, sex?; Belgisch-Congo: Libenge; MRCB, Tervuren.
Distribution: Africa (Zaire).
Notes: (3) Nunberg 1969a: 396 (described female).
References: (**ds**) Beaver & Loyttyniemi 1989. (**tx**) Beaver & Loyttyniemi 1989; Eggers 1944b: 93; Nunberg 1969a: 396; Schedl 1960g: 82.

***togonus* (Eggers)** 1919: 234 (*Pseudohylesinus*). Syntypes 2 ♂, 1 ♀; Misahohe and Bismarckburg in Togo; MNB, Berlin and Eggers Collection (USNM, Washington or NHMW, Wien?).
Figures: Schedl 1960g: 76.
Distribution: Africa (French Guinea/ Ghana/ Nigeria/ Senegal/ Sudan/ Togo).

References: (**ds**) Schedl 1960g: 82, 1961d: 177, 1962h: 57, 1962k: 1063, 1965e: 350, 1965g: 19, 1966a: 275, 1968b: 144, 1971e: 1, 1972e: 279, 1975h: 350, 1975k: 276, 1977d: 277. L. 1986a: 39.

***acaciae* (Schedl)** 1957d: 18 (*Hapalogenius*). Holotype ♀; Congo Belge: Kivu, Hembe Bitale; MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Acacia pennata*.
References: (**hb**) Schedl 1961k: 393. (**ds**) Schedl 1961k: 393. (**tx**) Schedl 1957d: 18, 25, 1961k: 393, 395, 1979c: 9.

***atrum* Eggers** 1935c: 295. Holotype, sex?; Congostaate. (Equateur: Flandria); MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Cola diversifolia*.
References: (**hb**) Ghesquire 1933a: 30–36; Mayne & Donis 1951: 333. (**ds**) Ghesquire 1933a: 30–36, 1933b: 780; Kleine 1934a: 125; Nunberg 1961a: 328. (**tx**) Eggers 1935c: 285, 295; Nunberg 1956b: 200, 203; Schedl 1960g: 116, 1962k: 1064.

***bimaculatus* (Eggers)** 1933e: 22 (*Hapalogenius*). Holotype, sex?; Natal: (Weenen); BMNH, London.
Distribution: Africa (Natal in South Africa).
References: (**ds**) Schedl 1961k: 393. (**tx**) Eggers 1933e: 22–23; Schedl 1957c: 323, 1961k: 393.

***bituberculatum* Hagedorn** 1909a: 740. Holotype, sex?; Kamerun; MNB, Berlin.
Distribution: Africa (Cameroon).
References: (**ds**) Hagedorn 1910d: 6; Kleine 1912b: 161, 1914b: 309. (**tx**) Eggers 1935c: 296; Hagedorn 1909a: 740, 1910a: 33; Hopkins 1914: 129; Lucas 1920: 572; Nunberg 1956b: 203; Schedl 1957d: 27, 1960g: 116.

***confusum* Eggers** 1944b: 93. Holotype, sex?; Belgisch-Congo, Mayumbe; MRCB, Tervuren.
Distribution: Africa (Ghana/ Zaire).
Hosts: *Bosqueia angolensis, Baphia* sp.
References: (**cn**) Thompson, G. H. 1960. (**ds**) Schedl 1960g: 117; Thompson, G. H. 1960, 1963: 6. (**tx**) Eggers 1944b: 93; Nunberg 1956b: 200, 203; Schedl 1954e: 49, 1960g: 117.

***congonum* (Schedl)** 1950c: 206 (*Hapalogenius*). Syntypes, sex?; Congo Belge, Mulungu, Kivu; IRSNB, Brussels, and Schedl Collection in NHMW, Wien, restricted by Schedl 1979c: 63 to IRSNB specimens.
Figures: Schedl 1961k: 394.
Distribution: Africa (Zaire).
Hosts: *Albizzia grandibracteata, Berkheya spekeana, Cinchona ledgeriana, Kigelia lanceolata, Milletia hylobia, Pycnostachya coerulea, Syzyguum* cf *guineensis*.
References: (**ec**) Mayne & Donis 1951: 331; Schedl 1958d: 190–191. (**hb**) Schedl 1950c: 206, 1952j: 1, 1961k: 394–396. (**ds**) Mayne & Donis 1962: 306; Schedl 1952j: 1, 1957c: 206, 1957e: 866, 1961k: 394. (**tx**) Schedl 1950c: 206, 1961k: 394, 1979c: 63.

***conjungens* Schedl** 1965f: 5. Holotype, sex?; Kenya, Kakamege; BMNH, London.
Distribution: Africa (Kenya).
Hosts: *Craibia elliotti, Celtis zenkeri*.
References: (**tx**) Schedl 1965f: 5.

***dentatum* Nunberg** 1956b: 200. Holotype, sex?; Belgian Congo; IZW, Warsaw.
Distribution: Africa (Zaire).
References: (**tx**) Nunberg 1956b: 200.

***grande* Schedl** 1957d: 25. Holotype ♂; Congo Belge: Yangambi; MRCB, Tervuren.
Figures: Schedl 1960g: 115.
Distribution: Africa (Zaire).
Hosts: *Baphia pubescens, B. soldheidii*.
References: (**ec**) Schedl 1958d: 185, 194. (**hb**) Schedl 1958d: 185, 1960g: 117–118. (**ds**) Schedl 1960g: 117. (**tx**) Schedl 1957d: 25, 1960g: 115, 117.

***immaturus* (Schedl)** 1957e: 867 (*Hapalogenius*). Holotype, sex?; Uganda, Bodongo; BMNH, London.
Distribution: Africa (Kenya/ Tanzania/ Uganda).
Hosts: *Khaya anthotheca, Dombeya mastersi, Rauvolfia inebrians*.
References: (**ds**) Gardner 1957a: 31; Schedl

1961k: 398. (**tx**) Schedl 1957e: 867, 1961k: 398, 1979c: 121.

***immune* Eggers** 1943e: 71. Holotype, sex?; Mozambique (Haut Sangadze, Canxixe); "typen in Paris Museum"; however, it is in the Schedl Collection in NHMW, Wien (apparently taken on loan by Schedl 1979c: 122 after Eggers' death before Eggers returned it to MNHN, Paris).
Distribution: Africa (Mozambique/ Zaire).
References: (**ds**) Nunberg 1952: 19, 1965b: 19. (**tx**) Eggers 1943e: 71, 1944b: 93; Nunberg 1952: 19, 1956b: 200, 1965b: 19; Schedl 1954e: 74, 1960g: 119, 1979c: 122.

***intermedium* Schedl** 1957d: 26. Holotype ♂; Congo Belge: Yangambi; MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Baphia pubescens, B. soldheidii*.
References: (**hb**) Schedl 1958d: 185, 188, 1960g: 119–120. (**ds**) Schedl 1960g: 119–120. (**tx**) Schedl 1957d: 26, 1960g: 119–120.

***lesnei* (Eggers)** 1943e: 73 (*Hapalogenius*). Syntypes, sex?; Portugiesisch Ostafrika (Zambeze), Nova Choupanga 1928; Chemba 1928; Mozambique: Haut Sagadze, Chanxixe 1928); MNHN, Paris.
Distribution: Africa (Mozambique).
References: (**ds**) Schedl 1961k: 399. (**tx**) Eggers 1943e: 73; Schedl 1957e: 866, 1961k: 399, 1979c: 138.

***lonchocarpae* (Schedl)** 1959q: 707 (*Hapalogenius*). Holotype ♀?; Kenya, Coast; BMNH, London.
Distribution: Africa (Kenya).
Hosts: *Lonchocarpus* sp. pods.
References: (**ds**) Schedl 1959q: 705, 1961k: 399. (**tx**) Schedl 1959q: 707, 1961k: 399, 1979c: 140.

***maculatum* (Schedl)** 1957d: 19 (*Hapalogenius*). Holotype ♂; Congo Belge, Kivu, Rutschuru; MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Acacia sieberiana*.
References: (**hb**) Schedl 1961k: 400. (**ds**) Schedl 1961k: 400. (**tx**) Schedl 1957d: 19, 1961k: 400, 1979c: 143.

***nitidum* Schedl** 1957d: 27. Holotype ♂; Congo Belge: Yangambi; MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Baphia pubescens, B. soldheidii*.
References: (**ds**) Schedl 1960g: 122. (**tx**) Schedl 1957b: 153, 1957d: 27, 1960g: 122.

***occidentalis* (Schedl)** 1967e: 225 (*Hapalogenius*). Holotype ♂; Brazzaville, Orstom Park, Congo; NHMB, Budapest.
Distribution: Africa (Zaire).
References: (**tx**) Schedl 1967e: 225, 1979c: 178.

***orientale* Schedl** 1957b: 153. Syntypes, sex?; Tanganyika, Arusha; BMNH, London, restricted by Schedl 1979c: 180 to BMNH, London specimens.
Distribution: Africa (Tanzania).
References: (**hb**) Schedl 1960g: 122. (**ds**) Gardner 1957a: 32. (**tx**) Schedl 1957b: 150, 153, 1960g: 122, 1965f: 5, 1979c: 180.

***primus* (Schedl)** 1971e: 6. (*Hapalogenius*). Holotype, sex?; Angola, Tscha-Muchito; Schedl Collection in NHMW, Wien.
Distribution: Africa (Angola).
References: (**tx**) Schedl 1971e: 6–7, 1979c: 199.

***pusillus* (Gerstacker)** 1855: 639 (*Hylesinus*). Holotype, sex?; Mozambique; MNB, Berlin.
Distribution: Africa (Mozambique).
Notes: (1) Eggers 1927a: 196 (to *Hapalogenius, =Rhopalopselion*).
References: (**ds**) Hagedorn 1910d: 17; Kleine 1912b: 171, 1914b: 321; Lacordaire 1866: 36; Schedl 1961k: 400. Tribe Tomicini Thomson

Tomicidae (Based on the erroneous concept that *Tomicus* = *Ips*)
Notes: Through an unfortunate error in identification, Latreille associated the genus *Ips* with the name *Dermestes piniperda* Linnaeus and this error was perpetuated for more than a century. However, he clearly designated *piniperda* Linnaeus as the type-species of his genus *Tomicus*. When a family-group name is based on *Tomicus*, that name is automatically linked to the type-species of *Tomicus* even though the author of the family-group name had made an error in identification.
References: Thomson 1859: 145, 1865: 345.

Tomicides (Based on *Tomicus* = *Ips*)

Distribution: Asia (Yunnan in China).
References: (**tx**) Wood, S. L. & Huang 1986: 467.

***tibetensis* Wood & Huang** 1986: 466. Holotype ♀; Zayu, Xizang [Tibet]; IZAS, Beijing.
Distribution: Asia (Xizang [Tibet] in China).
References: (**tx**) Wood, S. L. & Huang 1986: 466.

***tiliae* (Niisima)** 1909: 2 (*Kissophagus*). Syntypes, sex?; Sapporo, Japan; Nobuchi Collection, Ibaraki.
Distribution: Asia (Japan).
Hosts: *Tilia cordata* var. *japonica*.
Notes: (1) Wood & Huang 1986: 465 (to *Pseudoxylechinus*).
References: (**ds**) Nobuchi 1985b: 7. (**tx**) Murayama 1957c: 931, 1958: 932; Niisima 1909: 2, 1910a: 2; Schedl 1934f: 1635, 1954b: 198; Wood, S. L. & Huang 1986: 465.

***uniformis* Wood & Huang** 1986: 465. Holotype ♂; Nanjiang, Sichuan, China; IZAS, Beijing.
Distribution: Asia (Sichuan in China).
References: (**tx**) Wood, S. L. & Huang 1986: 465.

***variegatus* Wood & Huang** 1986: 466. Holotype ♂; Jiangxian, Shanxi, China; IZAS, Beijing.
Distribution: Asia (Shanxi in China).
Hosts: *Elaeagnus* sp.
References: (**tx**) Wood, S. L. & Huang 1986: 466.

Genus *Xylechinus* Chapuis

XYLECHINUS CHAPUIS 1869: 36. Type-species: *Hylesinus* (*Dendroctonus*) *pilosus* Ratzeburg, mononbasic.

Pruniphagus Murayama 1958: 930. Type-species: *Pruniphagus gummensis* Murayama, original designation. Synonymy: Wood 1986a: 42.
References: (**tx**) Murayama 1958: 930; Wood, S. L. 1986a: 42.

Squamasinus Nunberg 1964b: 431. Type-species: *Squamasinus chiliensis* Nunberg, original designation. Synonymy: Wood 1980c: 96.
References: (**tx**) Nunberg 1964b: 431; Wood, S. L. 1980c: 96.

Xylechinops Browne 1973a: 283. Type-species:

Xylechinus australis Schedl, original designation. Synonymy: Wood 1986a: 42.
References: (**tx**) Browne 1973a: 283; Wood, S. L. 1986a: 42.
Keys: Blandford 1987a: 157, Wood 1982b: 143 for North America.

L. 1961: 43, 1982b: 143, 1986a: 42; Yin, Huang, & Li 1984: 63.

***africanus* Browne** 1973a: 285. Holotype, sex?; Cameroun: Maroua; MRCB, Tervuren.
Figures: Browne 1973a: 284.
Distribution: Africa (Cameroons).
Notes: (3) This species is probably a *Hylesinopsis* (not seen).
References: (**tx**) Browne 1973a: 284–285.

***americanus* Blackman** 1922c: 117. Holotype ♂; Orono, Maine [USA]; USNM, Washington.
Figures: Blackman 1922c:figs. 15–16 (adult).
Distribution: North America (Ontario, Quebec in Canada/ Maine, New York in USA).
Hosts: *Picea glauca, P. rubens*.
References: (**ay**) Chararas 1956c. (**cn**) Blackman 1950; Hopkins 1904a: 26. (**hb**) Blackman 1950; Bright 1976d: 65; Chamberlin 1939: 184; Chararas 1956c; Hopkins 1904a: 26; Wood, S. ***arisanus* Eggers** 1939c: 114. Holotype, sex?; Formosa (Mt. Arisan); M. Chujo Collection at Taihoku Universitat, Taiwan.
Distribution: Asia (Taiwan).
References: (**ds**) Nobuchi 1967: 19. (**tx**) Eggers 1939c: 114–115.

***australis* Schedl** 1957d: 31. Holotype, sex?; Afrique du Sud: Colonie du Cap, Steynsburg; MNHN, Paris.
Figures: Browne 1973a: 284, Schedl 1959n: 422 (adult, antenna).
Distribution: Africa (Malawi/ South Africa).
Hosts: *Cussonia spicata*.
References: (**ds**) Browne 1973a: 283; Schedl 1982: 278. (**tx**) Browne 1957d: 31, 1973a: 283–284; Powell, W. 1980: 29; Schedl 1957d: 31, 1959n: 422; Wood, S. L. 1986a: 42.

***avarus* Wood** 1969b: 1. Holotype ♀; Volcan Irazu, Cartago, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Oreopanax nubigenus*.
References: (**hb**) Wood, S. L. 1982b: 145. (**ds**) Wood, S. L. 1982b: 145. (**tx**) Wood, S. L. 1969b: 1, 1982b: 145.

***bergeri* Spessivtsev** 1919: 249. Syntypes, sex?; E. Siberia, Vladivostok; not located.
Figures: Stark 1952: 178 (adult).
Distribution: Asia (Heilongjiang in China/ Siberia in E USSR).
Hosts: *Phellodendron amurense*.
References: (**ay**) Chararas 1956c. (**cn**) Kurenzov 1935c: 189. (**ec**) Kurenzov 1934a: 51. (**hb**) Chararas 1956c; Kurenzov 1935a: 19, 27, 1948b: 125; Stark 1952: 178. ***capensis* (Schedl)** 1971e: 6 (*Dacryophthorus*). Holotype ♀?; Sudafrika, Cape Prov.; Schedl Collection at NHMW, Wien.
Distribution: Africa (South Africa).
References: (**tx**) Schedl 1971e: 6, 1979c: 51.

***chiliensis* (Nunberg)** 1964b: 432 (*Squamosinulus*). Holotype, sex?; Chili; NHMB, Budapest.
Figures: Nunberg 1964b: 431 (adult, antenna).
Distribution: South America (Chile).
References: (**ds**) Schedl 1972d: 139. (**tx**) Nunberg 1964b: 431, 432; Schedl 1972d: 139.

***darjeelingensis* Schedl** 1971c: 371. Holotype ♀?; India: Darjeeling; Schedl Collection at NHMW, Wien.
Distribution: Asia (Bengal in India).
Hosts: *Quercus lamellosa*.
References: (**tx**) Schedl 1971c: 371.

***freiburgi* Schedl** 1972g: 57. Holotype ♂; Brasilien, N. Freiburg; Schedl Collection at NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1972g: 57.

***fuliginosus* Blandford** 1897a: 158. Holotype ♀; Volcan de Chiriqui, Panama; BMNH, London.
Distribution: North America (Costa Rica/ Panama).

Hosts: *Oreopanax xalapensis*.
References: (**hb**) Wood, S. L. 1982b: 148. (**ds**) Blackwelder 1947; Hagedorn 1910d: 25; Kleine 1912b: 182, 1914b: 358; Wood, S. L. 1982b: 148. (**tx**) Blandford 1897a: 158; Hagedorn 1910a: 64; Wood, S. L. 1982b: 148.

***gummensis* (Murayama)** 1958: 931 (*Pruniphagus*). Holotype ♂; Mt. Manza, Gumma Pref., Japan; Murayama Collection at USNM, Washington.
Distribution: Asia (Japan).
Hosts: *Prunus grayana*.
References: (**ds**) Nobuchi 1985b: 7. (**tx**) Murayama 1958: 931.

***imperialis* (Schedl)** 1958f: 39 (*Pseudochramesus*). Syntypes ♂; Argentinien: Buenos Aires: Tigre; Schedl Collection at NHMW, Wien, and Viana Collection.
Distribution: South America (Argentina).
Notes: (1) Schedl 1979c: 122 (citation of holotype invalid).
References: (**hb**) Viana 1964: 127. (**ds**) Viana 1964: 127. (**tx**) Schedl 1958f: 39, 1966f: 102, 1979c: 122.

calvus Schedl 1979e: 60. Holotype ♂; Buenos Aires, Pilar Island [Argentina]; Schedl Collection in NHMW, Wien. Synonymy: Wood 1988b: 190.
References: (**tx**) Schedl 1979e: 60; Wood, S. L. 1988b: 190.

***irrasus* Blandford** 1897a: 157. Lectotype ♂; Volcan de Agua, 8500–10,500 ft., Guatemala; BMNH, London, designated by Wood 1982b: 147.
Figures: Blandford 1896e:pl. 6, figs. 17–18.
Distribution: North America (Guatemala).
References: (**ds**) Blackwelder 1947; Hagedorn 1910d: 25; Kleine 1912b: 182, 1914b: 358; Wood, S. L. 1982b: 147. (**tx**) Blandford 1897a: 157; Wood, S. L. 1982b: 147.

***maculatus* Schedl** 1951d: 18. Syntypes ♀; Chile, Quillota; Mus. Nac. Hist. Nat., Santiago, and Schedl Collection at NHMW, Wien.
Distribution: South America (Chile).
Hosts: *Nothofagus pumilio*.
Notes: (1) Schedl 1979c: 144 (citation of holotype invalid).
References: (**ds**) Schedl 1966f: 95, 1972d: 139. (**tx**) Schedl 1951d: 18, 1955e: 255, 1966e: 44, 1972d: 139, 1979c: 144.

***marmoratus* Blandford** 1897a: 159. Lectotype ♀; Capetillo, Guatemala; BMNH, London, designated by Wood 1982b: 149.
Distribution: North America (Guatemala/ Veracruz in Mexico).
Hosts: *Oreopanax* sp., *O. xalapensis*.
References: (**hb**) Wood, S. L. 1982b: 149. (**ds**) Blackwelder 1947; Hagedorn 1910d: 25; Kleine 1912b: 182, 1914b: 358; Wood, S. L. 1982b: 149. (**tx**) Blandford 1897a: 159; Hagedorn 1910a: 64; Wood, S. L. 1982b: 149.

***mexicanus* Wood** 1974a: 7. Holotype ♂; Yerba Buena, 32 km N Bochil, Chiapas, Mexico; CNCI, Ottawa.
Distribution: North America (Chiapas, Morelos in Mexico).
Hosts: *Oreopanax xalapensis*.
References: (**hb**) Atkinson et al. 1986: 19; Burgos & Saucedo 1983: 54. (**ds**) Atkinson et al. 1986: 19; Burgos & Saucedo 1983: 54; Wood, S. L. 1982b: 149. (**tx**) McNamara 1984: 759; Wood, S. L. 1974a: 7, 1982b: 149.

***minor* Eggers** 1928c: 84. Holotype ♂?; Brasil, Sao Paulo; Eggers Collection, in NHMW, Wien.
Distribution: South America (Brazil).
References: (**ds**) Blackwelder 1947. (**tx**) Eggers 1928c: 84–85.

***montanus* Blackman** 1940a: 123. Holotype ♀; Sula, Montana [USA]; USNM, Washington.
Figures: Bright 1976d: 195, 200, 206.
Distribution: North America (Alaska/ Alberta, British Columbia, Saskatchewan in Canada/ California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington in USA).
Hosts: *Picea engelmannii, P. glauca, P.* sp., rare in *Larix occidentalis*.
References: (**ay**) Chararas 1956c. (**bv**) Furniss, M. M. & Carolin 1977: 375. (**cn**) Doane et al. 1936. (**ec**) Furniss, R. L. & Carolin 1977: 375; Werner & Holsten 1984. L. & Carolin 1977: 375; Gast et al. 1989: 385; Werner & Holsten 1984; Wood, S. L. 1951a: 127, 1972a: 404. (**tx**) Blackman 1940a: 123–124; Bright 1976d: 76, 195, 200, 206; Chamberlin 1958: 94–95; Chararas 1956c; Wood, S. L. 1972a: 404, 1982b: 147.

***nigrosetosus* Hagedorn** 1909a: 737. Syntypes, sex?; Argentinia, Gebirge Neuquem; Hamburg Museum, lost.
Distribution: South America (Argentina).
References: (**ds**) Blackwelder 1947; Bruch 1914a; Hagedorn 1906, 1910d: 25; Kleine 1912b: 182, 1914b: 333. (**tx**) Hagedorn 1906, 1909a: 737, 1910a: 64.

***obscurus* Eggers** 1941b: 222. Holotype, sex?; Fukien (Kuatun, 2300 m); Alexander Koenig Museum, Bonn.
Distribution: Asia (Fujian in China).
References: (**tx**) Eggers 1941b: 222.

***ougeniae* Wood** 1988a: 37. Holotype ♀; Asan R., Dehra Dun; FRI, Dehra Dun.
Distribution: Asia (Uttar Pradesh in India).
Hosts: *Ougenia dalbergioides*.
References: (**tx**) Wood, S. L. 1988a: 37.

***padus* Wood** 1988a: 38. Holotype ♀: Mundali, Chakrata, Uttar Pradesh, 8500'; FRI, Dehra Dun.

Distribution: Asia (Yunnan in China/ Himachal Pradesh, Talrathach, Uttar Pradesh in India).

Hosts: *Prunus padus*.

Notes: (3) Beeson 1941(1961: 285) (cited as *Alniphagus padus*, nomen nudum).

References: (**tx**) Wood, S. L. 1988a: 38.

***pilosus* (Ratzeburg)** 1837: 178 (*Hylesinus*). Syntypes, sex?; Harze in Menge, Germany; MNB, Berlin (?).

Figures: Grune 1979: 74, Postner 1974: 413 (adult, antenna, galleries), Stark 1952: 178 (adult, galleries), Tsai & Li 1959: 80.

Distribution: Asia (Heilongjiang in China/ Sakhalin Island, Siberia in E USSR), Europe (Austria/ Belgium/ Czechoslovakia/ Denmark/ England/ Finland/ France/ Germany/ Greece/ Hungary/ Italy/ Norway/ Poland/ Romania/ Sweden/ Switzerland/ W USSR/ Yugoslavia).

Hosts: *Picea* spp., rarely *Abies* sp., *Larix* sp.

References: (**ay**) Chararas 1956a: 113–213, 1956c: 93, 100–101; Eichelbaum 1903; Escherich 1923b: 479, 571; Fuchs 1912a; Lekander 1959b: 33; Marcu 1933a: 33; Robertson 1961; Sedlaczek 1902b: 244; Wichmann 1912a: 9–10. Keys: Balachowsky 1949a: 135, Murayama 1963b: 35, Schedl 1946b: 52.

Notes: (3) The name *Tomicus* was properly validated (Latrielle 1802/3: 203), but an unfortunate error in identification by Latrielle caused *piniperda* to be associated with the generic name *Ips* until the error was discovered in the late 19th century. Misuse of the name persisted until corrected by Wood 1961e and ICZN 1963b (China 1963a).

***punctatus* LeConte** 1868: 173. Holotype ♀; northern New York [USA]; MCZ, Cambridge.

Figures: Wood 1963: 9.

Distribution: North America (Alaska/ Alberta, British Columbia, New Brunswick, Newfoundland, Northwest Territories, Ontario, Quebec, Yukon in Canada/ N Idaho, Montana, New York, Pennsylvania, West Virginia in USA).

Hosts: *Picea glauca, P. rubens, P. sitchensis*.

Notes: (3) This is a biologically and anatomically distinct geographical replacement of *micans*.

***clusiae* Wood** 1969b: 1. Holotype ♀; Zamorano, Morazan, Honduras; Wood Collection.
Distribution: Central America (Honduras).
Hosts: *Clusia flava*.
References: (**ds**) Wood, S. L. 1982b: 207. (**tx**) Wood, S. L. 1969b: 1, 1982b: 207.

***costata* (Schedl)** 1941d: 383 (*Bothryperus*). Holotype, sex?; Kamerun; Schedl Collection in NHMW, Wien.
Figures: Schedl 1941d: 384.
Distribution: Africa (Cameroon).
References: (**ds**) Schedl 1961k: 342. (**tx**) Schedl 1941d: 382–384, 1961k: 342, 1979c: 67.

***crebra* Wood** 1971: 2. Holotype ♀; 8 km S Colonia (near Buenaventura), Valle de Cauca, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Rheedia madruno*.
References: (**tx**) Wood, S. L. 1971: 2.

***frustrata* Wood** 1971: 3. Holotype ♀; 8 km S Colonia (near Buenaventura), Valle de Cauca, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Rheedia madruno*.
References: (**tx**) Wood, S. L. 1971: 3.

***fuscovillosa* (Schedl)** 1957d: 29 (*Bothryperus*). Holotype, sex?; Congo Belge: Yangambi; MRCB, Tervuren.
Figures: Schedl 1961k: 345 (galleries).
Distribution: Africa (Zaire).
Hosts: *Allanblackia floribunda, Barteria nigritiana, Cleistanthus polystachyus, Harungana madagascariensis*.
References: (**hb**) Schedl 1961k: 342–345. (**ds**) Mayne & Donis 1962: 302; Schedl 1961k: 342–345. (**tx**) Schedl 1957d: 29, 1961k: 342–345, 1979c: 102.

***garciniae* (Schedl)** 1957d: 30 (*Bothryperus*). Holotype, sex?; Congo Belge: Yangambi; MRCB, Tervuren.
Figures: Schedl 1961k: 345 (galleries).
Distribution: Africa (Zaire).
Hosts: *Conopharyngia durissima, Garcinia punctata*.
References: (**ec**) Schedl 1958d: 190–192. (**hb**) Schedl 1961k: 346. (**ds**) Schedl 1961k: 344. (**tx**) Schedl 1957d: 30, 1961k: 344–346, 1979c: 102.

***magna* Blackman** 1943c: 392. Holotype ♀; Bolivia; USNM, Washington.
Figures: Blackman 1943c:pl. 17, figs. 37–40.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947. (**tx**) Blackman 1943c: 392.

***major* (Eggers)** 1940c: 229 (*Bothryperus*). Holotype, sex?; Albertville, Congostaat; MRCB, Tervuren.
Distribution: Africa (Angola/ Zaire).
Hosts: *Garcinia polyantha*.
References: (**ds**) Ferreira 1965: 1112, Schedl 1959j: 16, 1961k: 348. (**tx**) Eggers 1940c: 229; Schedl 1961k: 348.

***minor* Wood** 1956c: 248. Holotype ♂; La Ceiba, Honduras; Wood Collection.
Figures: Wood 1956c: 249 (male, female heads).
Distribution: North America (Costa Rica/ Honduras/ Oaxaca in Mexico/ Panama), South America (Brazil/ Colombia/ Venezuela).
Hosts: *Rheedia edulis, Symphonia globulifera*.
References: (**hb**) Wood, S. L. 1982b: 206. (**ds**) Atkinson & Equihua 1986a: 419; Schedl 1976a: 51; Wood, S. L. 1982b: 206. (**tx**) Wood, S. L. 1956c: 248–249, 1969b: 1, 1982b: 206.

***nigra* (Eggers)** 1933e: 21 (*Bothryperus*). Holotype, sex?; Uganda; BMNH, London.
Figures: Schedl 1961k: 347 (galleries).
Distribution: Africa (Uganda/ Zaire).
Hosts: *Haronga paniculata*, and "Mudirira" stem.
References: (**hb**) Schedl 1961k: 347–349. (**ds**) Kleine 1934: 125; Schedl 1961k: 348. (**tx**) Eggers 1933e: 21; Schedl 1961k: 348.

***obesa* Blackman** 1943c: 393. Holotype ♀; Gatun, Canal Zone, Panama; USNM, Washington.
Distribution: North America (Costa Rica/ Panama), South America (Colombia/ Brazil).
Hosts: *Rheedia madruno*, *Symphonia globulifera*.
References: (**hb**) Wood, S. L. 1982b: 205. (**ds**) Blackwelder 1947; Wood, S. L. 1982b: 205. (**tx**) Blackman 1943c: 393; Wood S. L. 1956c: 248, 1982b: 205.

***parva* Blackman** 1943c: 393. Holotype ♀; Cayamas, Cuba; USNM, Washington.
Distribution: Antilles Islands (Cuba).
References: (**ds**) Blackwelder 1947; Bright 1985c: 171. (**tx**) Blackman 1943c: 393–394; Bright 1985c: 171.

***peruviana* Eggers** 1951: 148. Holotype ♀; Peru; Schedl Collection in NHMW, Wien.
Distribution: South America (Peru).
References: (**tx**) Eggers 1951: 148.

***psaltes* (Hagedorn)** 1909a: 742 (*Bothryperus*). Syntypes (2), sex?; Kamerun; MNB, Berlin.
Figures: Schedl 1961k: 341 (adult), 351 (galleries).
Distribution: Africa (Cameroon/ Zaire).
Hosts: *Garcinia* sp., *Synsepalum subcordatum*.
References: (**cn**) Ghesquiere 1933a: 34–35, 1933b: 784, 786. (**hb**) Schedl 1961k: 349–354. Trogloditica Sampson 1922b: 148. Type-species: *Trogloditica trahax* Sampson, monobasic. Synonymy: Wood 1978a: 116.
References: (**tx**) Sampson 1922b: 148; Schedl 1960g: 125; Wood, S. L. 1978a: 116.

Pseudoacacacis Schedl 1963j: 477. Type-species: *Acacacis borneensis* Browne, original designation. Synonymy: Wood 1978a: 116.
References: (**tx**) Browne 1965a: 189; Schedl 1963j: 477, 1964h: 423; Wood, S. L. 1978a: 116.

Neodiamerus Schedl 1971a: 282. Type-species: *Neodiamerus granulicollis* Schedl, original designation. Synonymy: Wood 1979b: 133.
References: (**tx**) Schedl 1971a: 282; Wood, S. L. 1979b: 133.

Notes: (3) An unpublished manuscript by Schedl 1978 treating Australian species cites *spectabilis* Schedl, nomen nudum.

References: (**hb**) Wood, S. L. 1986a: 45. (**ds**) Browne 1961c: 65; Schedl 1960g: 125; Wood, S. L. 1986a: 45. (**tx**) Browne 1960: 201–220, 1961c: 65, 1965a: 189; Lea 1910: 149; Lucas 1920: 67; Schedl 1960g: 125; Wood, S. L. 1978a: 116, 1979b: 133, 1986a: 45.

***abundans* Lea** 1910: 149. Syntypes, sex?; Hobart, Mount Wellington, Bruni Island, etc., in Tasmania, Emerald in Victoria; SAM, Adelaide.
Figures: Schedl 1936g: 525 (antenna).
Distribution: Australia (New South Wales/ Queensland/ South Australia/ Tasmania/ Victoria), New Zealand.
Hosts: *Acacia* spp.
References: (**ds**) Brimblecombe 1953: 3; Nicholls 1923: 15–17; Schedl 1936g: 525, 1959d: 67, 1979a: 158. (**tx**) Hopkins 1914: 116; Lea 1910: 149; Lucas 1920: 67; Schedl 1936g: 525, 1955b: 278–279, 1958i: 214, 1959d: 67. (**ms**) Lucas 1920: 67.

***bicornis* Wood** 1988a: 34. Holotype ♂; near Bulolo, Morobe District, New Guinea; Wood Collection.
Distribution: New Guinea.
Hosts: Tree seedling.
References: (**tx**) Wood, S. L. 1988a: 34.

***borneensis* Browne** 1962c: 203. Holotype ♀; Sarawak: Kuching, F.G.B.6317; BMNH, London.
Distribution: Indonesia (Sarawak in Borneo).
Hosts: *Vatica* sp.
References: (**tx**) Browne 1962c: 203, 1965a: 187; Schedl 1963j: 477, 1964h: 423; Wood, S. L. 1978a: 116.

***carphoboroides* (Nunberg)** 1960a: 287 (*Trogloditica*). Holotype, sex?; Tanganyika Terr., Katesh, Contrefort Sud du Mt. Hanang, 1850 m; MRCB, Tervuren.
Figures: Nunberg 1960a: 290.
Distribution: Africa (Tanzania).
References: (**tx**) Nunberg 1960a: 287, 290; Schedl 1962k: 1064.

***globosus* (Eggers)** 1935c: 298 (*Trogloditica*). Holotype ♀?; Congostaat: Elisabethville; MRCB, Tervuren.
Figures: Schedl 1960g: 125.
Distribution: Africa (Mozambique/ Zaire).
References: (**tx**) Eggers 1935c: 298; Schedl 1960g: 125.

***granulicollis* (Schedl)** 1971a: 282 (*Neodiamerus*). Holotype ♂; Ceylon: Central Prov., Hantane Estate, Kandy; Schedl Collection in NHMW, Wien.
Figures: Schedl 1971a: 283.
Distribution: Asia (Sri Lanka).
Hosts: Liana.
References: (**tx**) Schedl 1971a: 282–283; Wood, S. L. 1979b: 133.

***kivuensis* (Nunberg)** 1967b: 314 (*Trogloditica*). Holotype, sex?; Kivu, foret Biambwe, terr. Lubero, 950 m; MRCB, Tervuren.
Figures: Nunberg 1967b: 335.
Distribution: Africa (Zaire).
References: (**tx**) Nunberg 1967b: 314, 335.

***malayanus* Browne** 1962c: 202. Holotype ♀; Malaya: Selangor, Kepong, F.G.B.5225; BMNH, London.
Distribution: Asia (Malaya).
Hosts: *Fissistigma elegans*.
References: (**hb**) Browne 1961c: 66. (**ds**) Browne 1961c: 66, 1962c: 202. (**tx**) Browne 1962c: 202.

***minor* Schedl** 1936g: 525. Syntypes, sex?; Australia, New South Wales: Sidney and Wollongong; SAM, Adelaide, restricted by Schedl 1979c: 154 to SAM, Adelaide specimens.
Distribution: Australia (New South Wales).
References: (**ds**) Brimblecombe 1953: 3; Schedl 1936g: 525. (**tx**) Browne 1962c: 202; Schedl 1936g: 525, 1958i: 214, 1979c: 154.

***squamosus* (Eggers)** 1933e: 20 (*Trogloditica*). Holotype ♀?; N. Rhodesia: Mwengwa (27 degrees 40′ Ost, 13 degrees Sud); BMNH, London.
Distribution: Africa (Zaire/ Zambia).
References: (**ds**) Beaver & Loeyttyniemi 1985a:

65; Schedl 1960g: 126. (**tx**) Eggers 1933e: 20, 1934b: 27, 1935c: 298; Schedl 1960g: 125–126, 128.

***syrutschcki* (Wichmann)** 1913a: 143 (*Dendrosinus*). Holotype ♀; Morogoro, Deutsch-Ost-Afrika; NHMW, Wien.
Distribution: Africa (Tanzania).
References: (**tx**) Eggers 1934: 27; Schedl 1960g: 126; Wichmann 1913a: 143.

***trahax* (Sampson)** 1922b: 148 (*Troglodítica*). Holotype, sex?; Siam: Rajburi and Chiengami Div.; BMNH, London.
Distribution: Asia (Thailand).
Hosts: *Sindora siamensis*.
Notes: (3) Wood, S. L. 1978a: 116 (to *Acacicis*).
References: (**cn**) Mathur & Singh 1961a: 55. (**hb**) Beaver & Browne 1975: 296. (**ds**) Beaver & Browne 1975: 296; Beeson 1961: 301; Kleine 1934a: 131; Mathur & Singh 1961i: 55. (**tx**) Eggers 1933e: 20; Sampson 1922b: 148; Wood, S. L. 1978a: 116.

***zeylanicus* Wood** 1988a: 34. Holotype ♂; Buttala, Sri Lanka, 50 m; USNM, Washington.
Distribution: Asia (Sri Lanka).
Hosts: Liana.
References: (**tx**) Wood, S. L. 1988a: 34.

Genus *Pseudodiamerus* Eggers

PSEUDODIAMERUS EGGERS 1933e: 18. Type-species: *Pseudodiamerus striatus* Eggers, monobasic.
References: (**hb**) Wood, S. L. 1986a: 45. (**ds**) Wood, S. L. 1986a: 45. (**tx**) Eggers 1933e: 18; Schedl 1950d: 2, 1959n: 387–389; Wood, S. L. 1986a: 45.

***aspericollis* Eggers** 1936c: 33. Holotype, sex?; S. Rhodesia: Salisbury; BMNH, London.
Distribution: Africa (Zimbabwe).
References: (**tx**) Eggers 1936c: 33–34; Schedl 1959n: 387.

***obscurus* Eggers** 1943e: 72. Syntypes, sex?; Mozambique (Chimoio); MNHN, Paris.
Figures: Schedl 1959n: 388 (adult).
Distribution: Africa (Mozambique/ South Africa).
References: (**tx**) Eggers 1943e: 72; Schedl 1959n: 388.

obscura Schedl 1962b: 189 (*Phloeoditica*). Holotype, sex?; Basutoland; Schedl Collection at NHMW, Wien. Synonymy: Wood 1988b: 189.
References: (**tx**) Schedl 1962b: 189; Wood, S. L. 1988b: 189.

obscura Schedl 1963h: 261 (*Phloeoditica*). Holotype, sex?; Basutoland; Schedl Collection at NHMW, Wien. Synonymy: Wood 1988b: 189.
References: (**tx**) Schedl 1962b: 189, 1963h: 261; Wood, S. L. 1988b: 189.

***striatus* Eggers** 1933e: 18. Holotype ♂; Angola; BMNH, London.
Figures: Schedl 1959n: 388 (antenna).
Distribution: Africa (Angola/ Zaire).
References: (**tx**) Eggers 1933e: 18, 1936c: 33–34, 1943e: 72; Schedl 1950d: 2, 1959n: 388.

Genus *Bothrosternoides* Schedl

BOTHROSTERNOIDES SCHEDL 1969a: 210. Type-species: *Bothrosternoides malayensis* Schedl, monobasic.
References: (**hb**) Wood, S. L. 1986a: 45. (**ds**) Wood, S. L. 1986a: 45. (**tx**) Schedl 1969a: 210; Wood, S. L. 1986a: 45.

***malayensis* Schedl** 1969a: 211. Holotype ♀; Singapore, Malaya; PPST, Tokyo.
Distribution: Asia (Singapore in Malaya).
Hosts: Nyatoh log.
References: (**tx**) Schedl 1969a: 210–211, 1979c: 146.

Genus *Diamerus* Erichson

DIAMERUS ERICHSON 1836: 57. Type-species: *Hylesinus hispidus* Klug, monobasic.
Acanthurus Eichhoff 1886: 24. Type-species: *Acanthurus spinipennis* Eichhoff = *Hylesinus curvifer* Walker, designated by Hopkins 1914: 116. Synonymy: Hagedorn 1909a: 736.
References: (**tx**) Eichhoff 1886: 24; Hagedorn 1909a: 736; Hopkins 1914: 116; Lucas 1920: 69.

Lissoclastus Schaufuss 1905: 71. Type-species: *Lissoclastus pimelioides* Schaufuss, monobasic. Synonymy: Eggers 1922b: 164.
References: (**tx**) Eggers 1922b: 164; Hagedorn 1910a: 54, 1910d: 30; Lucas 1920: 378; Schaufuss 1905: 71.

L. 1986a: 45.

***ater* Hagedorn** 1909a: 735. Holotype, sex?; Nilgiri Hills; Hamburg Museum, lost.
Distribution: Asia (Burma/ Yunnan in China/ Assam, Bengal, Bombay, Kerala, Tamil Nadu in India).
Hosts: *Ficus* spp.
References: (**ds**) Beeson 1961: 287; Hagedorn 1910d: 6; Kleine 1912b: 160, 1914b: 268, 1934a: 125; Schedl 1969c: 47. (**tx**) Eggers 1925: 157; Hagedorn 1909a: 734–735, 1910a: 32; Schedl 1959k: 40.

***batoensis* Eggers** 1927b: 392. Lectotype ♀; Batoe Inseln (Tanah Masa); USNM, Washington, designated by Anderson & Anderson 1971: 5.
Distribution: Indonesia (Batoe Island).
References: (**ds**) Schedl 1966b: 11. (**tx**) Anderson, W. H. & Anderson 1971: 5; Eggers 1927b: 392; Nobuchi 1983: 299; Schedl 1979c: 36.

***brevicollis* Eggers** 1923a: 131. Holotype ♂?; Moroka, Sudost-New Guinea (1300 m); MCG, Genova.
Distribution: New Guinea.
References: (**tx**) Eggers 1923a: 131.

***caesius* Hagedorn** 1909a: 735. Holotype, sex?; Sumatra; MNB, Berlin.
Distribution: Indonesia (Sumatra).
References: (**ds**) Hagedorn 1910d: 6; Kleine 1912b: 160, 1914b: 285. (**tx**) Hagedorn 1909a: 735, 1910a: 32.

***cherenus* Eggers** 1919: 230. Syntypes, sex?; Harrar in Abessinien; Hamburg Museum, lost.
Distribution: Africa (Ethiopia).
References: (**tx**) Eggers 1919: 230; Schedl 1937b: 397, 1960g: 143, 1979c: 56.

***cinerascens* Fairmaire** 1897: 195. Holotype, sex?; Madagascar; not located.
Distribution: Madagascar.
References: (**ds**) Alluaud 1900: 438; Hagedorn 1910d: 6; Kleine 1912b: 160, 1914b: 325. (**tx**) Fairmaire 1897: 195; Hagedorn 1910a: 32, 1913b.

***curvifer* (Walker)** 1859: 261 (*Hylesinus*). Holotype, sex?; Ceylon; BMNH, London.
Distribution: Asia (Burma/ Hainan Island, Yunnan in China/ Andaman Islands, Assam, Bengal, Himachal Pradesh, Maharashtra, Tamil Nadu, Uttar Pradesh in India/ Sri Lanka/ Tonkin Island in Vietnam), Australia (Queensland), Indonesia (Amboina, Borneo, Java, Sumatra), New Guinea, Philippine Islands.
Hosts: *Artocarpus integrifolia, Ficus* spp., *Macaranga andamanica, Symplocos* sp.
References: (**cn**) Roonwal 1954: 87. (**ec**) Thompson, W. R. 1943: 40. (**hb**) Beaver & Browne 1978: 586; Browne 1961c: 57; Kalshoven 1958b: 161. ***grandis* Schedl** 1957d: 31. Holotype, sex?; Gold Coast; Schedl Collection in NHMW, Wien.
Figures: Schedl 1961k: 337–338.
Distribution: Africa (Ghana/ Uganda/ Zaire).
References: (**ds**) Gardner 1957a: 32; Schedl 1961k: 337. (**tx**) Schedl 1955i: 211, 214, 1957d: 31, 1961k: 337–338.

***hagedorni* Eggers** 1920: 122. Holotype, sex?; Kamerun; MNB, Berlin.
Distribution: Africa (Cameroon/ Nigeria).
References: (**cn**) Kudler 1978; Anderson, W. H. & Anderson 1971: 16. (**ds**) Roberts 1966a; Schedl 1961k: 338, 1962k: 1065. (**tx**) Eggers 1920: 122, 1932c: 27–28; Nunberg 1964: 234; Roberts 1969: 128; Schedl 1961k: 338, 1962k: 1065.

***helferi* Eggers** 1925: 152, 154. Holotype, sex?; Tenasserim, Birma; Prague Museum.
Distribution: Asia (Burma).
References: (**tx**) Eggers 1925: 152, 154.

***inermis* Browne** 1981a: 127. Holotype, sex?; intercepted: Sablayan, Philippines to Takamatsu, Japan; BMNH, London.
Distribution: Philippine Islands.
Hosts: *Shorea* sp.
References: (**tx**) Browne 1981a: 127; Nobuchi 1893: 299.

***insularis* Eggers** 1927c: 74. Holotype ♀; Philippinen: Mindanao, Prov. Lanao, Kolambugan; USNM, Washington.
Distribution: Philippine Islands (Mindanao).
References: (**ds**) Schedl 1966b: 14. (**tx**) Anderson, W. H. & Anderson 1971: 16; Eggers 1927c: 74; Nobuchi 1983: 299.

***juglansi* Tsai & Yin** 1966: 239. Holotype ♂; Shensi, Shihchuan, China; IZAS, Beijing.
Distribution: Asia (Anhui, Shanxi, Sichuan in China).
Hosts: *Juglans regia, Pterocarpa stenoptera*.
References: (**ds**) Krivolutskaya 1983. (**tx**) Krivolutskaya 1970: 207; Tsai & Yin 1966: 239.

***juglansis* Krivolutskaya & Kupyanskaya** 1973: 210. Holotype, sex?; Primorye region, Russian SFSR; not located, presumably at Vladivostok.
Figures: Krivolutskaya 1970: 208–209.
Distribution: Asia (E USSR).
Hosts: *Juglans* sp.
References: (**tx**) Krivolutskaya 1970: 208–209; Krivolutskaya & Kupyanskaya 1973: 210.

***limbatus* Eggers** 1943d: 244. Holotype, sex?; Indien; Strohmeyer Collection.
Distribution: Asia (India).
References: (**tx**) Eggers 1943d: 244.

***magnus* Tsai & Yin** 1966: 234. Holotype ♂; Szechwan: Miyalo, 2600 m; IZAS, Beijing.
Distribution: Asia (Sichuan, Yunnan in China).
Hosts: *Tsuga chinensis*.
References: (**tx**) Tsai & Yin 1966: 234.

***minutus* Browne** 1961a: 302. Holotype ♀?; Malaya: Penang; BMNH, London.
Distribution: Asia (Malaya).
Hosts: *Shorea leprosula, Vatica* sp.
References: (**hb**) Browne 1961c: 61. (**ds**) Beaver & Browne 1978: 600; Browne 1961a: 302, 1961c: 61. (**tx**) Browne 1961a: 302.

***moseri* Eggers** 1927c: 73. Lectotype, sex?; Philippinen: Mindanao, Prov. Zamboanga, Port Banga; USNM, Washington, designated by Anderson & Anderson 1971: 21.
Distribution: Philippine Islands (Mindanao).
References: (**ds**) Schedl 1966b: 14, 1969a: 204. (**tx**) Anderson, W. H. & Anderson 1971: 21; Eggers 1927c: 73; Nobuchi 1983: 299; Schedl 1951i: 50.

***palawanus* Eggers** 1927c: 74. Syntypes 2, sex?; Philippinen: Palawan, Binaluan; 1 in Linnaniemi Collection, Turku, Finland, Eggers syntype in Schedl Collection in NHMW, Wien.
Distribution: Philippine Islands (Palawan).
References: (**ds**) Schedl 1966b: 14. (**tx**) Eggers 1927c: 74; Nobuchi 1983: 299.

***pentacme* Wood** 1988a: 36. Holotype ♂; Mohnyin Res., Myitkyina, Burma; FRI, Dehra Dun.
Distribution: Asia (Burma).
Hosts: *Pentacme suavis*.
References: (**tx**) Wood, S. L. 1988a: 36.

***philippinensis* Strohmeyer** 1911b: 18. Holotype, sex?; Philippine Is.: Mindanao, Zamboanga; Philippine Bureau of Science, Manila.
Distribution: Philippine Islands (Mindanao).
Hosts: *Hopea* sp.
References: (**cn**) Kleine 1932a: 296. (**hb**) Kleine 1932a: 296. (**ds**) Kleine 1912b: 174, 1914b: 290, 1932a: 296; Schedl 1966b: 15. (**tx**) Nobuchi 1983: 299; Strohmeyer 1911b: 18–20.

***pila* Blandford** 1894d: 62. Syntypes, sex?; Hitoyoshi, Japan; BMNH, London.
Figures: Nakane et al. 1963:pl. 191.
Distribution: Asia (China/ Korea/ Japan/ Taiwan).
Hosts: *Distylium racemosum, Quercus acutissima, Q. myrsinaefolia, Thea japonica*.
Notes: (3) Murayama 1966: 68 (*carpini* Eggers a synonym of *pila*).
References: (**cn**) Anonymous 1980g; Shiraki 1952. ***abhorrens* Eggers** 1943e: 71. Holotype, sex?; Zambeze (Environ de Chemba); MNHN, Paris.
Figures: Schedl 1960g: 85.
Distribution: Africa (Mozambique/ Uganda).
Hosts: *Vitex cuneata*.
Notes: (1) There are 4 Eggers cotypes in Schedl Collection in NHMW, Wien.
References: (**hb**) Schedl 1960g: 84–85. (**ds**) Nunberg 1952: 18, 1965b: 18; Schedl 1960g: 84–85, 1975k: 276, 1977c: 394. (**tx**) Eggers 1943e: 71; Nunberg 1952: 18; Schedl 1960g: 84–85.

***armatus* Eggers** 1933e: 21. Holotype ♂; Port. Ost. Africa (Ankuaze); BMNH, London.
Distribution: Africa (Mozambique/ Zambia).
References: (**ds**) Browne 1973a: 280; Lee 1971: 31. (**tx**) Eggers 1933e: 21–22; Schedl 1960g: 86.

***brevicollis* (Strohmeyer)** 1910c: 70 (*Acanthophorus*). Syntypes 1♂, 3♀; Usambara occidentalis (Mgila); Strohmeyer Collection.
Distribution: Africa (Tanzania).
Hosts: *Usambara occidrentalis*.
References: (**hb**) Schedl 1960g: 86. (**ds**) Kleine 1912b: 187, 1914b: 323; Schedl 1960g: 86. (**tx**) Eggers 1933e: 21; Hopkins 1914: 126; Lucas 1920: 68; Schedl 1941d: 385, 1960g: 86; Strohmeyer 1910c: 70–71, 1910d: 93. (**ms**) Lucas 1920: 68.

***obscurus* Eggers** 1940c: 230. Holotype, sex?; Congostaat: Haut Uele (Moku Moto); MRCB, Tervuren.
Distribution: Africa (Zaire).
References: (**tx**) Eggers 1940c: 230; Schedl 1940c: 230, 1960g: 88–89.

***pondoanus* Eggers** 1933e: 22. Holotype ♂; Sudafrica: Pondoland, Port St. Johns; BMNH, London.
Distribution: Africa (South Africa).
References: (**tx**) Eggers 1933e: 22; Schedl 1960g: 89.

Genus *Strombophorus* Hagedorn

STROMBOPHORUS HAGEDORN 1909a: 740. Type-species: *Strombophorus crenatus* Hagedorn, subsequent designation by Hopkins 1914: 130.
References: (**hb**) Schedl 1960f: 10; Wood, S. L. 1986a: 46. (**ds**) Wood, S. L. 1986a: 46. (**tx**) Hagedorn 1909a: 740, 1910a: 29, 33–34, 1910d: 7; Hopkins 1914: 130, 1915c: 227; Lucas 1920: 618; Nobuchi 1969a: 48; Schedl 1957d, 1959q: 705–710, 1960g: 89–114; Wood, S. L. 1986a: 46.

***camerunus* Hagedorn** 1909a: 742. Syntypes, sex?; Kamerun; MNB, Berlin.
Distribution: Africa (Cameroon).
References: (**ds**) Hagedorn 1910d: 7; Kleine 1912b: 161, 1914b: 310. (**tx**) Eggers 1919: 231–232, 1920: 117–118; Hagedorn 1909a: 742, 1910a: 34; Schedl 1957d: 21, 1960g: 90–91.

***capensis* Schedl** 1965h: 113. Holotype, sex?; Cape Prov., Alexandria; Transvaal Museum, Pretoria.
Distribution: Africa (South Africa).
Hosts: *Celtis africanus*.
References: (**ds**) Schedl 1975k: 276. (**tx**) Schedl 1965h: 113.

***celtis* Schedl** 1955i: 214. Syntypes, sex?; Uganda: Kiwafu; BMNH, London, and Schedl Collection in NHMW, Wien.
Distribution: Africa (Uganda).
Hosts: *Celtis durandii, C. kraussiana*.
Notes: (1) Schedl 1979c: 55 (citation of holotype invalid).
References: (**ds**) Gardner 1957a: 32; Schedl 1960g: 91. (**tx**) Schedl 1955i: 211, 214, 1960g: 91, 1979c: 55.

***cordatus* Hagedorn** 1909a: 741. Holotype, sex?; Kamerun; MNB, Berlin.
Distribution: Africa (Cameroon).
References: (**ds**) Hagedorn 1910d: 7; Kleine 1912b: 161. (**tx**) Eggers 1919: 231–232; Hagedorn 1909a: 740–742, 1910a: 34; Schedl 1960g: 91.

***crenatus* Hagedorn** 1909a: 740. Syntypes, sex?; Kamerun; MNB, Berlin, lost except for slide mounts of antenna and mouthparts.
Figures: Nunberg 1961a: 333, 335.
Distribution: Africa (Cameroon/ Guinea/ Zaire).
Hosts: *Millettia duchesnii*.
References: (**ec**) Schedl 1960g: 92. (**ds**) Hagedorn 1910d: 7; Kleine 1912b: 161, 1914b: 310; Schedl 1960g: 92, 1964f: 617, 1965e: 350, 1967e: 209, 1971g: 192, 1972e: 279. (**tx**) Eggers 1919: 232, 1932c: 24; Hagedorn 1909a: 740–742, 1910a: 34; Hopkins 1914: 130, 133; Lucas 1920: 618; Roberts 1969: 128; Schedl 1950d: 6, 1955d: 268, 1960g: 92, 1962k: 1063.
nudus Nunberg 1961a: 332. Holotype ♂; Congo: Stanleyville, Yangambi; MRCB, Tervuren.
Synonymy: Schedl 1962j: 96.
References: (**tx**) Nunberg 1961a: 332–333, 335; Schedl 1962j: 96, 1962k: 1063.

***dialiumi* Schedl** 1957d: 20. Holotype ♀; Congo Belge: Yangambi; MRCB, Tervuren.
Distribution: Africa (Nigeria/ Zaire).
Hosts: *Dialium corbisieri*.
References: (**hb**) Schedl 1960g: 94. (**ds**) Schedl 1962k: 1064, 1964j: 39. (**tx**) Schedl 1957d: 19–20, 1960g: 94.

***elongatus* Eggers** 1919: 231. Holotype, sex?; Daressalaam (Ostafrika); Hamburg Museum, lost.
Distribution: Africa (Tanzania).
References: (**tx**) Eggers 1919: 231–232; Schedl 1960g: 95.

***ericius* (Schaufuss)** 1897a: 217 (*Diamerus*). Holotype, sex?; Natal; Hamburg Museum, lost.
Distribution: Africa (Natal in South Africa/ Uganda/ Zaire).
Hosts: *Celtis zenkeri, Gossweilerodendron balsamiferum, Oxystigma oryphyllum*.
References: (**ec**) Schedl 1958d: 185, 193, 1960g: 95. (**hb**) Browne 1963a: 230; Schedl 1960g: 95. (**ds**) Beaver & Loeyttyniemi 1989; Browne 1963a: 230; Hagedorn 1910d: 6; Kleine 1912b: 160, 1914b: 319; Schedl 1959q: 705, 1960g: 95, 1964f: 617, 1964j: 39, 1965e: 350, 1965g: 19, 1971g: 192. variegatus Eggers 1940c: 231. Holotype, sex?; Congostaat: Elisabethville; MRCB, Tervuren.
Synonymy: Schedl 1950d: 6.
References: (**tx**) Eggers 1940c: 231; Schedl 1950d: 6.

***flavipubens* Schedl** 1959q: 706. Holotype ♀; Tanganyika: Gologolo; BMNH, London.
Distribution: Africa (Tanzania).
Hosts: *Catha edulis*.
References: (**ds**) Schedl 1959q: 705–706. (**tx**) Schedl 1959q: 706, 1960g: 99.

***granulifer* Eggers** 1932c: 23. Holotype, sex?; Congostaat (Mayumbe: Pulu Banzi); USNM, Washington.
Distribution: Africa (Zaire).
References: (**tx**) Anderson, W. H. & Anderson 1971: 14; Eggers 1932c: 23, 25; Schedl 1936b: 136, 1960g: 99.

***hispidus* Eggers** 1932c: 26. Holotype, sex?; Congostaat (Lulonga-Befale); MRCB, Tervuren.
Distribution: Africa (Zaire).
References: (**tx**) Eggers 1932c: 26; Schedl 1936b: 136, 1960g: 99.

***intermedius* Eggers** 1920: 117. Holotype, sex?; Kamerun; USNM, Washington.
Distribution: Africa (Cameroon/ Fernando Po Island).
References: (**ds**) Schedl 1960g: 100. (**tx**) Anderson, W. H. & Anderson 1971: 16; Eggers 1920: 117–118; Roberts 1969: 129; Schedl 1941d: 385, 1957d: 21, 1960g: 100.

***interstitialis* Browne** 1963b: 241. Holotype ♀; Nigeria: Calabar; BMNH, London.
Distribution: Africa (Nigeria).
Hosts: *Lonchocarpus* sp.
References: (**tx**) Browne 1963b: 241; Roberts 1969: 129.

***kaszabi* Schedl** 1967e: 223. Holotype ♀; Kindamba, Meya, Bangou Forest, Congo; NHMB, Budapest.
Distribution: Africa (Zaire).
References: (**tx**) Schedl 1967e: 223–224.

***laevis* Eggers** 1919: 232. Holotype, sex?; Kamerun; USNM, Washington.
Distribution: Africa (Cameroon).
References: (**tx**) Anderson, W. H. & Anderson 1971: 17; Eggers 1919: 232, 1920: 117–118; Schedl 1957d: 21, 1960g: 100.

***latus* Eggers** 1919: 233. Holotype, sex?; Nkolentangan (Span. Guinea); MNB, Berlin.
Distribution: Africa (Equatorial Guinea).
References: (**tx**) Eggers 1919: 233; Schedl 1960g: 100.

***lukengeae* Schedl** 1957d: 20. Holotype, sex?; Congo Belge: Bas-Congo, Jombo de Bombo, N. Ouest de Tshela; MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Dialium corbisiera, D. pachyphyllum, D.* sp.
References: (**ec**) Schedl 1958d: 188, 1960g: 101–103. (**hb**) Schedl 1960g: 101–103. (**ds**) Mayne & Donis 1962: 313; Schedl 1960g: 101–103, 1964j: 40. (**tx**) Roberts 1969: 129; Schedl 1957d: 20, 1960g: 101–103.

***major* Schedl** 1941d: 385. Holotype ♀; Usambara: Derema (Tanganyika); Schedl Collection in NHMW, Wien.
Distribution: Africa (Tanzania).
References: (**tx**) Schedl 1941d: 385, 1957d: 21, 1960g: 104.

***millettiae* Schedl** 1957d: 21. Holotype ♀; Congo Belge: Yangambi; MRCB, Tervuren.
Distribution: Africa (Angola/ Zaire).
Hosts: *Millettia duchesnii*.
References: (**bv**) Schedl 1960f: 39. (**ec**) Schedl 1958d: 193–194, 1960g: 104. (**hb**) Schedl 1960g: 104. (**ds**) Mayne & Donis 1962: 313; Schedl 1959p: 16, 1960f: 39, 1960g: 104. (**tx**) Schedl 1957d: 21, 1960g: 104.

***minor* Eggers** 1919: 233. Holotype, sex?; Kamerun; USNM, Washington.
Distribution: Africa (Cameroon).
References: (**tx**) Anderson, W. H. & Anderson 1971: 20; Eggers 1919: 233, 1944b: 92; Schedl 1960g: 106.

***minutissimus* Schedl** 1936b: 136. Holotype ♀; Stanleyville, Congo; Schedl Collection in NHMW, Wien.
Distribution: Africa (Zaire).
References: (**tx**) Schedl 1936b: 136, 1960g: 106.

***movoliae* Schedl** 1957d: 22. Holotype ♀; Congo Belge: Kivu, Mulungu; MRCB, Tervuren.
Figures: Schedl 1957d: 23 (female).
Distribution: Africa (Zaire).
Hosts: Liana known as Movolia.
References: (**hb**) Schedl 1960g: 106. (**ds**) Mayne & Donis 1962: 313. (**tx**) Nunberg 1961: 336; Schedl 1957d: 22–23, 1960g: 106.

***nigrescens* Schedl** 1941d: 387. Holotype ♂; Nairobi, Kenya; Schedl Collection in NHMW, Wien.
Distribution: Africa (Kenya).
References: (**tx**) Schedl 1941d: 387, 1960g: 108.

***occidentalis* Schedl** 1941d: 385. Holotype ♂; Spanish Guinea; Schedl Collection in NHMW, Wien.
Distribution: Africa (Equatorial Guinea).
References: (**tx**) Schedl 1941d: 385, 1957d: 21, 1960g: 108.

***pilifer* (Eggers)** 1927a: 172 (*Hylesinus*). Holotype, sex?; Belg.-Congo (Haut Uele: Watsa); MRCB, Tervuren.
Distribution: Africa (Zaire).
References: (**tx**) Eggers 1927a: 172–173; Schedl 1960g: 109.

***pusillus* Eggers** 1932c: 24. Holotype, sex?; Congostaat (Mayumbe: Pulu Banzi); USNM, Washington.
Distribution: Africa (Zaire).
References: (**tx**) Anderson, W. H. & Anderson 1971: 27; Eggers 1932c: 24–25, Schedl 1936b: 136, 1957d: 10, 1960g: 109.

spinosus Eggers 1932c: 25. Holotype, sex?; Congostaat (Mayumbe: Pulu Banzi); USNM, Washington. Synonymy: Schedl 1957d: 10.
References: (**tx**) Anderson, W. H. & Anderson 1971: 31; Eggers 1932c: 25; Schedl 1941d: 386, 1957d: 10, 1960g: 110.

***setulosus* Schedl** 1941d: 386. Holotype ♂; Kuango, Congo; Schedl Collection in NHMW, Wien.
Distribution: Africa (Zaire).
References: (**tx**) Schedl 1941d: 385–386, 1960g: 109.

***spathulatus* Schedl** 1941d: 386. Holotype ♀; Kamerun; Schedl Collection in NHMW, Wien.
Distribution: Africa (Cameroon).
References: (**tx**) Schedl 1941d: 385–386, 1960g: 110.

***testudo* Eggers** 1944b: 92. Holotype, sex?; Belgisch-Congo (Equateur: Flandria); MRCB, Tervuren.
Distribution: Africa (Zaire).
References: (**tx**) Eggers 1944b: 92; Schedl 1960g: 110.

***vagans* Schedl** 1957d: 23. Holotype, sex?; Congo Belge: Yangambi; MRCB, Tervuren.
Distribution: Africa (Zaire).
Hosts: *Cillaeus contractus, Croton haumanianus, Millettia duchesnei, Pterygota bequaerti*.
References: (**bv**) Schedl 1960f: 39. (**hb**) Schedl 1960g: 110. (**ds**) Schedl 1960f: 39, 1960g: 110. (**tx**) Schedl 1957d: 23, 1960g: 110.

***vittatus* Eggers** 1935c: 297. Holotype ♀; Congostaat (Haut-Uele: Yebo Moto); MRCB, Tervuren.
Figures: Nunberg 1961a: 335, 337, Schedl 1960g: 89.
Distribution: Africa (Burkina Faso/ Zaire).
References: (**hb**) Schedl 1960g: 112. (**ds**) Mayne & Donis 1962: 313; Schedl 1960g: 112, 1971g: 192, 1972e: 279. (**tx**) Eggers 1935c: 297, 1940c: 231; Schedl 1960g: 89, 112, 1962k: 1064.

pseudomovoliae Nunberg 1961a: 336. Holotype ♂; Bas-Congo: Kimwenza; MRCB, Tervuren. Synonymy: Schedl 1962r: 96.
References: (**tx**) Nunberg 1961a: 335–337; Schedl 1962k: 1064, 1962r: 96.

***nebulosus* Wood** 1983a: 655. Holotype ♀; Pachuca, Hidalgo, Mexico; Wood Collection.
Distribution: North America (Hidalgo in Mexico).
References: (**hb**) Atkinson & Equihua 1985a: 74. (**ds**) Atkinson & Equihua 1985a: 74. (**tx**) Wood, S. L. 1983a: 655.

***niger* Wood** 1967b: 83. Holotype ♂; Cerro Punta, Chiriqui, Panama; Wood Collection.
Figures: Wood 1968a: 90.
Distribution: North America (Panama).
References: (**hb**) Wood, S. L. 1982b: 221. (**ds**) Wood, S. L. 1982b: 221. (**tx**) Wood, S. L. 1967b: 83, 1968a: 90, 1982b: 221.

***nitidus* Eggers** 1943a: 376. Lectotype, sex?; Bolivia (Cochabamba); USNM, Washington, designated by Anderson & Anderson 1971: 22.
Distribution: South America (Bolivia).
References: (**ds**) Anderson, W. H. & Anderson 1971: 22; Schedl 1972g: 42. (**tx**) Eggers 1940a: 137, 1943a: 376–377; Schedl 1940a: 331, 1948f: 268, 1952d: 354.

***noguerae* Atkinson** 1989: 57. Holotype ♀; Mexico: Veracruz, Xalapa; USNM, Washington.
Distribution: North America (Veracruz in Mexico).
Hosts: *Psittacanthus schiedeanus*.
References: (**tx**) Atkinson 1989: 57.

***novateutonicus* Schedl** 1951m: 77. Syntypes, sex?; Brasilien, Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien and Plaumann Collection.
Figures: Schedl 1951m: 77 (male).
Distribution: South America (Brazil).
Hosts: *Canella* sp.
Notes: (1) Schedl 1979c: 172 (citation of holotype invalid).
References: (**ds**) Schedl 1967d: 2, 1973d: 153. (**tx**) Schedl 1951m: 77, 1979c: 171.

***ocularis* Blandford** 1896e: 140. Holotype, sex?; Venezuela [probably Colonia Tovar]; BMNH, London.
Distribution: South America (Venezuela).
References: (**ds**) Blackwelder 1947; Hagedorn 1910d: 80; Kleine 1913b: 148, 1914b: 339; LePelley 1968: 443. (**tx**) Blandford 1896e: 140; Eggers 1931b: 34; Hagedorn 1910a: 131.

***paleatus* Blandford** 1896e: 138. Holotype ♀; Guatemala: El Tumbador; BMNH, London.
Figures: Blandford 1896e:pl. 6, fig. 16.
Distribution: North America (Guatemala).
References: (**ds**) Blackwelder 1947; Hagedorn 1910d: 80; Kleine 1913b: 148, 1914b: 365; Wood, S. L. 1982b: 225. (**tx**) Blandford 1896e: 138; Hagedorn 1910a: 131; Wood, S. L. 1982b: 225.

***paraguayensis* Schedl** 1936i: 107. Holotype ♂; Paraguay; Schedl Collection in NHMW, Wien.
Distribution: South America (Paraguay).
References: (**ds**) Blackwelder 1947; Schedl 1973d: 153. (**tx**) Schedl 1936i: 107, 1979c: 184.

***parvicornis* Wood** 1983a: 656. Holotype ♀; Ruinas de Xochicalco, Morelos, Mexico; Wood Collection.
Distribution: North America (Morelos in Mexico).
References: (**hb**) Atkinson et al. 1986: 48. (**ds**) Atkinson et al. 1986: 48. (**tx**) Wood, S. L. 1983a: 656.

***perplexus* Wood** 1968b: 102. Holotype ♂; San Ignacio de Acosta, San Jose, Costa Rica; Wood Collection.
Figures: Wood 1968a: 93.
Distribution: North America (Costa Rica).
References: (**tx**) Schedl 1979c: 190; Wood, S. L. 1968a: 93, 1968b: 102.

***pilatus* Wood** 1975a: 24. Holotype ♀; 13 km W El Palmito, Sinaloa, Mexico; CNCI, Ottawa.
Distribution: North America (Sinaloa in Mexico).
References: (**ds**) Wood, S. L. 1982b: 240. (**tx**) McNamara 1977: 753; Wood, S. L. 1975a: 24, 1982b: 240.

***pilosus* Eggers** 1943a: 378. Holotype ♀; Bolivia (Cochabamba); Eggers Collection, in NHMW, Wien.
Distribution: South America (Bolivia).
References: (**tx**) Eggers 1943a: 378; Schedl 1979c: 194.

***plaumanni* Schedl** 1963d: 220. Holotype ♂; Brasilien: Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**ds**) Schedl 1976a: 50. (**tx**) Eggers 1943a: 378; Schedl 1963d: 220, 1979c: 196.

***porcatus* Blandford** 1896e: 137. Lectotype ♀; Volcan de Chiriqui, Panama; BMNH, London, designated by Wood 1982b: 236.
Figures: Blandford 1896e:pl. 6, 15–15a, Wood 1968a: 97.
Distribution: North America (Costa Rica/ Guatemala/ Panama), South America (Venezuela).
Hosts: *Oreopanax capitatus*, *O.* sp., *Quercus* sp., liana.
References: (**ds**) Blackwelder 1947; Bright 1979b: 1496; Hagedorn 1910d: 80; Kleine 1913b: 148, 1914b: 339, 365; Wood, S. L. 1982b: 236. ***prominulus* Wood** 1977b: 212. Holotype ♀; Volcan Colima, Jalisco, Mexico; Wood Collection.
Distribution: North America (Jalisco, Morelos in Mexico).
Hosts: *Persea americana*.
References: (**hb**) Atkinson et al. 1986: 20; (**ds**) Atkinson & Equihua 1985b: 230; Atkinson et al. 1986: 20; Wood, S. L. 1982b: 239. (**tx**) Wood, S. L. 1977b: 212, 1982b: 239.

***pullus* Blandford** 1896e: 141. Lectotype ♀; Cerro Zunil, Guatemala; BMNH, London, designated by Wood 1982b: 217.
Figures: Wood 1968a: 90.
Distribution: North America (Guatemala/ Veracruz in Mexico/ Panama).
Hosts: *Persea americana*.
References: (**hb**) Wood, S. L. 1982b: 217. (**ds**) Blackwelder 1947; Hagedorn 1910d: 80; Kleine 1913b: 148, 1914b: 365; Wood, S. L. 1982b: 217. (**tx**) Blandford 1896e: 141; Hagedorn 1910a: 131; Wood, S. L. 1968a: 90, 1982b: 217.

***pumilus* Eggers** 1931b: 34. Holotype, sex?; Sao Paulo (Brazil); USNM, Washington.
Distribution: South America (Brazil).
References: (**ds**) Anderson, W. H. & Anderson 1971: 26; Blackwelder 1947. (**tx**) Eggers 1931b: 34.

***punctatus* Blandford** 1896e: 136. Holotype ♀; Panama: Volcan Chiriqui, Chiriqui; BMNH, London.
Figures: Blandford 1896e:pl. 6, Wood 1968a: 90.
Distribution: North America (Costa Rica/ Puebla in Mexico/ Panama).
Hosts: *Guazuma ulmifolia, Persea americana*.
References: (**ds**) Blackwelder 1947; Hagedorn 1910d: 80; Kleine 1913b: 148, 1914b: 365; Wood, S. L. 1982b: 220. (**tx**) Blandford 1896e: 136; Hagedorn 1910a: 131; Wood, S. L. 1967b: 84, 1968a: 90, 1982b: 220.

***pusillus* Schedl** 1948f: 267. Holotype, sex?; Brazil, Blumenau; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1948f: 267, 1979c: 206.

***quaesitus* Schedl** 1940a: 331. Holotype ♀; Mexico: "Tibayes" [possible error for Tacubaya, Distrito Federal]; Schedl Collection in NHMW, Wien.
Distribution: North America (Distrito Federal in Mexico).
References: (**ds**) Blackwelder 1947; Ferrer 1942; Wood, S. L. 1982b: 229. (**tx**) Schedl 1940a: 331–333, 1979c: 209; Wood, S. L. 1982b: 229.

***reticulatus* (Chapuis)** 1869: 29 (*Hylesinus*). Holotype, sex?; Bogota (Colombia); IRSNB, Brussels.
Distribution: South America (Colombia).
Notes: (1) Eggers 1933b: 18 (to *Cnesinus*).
References: (**ds**) Blackwelder 1947; Hagedorn 1910d: 18; Kleine 1912b: 171, 1914b: 341. (**tx**) Chapuis 1869: 29, 1873: 237; Eggers 1931c, 1933g: 18; Gemminger & Harold 1872: 2675; Hagedorn 1910a: 49.

***reticulus* Wood** 1974a: 2. Holotype ♀; 30 km E Palmar, Bolivar, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Vismia cayennensis*.
References: (**tx**) Wood, S. L. 1974a: 2.

***retifer* Wood** 1967b: 85. Holotype ♂; Fort Clayton, Canal Zone, Panama; Wood Collection.
Figures: Wood 1968a: 90.
Distribution: North America (Panama).
Hosts: *Serjania* sp.
References: (**hb**) Wood, S. L. 1982b: 215. (**ds**) Wood, S. L. 1982b: 215. (**tx**) Wood, S. L. 1967b: 85–86, 1968a: 90, 1982b: 215.

***robai* Blackman** 1943c: 374. Holotype, sex?; Santander Department, Colombia; USNM, Washington.
Figures: Blackman 1943c:pl. 15, fig. 5.
Distribution: South America (Colombia).
Hosts: *Coffea arabica*.
References: (**ds**) Blackwelder 1947; Schedl 1961c: 1. (**tx**) Blackman 1943c: 374; Wood, S. L. 1961c: 1.

***schoenherri* Schedl** 1976a: 63. Holotype ♀; Brasilien, Rio Negrinho; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**ds**) Pedrosa-Macedo & Schonherr 1985: 13; Schonherr & Pedrosa-Macedo 1981: 51. (**tx**) Pedrosa-Macedo & Schonherr 1985: 13; Schedl 1976a: 63.

***setosus* Eggers** 1943a: 377. Holotype, sex?; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
References: (**tx**) Anderson, W. H. & Anderson 1971: 29; Eggers 1943a: 377; Schedl 1979c: 226.

***setulosus* Blandford** 1896e: 139. Lectotype ♂; Panama: Tole, Chirqui; BMNH, London, designated by Wood 1982b: 242.
Figures: Atkinson et al. 1986: 18, Blackman 1943c:pl. 15, figs. 3–4, 6, Wood 1968a: 97.
Distribution: North America (Guatemala/ Honduras/ Chiapas, Colima, Guerrero, Jalisco, Morelos, Oaxaca, Tamaulipas in Mexico/ Panama).
Hosts: *Acacia pennatula, Arbutus xalapensis, Conocarpus erecta, Clytastoma binatum, Ficus* sp., *Morisonia americana, Serjania mexicana*.
References: (**ec**) Equihua & Atkinson 1986: 625. (**hb**) Atkinson et al. 1986: 20; Equihua & Atkinson 1986: 625; Wood, S. L. 1982b: 242. ***affinis* Eggers** 1933b: 14. Holotype, sex?; Venezuela (San Esteban); MNHN, Paris.
Distribution: South America (Venezuela).
Hosts: Liana.
References: (**ds**) Blackwelder 1947: 787. (**tx**) Eggers 1933b: 2, 14–15.

***artestrigosus* Schedl** 1939k: 722. Syntypes, sex?; Nova Teutonia, Sta. Catarina, Brasilien; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Figures: Schedl 1939k: 721.
Distribution: South America (Brazil).
Notes: (1) Schedl 1979c: 21 (citation of holotype invalid).
References: (ds) Blackwelder 1947: 787; Schedl 1973a: 366, 1978c: 291. (**tx**) Schedl 1939k: 722–723, 1979c: 27.

***brevis* Eggers** 1933b: 15. Holotype ♀; Brasil (Sao Paulo); USNM, Washington.
Distribution: South America (Brazil).
References: (**ds**) Blackwelder 1947: 787; Bright 1981c: 152; Schedl 1966f: 83. (**tx**) Anderson, W. H. & Anderson 1971: 8; Eggers 1931c: 18, 1933b: 2, 15, 1933g: 18; Schedl 1979c: 46.

***definitus* Wood** 1968a: 109. Holotype ♀; Finca Gromaco on Rio Coto Brus, Puntarenas Prov., Costa Rica; Wood Collection.
Distribution: North America (Costa Rica/ Panama).
Hosts: Liana.
References: (**tx**) Wood, S. L. 1968a: 109.

***foveatus* (Blackman)** 1943c: 375 (*Cnesinus*). Holotype ♀; Trece Aguas, Alta Verapaz, Guatemala; USNM, Washington.
Figures: Blackman 1943c:pl. 15, figs. 9–11.
Distribution: North America (Costa Rica/ El Salvador/ Guatemala/ Oaxaca, Veracruz in Mexico).
Hosts: *Cupania guatemalensis*, *Oreopanax capitatus*, *Serjania* sp.
Notes: (3) Male unknown, hundreds of females have been collected from galleries in all stages of completion.
References: (**hb**) Wood, S. L. 1982b: 247. (**ds**) Blackwelder 1947; Wood, S. L. 1982b: 247. (**tx**) Blackman 1943c: 375–376; Wood, S. L. 1982b: 247.

***hirsutus* Wood** 1985: 271. Holotype ♂; Rancho Grande, Aragua, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Serjania* sp., *Tabebuia* sp.
Notes: (3) Males and females occurred in equal numbers.
References: (**tx**) Wood, S. L. 1985: 271.

***isolatus* Bright** 1972d: 28. Holotype ♂; Clydesdale, St. Andrew Parish, Jamaica; CNCI, Ottawa.
Figures: Bright 1972d: 35, 75.
Distribution: Antilles Islands (Jamaica).
Notes: Bright 1985: 179 (described female).
References: (**ds**) Bright 1985c: 171. (**tx**) Bright 1972d: 28, 35, 75, 1985c: 171, 177, 179; McNamara 1977: 194.

***lucidus* Wood** 1974a: 6. Holotype ♂; about 260 km N Xavantina, Mato Grosso, Brazil (12 degrees 49′ S, 51 degrees 46′ W); BMNH, London.
Distribution: South America (Brazil).
References: (**hb**) Beaver 1973a. (**ds**) Beaver 1973a; Wood, S. L. 1974a: 6.

***striatus* Eggers** 1933b: 16. Holotype, sex?; Venezuela; USNM, Washington.
Distribution: South America (Venezuela).
References: (**ds**) Blackwelder 1947: 787. (**tx**) Anderson, W. H. & Anderson 1971: 31; Eggers 1933b: 14, 16.

Distribution: South America (Bolivia).
References: (**tx**) Anderson, W. H. & Anderson 1971: 23; Eggers 1943a: 353.

***opimus* Wood** 1969b: 7. Holotype ♂; Zamerano, Morazan, Honduras; Wood Collection.
Distribution: North America (Guatemala/ Honduras/ Jalisco, Morelos in Mexico).
Hosts: *Ficus* spp., *Celtis iguanae, Serjania triquetra*.
References: (**ec**) Equihua & Atkinson 1986: 625. (**hb**) Burgos & Saucedo 1983: 62; Equihua & Atkinson 1986: 625; Wood, S. L. 1982: 275. (**ds**) Burgos & Saucedo 1983: 62; Equihua & Atkinson 1986: 625; Wood, S. L. 1982b: 275. (**tx**) Wood, S. L. 1969b: 7, 1982b: 275.

***ovatus* (Eggers)** 1943a: 347 (*Dryotomus*). Holotype ♂; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
References: (**tx**) Anderson, W. H. & Anderson 1971: 23; Eggers 1943a: 347.

***pacificus* Bright** 1982a: 128. Holotype ♀; Coco Island (Costa Rica); LACM, California.
Figures: Bright 1982a: 129.
Distribution: North America (Isla del Coco in Costa Rica).
References: (**tx**) Bright 1982a: 128–129.

***perfoliatus* (Wollaston)** 1854: 301 (*Phloeophthorus*). Syntypes 2, sex?; Maderae: Lombo das Vacas; BMNH, London.

Distribution: Africa (Madeira Island), Europe (Corsica/ Sardinia/ Spain).
Hosts: *Calycotome* sp., *Cytisus* sp.
References: (**ds**) Hagedorn 1910d: 33; Lacordaire 1866: 364; Stein 1868: 113; Stein & Weise 1877: 163; Wollaston 1854: 301, 1857: 99. (**tx**) Balachowsky 1949a: 115; Hopkins 1914: 126; Lacordaire 1866: 364; Letzner 1891: 374; Pfeffer 1972b: 34; Schedl 1934f: 1641; Wollaston 1854: 301, 1857: 99.

abeillei Guillebeau 1893: 58 (*Phloeophthorus*). Syntypes, sex?; Corse; not located. Synonymy: Pfeffer 1972b: 34.
References: (**ec**) Kleine 1908c: 179. ***perniciosus* Wood** 1982a: 229. Holotype ♂; Patzucuaro-Ario de Rosales highway, Michoacan, Mexico; Wood Collection.
Distribution: North America (Michoacan, Morelos in Mexico).
Hosts: *Prunus serotina*.
References: (**hb**) Atkinson & Equihua 1985b: 230; Burgos & Saucedo 1983: 64. (**ds**) Atkinson & Equihua 1986: 230; Burgos & Saucedo 1983: 64; Wood, S. L. 1982a: 229. (**tx**) Wood, S. L. 1982a: 229.

***peruensis* Schedl** 1942: 67. Holotype ♂; Peru: Rio Toro; Schedl Collection in NHMW, Wien.
Distribution: South America (Peru).
Notes: (1) Schedl 1952h: 69 (1942 journal containing original description lost before mailing, reprinted in 1952h: 69).
References: (**tx**) Nunberg 1956a: 144; Schedl 1942: 67, 1952h: 64, 69.

***peyerimhoffi* (Eggers)** 1913c: 239 (*Phloeophthorus*). Syntypes 2 ♂; Algier; Eggers Collection, 1 in NHMW, Wien.
Distribution: Africa (Algeria/ Morocco), Europe (Spain).
Hosts: *Cytisus triflorus*, *Genista numidica*, *Retana bovei*.
Notes: (1) Schedl 1979c: 192 (citation of holotype invalid).
References: (**hb**) Peyerimhoff 1915: 60. (**ds**) Kleine 1914a: 16; Pfeffer 1947d: 127. (**tx**) Eggers 1913c: 239; Pfeffer 1955a: 130, 1982a: 466; Schedl 1934f: 1641, 1979c: 192.

***piceae* Swaine** 1911a: 220. Lectotype ♀; Ste. Anne de Bellevue, P. Q., Canada; CNCI, Ottawa, designated by Bright 1967b: 677.
Figures: Ashworth & Brophy 1972: 2983, Ashworth, Clayton, & Bickley 1972: 180, Swaine 1911a: 224 (antenna, metatibia).
Distribution: North America (Alaska/ Manitoba, Northwest Territories, Ontario, Quebec, Yukon in Canada/ Maine, Minnesota, New York in USA).
Hosts: *Picea glauca*.

Distribution: South America (Brazil).

References: (**ds**) Blackwelder 1947: 785; Hagedorn 1910a: 18; Kleine 1912b: 174, 1914b: 336; Schedl 1973c: 153, 1976a: 51. (**tx**) Blandford 1897a: 156; Hagedorn 1910a; Schedl 1979c: 268; Schwarz 1920: 224.

Genus *Hyleops* Schedl

HYLEOPS SCHEDL 1938f: 35. Type-species: *Hyleops glabratus* Schedl, monobasic.

References: (**hb**) Wood, S. L. 1986a: 52. (**ds**) Wood, S. L. 1986a: 52. (**tx**) Schedl 1938f: 35; Wood, S. L. 1986a: 52.

***glabratus* Schedl** 1938f: 36. Syntypes ♂; Nanango, Queensland, Australia; BMNH, London, and Schedl Collection in NHMW, Wien.

Figures: Schedl 1938f: 35.

Distribution: Australia (Queensland).

Hosts: *Araucaria cunninghamii*.

References: (**bv**) Wylie 1982. (**cn**) Wylie 1982; Yule 1873. (**hb**) Wylie 1982. (**ds**) Schedl 1975h: 352. (**tx**) Schedl 1938f: 36, 1979c: 105.

Genus *Carphotoreus* Wood

CARPHOTOREUS WOOD 1973c: 171. Type-species: *Chaetophloeus alni* Bright, original designation.

References: (**hb**) Wood, S. L. 1986a: 52. (**ds**) Wood, S. L. 1986a: 52. (**tx**) Wood, S. L. 1973c: 171, 1982b: 285, 1986a: 52.

***alni* (Bright)** 1972b: 1492 (*Chaetophloeus*). Holotype ♀; 42 km S Juchatengo, Oaxaca, Mexico; CNCI, Ottawa.

Figures: Bright 1972b: 1490.

Distribution: North America (Oaxaca in Mexico).

Hosts: *Alnus* sp.

Notes: (1) Wood 1973c: 171 (to *Carphotoreus*).

References: (**ds**) Wood, S. L. 1982b: 285. (**tx**) Bright 1972b: 1490, 1492; McNamara 1977: 194; Wood, S. L. 1973c: 171, 1982b: 285.

Genus *Catenophorus* Nunberg

CATENOPHORUS NUNBERG 1956b: 195. Type-species: *Catenophorus congonus* Nunberg, original designation.

References: (**hb**) Wood, S. L. 1986a: 52. (**ds**) Wood, S. L. 1986a: 52. (**tx**) Nunberg 1956b: 195; Wood, S. L. 1986a: 52.

***congonus* Nunberg** 1956b: 197. Holotype ♀; Belgian Congo; IZW, Warsaw.

Distribution: Africa (Zaire).

References: (**tx**) Nunberg 1956b: 197.

Genus *Cladoctonus* Strohmeyer

CLADOCTONUS STROHMEYER 1911b: 17. Type-species: *Cladoctonus affinis* Strohmeyer, monobasic.

Hoplites Eggers 1923a: 140. Type-species: *Hoplites banosus* Eggers, monobasic, preoccupied by Dejean 1833: 150.
References: (**tx**) Eggers 1923a: 140–141, 1940a: 123–141; Wood, S. L. 1961c: 2, 1982b: 286.

Hoplitontus Wood 1961c: 2. Type-species: *Hoplites banosus* Eggers, automatic, replacement name for *Hoplites* Eggers. Synonymy: Schedl 1963h: 264.
References: (**tx**) Schedl 1963h: 264; Wood, S. L. 1961c: 2, 1982b: 286.

Hoplitophthorus Wood 1961c: 2. Type-species: *Hoplitophthorus sentosus* Wood = *Hoplites interruptus* Eggers, original designation. Synonymy: Schedl 1963h: 264.
References: (**tx**) Schedl 1963h: 264; Wood, S. L. 1961c: 2, 1982b: 286.

Notes: (3) Schedl 1957b: 150, 1959n: 392 (cites *robustus*, nomen nudum).

***affinis* Strohmeyer** 1911h: 17. Holotype, sex?; Aethiopia; Strohmeyer Collection.
Figures: Strohmeyer 1911h: 17 (antenna, tibia), Schedl 1959n: 390 (antenna).
Distribution: Africa (Ethiopia).
References: (**ds**) Kleine 1912b: 169, 1914b: 324; Schedl 1979b: 415, 1982: 278. (**tx**) Eggers 1920: 118; Hopkins 1914: 118; Lucas 1920: 188; Schedl 1959n: 390; Strohmeyer 1911h: 17–18; Wichmann 1911b: 174. (**ms**) Lucas 1920: 188.

***amanicus* Eggers** 1920: 118. Holotype, sex?; Amani, Ostafrika; Hamburg Museum, lost. Neotype, ♀; Kenya; Schedl Collection in NHMW, Wien, designated by Schedl 1979c: 17.
Distribution: Africa (Kenya/ Tanzania).
Hosts: *Acacia xanthophloea*.
References: (**ds**) Gardner 1957a: 30. (**tx**) Eggers 1920: 118, 1932c: 23, 1936c: 33–34; Schedl 1959n: 391, 1979c: 17.

***atrocis* Wood** 1974a: 12. Holotype ♂; about 260 km N Xavantia, Mato Grosso, Brazil, at 12 degrees 49′ South, 51 degrees 46′ West; BMNH, London.
Distribution: South America (Brazil).
References: (**tx**) Wood, S. L. 1974a: 12.

***banosus* (Eggers)** 1923a: 141 (*Hoplites*). Lectotype, sex?; Philippine Islands: Los Banos (Luzon); USNM, Washington, designated by Anderson & Anderson 1971: 5.
Distribution: Indonesia (Java), Philippine Islands (Luzon).
References: (**hb**) Kalshoven 1958b: 163. (**ds**) Schedl 1966b: 5. (**tx**) Anderson, W. H. & Anderson 1971: 5; Eggers 1923a: 141, 1927b: 406, 1940a: 125; Nobuchi 1983: 299; Schedl 1963h: 262, 1979c: 33; Wood, S. L. 1961c: 2.

nonseptis Schedl 1942a: 173 (*Phloeosinus*). Syntypes, sex?; Philippinen, Los Banos; BMNH, London, and Schedl Collection in NHMW, Wien. Synonymy: Schedl 1963h: 262.
References: (**hb**) Zocchi 1956: 141. (**ds**) Nobuchi 1983: 299; Razzauti 1956: 141; Schedl 1966b: 10. (**tx**) Schedl 1942a: 173, 1963h: 262; Zocchi 1956: 141.

***brevisetosus* Bright** 1972d: 46. Holotype ♂?; Duncans, Trelawny Parish, Jamaica; CNCI, Ottawa.
Figures: Bright 1972d: 35.
Distribution: Antilles Islands (Jamaica).
References: (**ds**) Bright 1985c: 171. (**tx**) Bright 1972d: 35, 46, 1985c: 171; McNamara 1977: 194.

***contractus* Schedl** 1975f: 340. Holotype, sex?; Bulolo, Morobe District, New Guinea; Schedl Collection in NHMW, Wien.
Distribution: New Guinea.
References: (**tx**) Schedl 1975f: 340.

***corumbensis* (Eggers)** 1951: 149 (*Hoplites*). Holotype, sex?; Brasil (Corumba, Staat Matto Grosso; Eggers Collection, in NHMW, Wien.
Distribution: South America (Bolivia/ Brazil).
References: (**tx**) Eggers 1951: 149; Schedl 1979c: 66; Wood, S. L. 1961c: 2.

boliviae Wood 1961d: 106 (*Hoplitophthorus*). Holotype ♀; route between Boyuibe to Charagua via Cueva, Ingri, etc., Bolivia; USNM, Washington. Synonymy: Wood 1985: 266.
References: (**tx**) Schedl 1963j: 479; Wood, S. L. 1961d: 106, 1985: 266.

***cubensis* (Wood)** 1961d: 107 (*Hoplitophthorus*). Holotype ♂; Cayamas, Cuba; USNM, Washington.
Figures: Atkinson 1989a: 63.
Distribution: Antilles Islands (Cuba), North America (Campeche in Mexico).
Hosts: *Brosimum alicastrum*.
References: (**ds**) Atkinson 1989a: 59; Bright 1985c: 171. (**tx**) Atkinson 1989a: 63; Bright 1985c: 171; Schedl 1963j: 479; Wood, S. L. 1961d: 107.

***eggersi* Wichmann** 1911b: 174. Syntypes 3, sex?; Aethiopia (Harras); Wichmann Collection, not located.
Distribution: Africa (Ethiopia/ Kenya/ Tanzania).
Hosts: *Acacia* sp.
References: (**ds**) Gardner 1957a: 30; Schedl 1959q: 705, 1975h: 350, 1975k: 275, 1977c: 394. (**tx**) Eggers 1920: 118, 1936c: 33–35; Schedl 1958: 705, 1959n: 391, 1979c: 86; Wichmann 1911b: 174, 1914: 414.

***elongatus* Schedl** 1967e: 222. Holotype, sex?; Mount Fouari reservation near Gabon and Nigeria; NHMB, Budapest.
Distribution: Africa (Gabon/ Nigeria).
References: (**ds**) Schedl 1972e: 279. (**tx**) Schedl 1967e: 222, 1979c: 89.

***interruptus* (Eggers)** 1940a: 126. Holotype, sex?; Guadeloupe: Fleutiaux Collection, cotype Eggers Collection, this cotype in NHMW, Wien.
Distribution: Antilles Islands (Guadeloupe), South America (Colombia).
Hosts: *Artocarpus* sp. *Citrus sinensis*.
References: (**ds**) Bright 1985c: 171. (**tx**) Bright 1985c: 171; Eggers 1940a: 126; Wood, S. L. 1961c: 2.

sentus Wood 1961c: 3 (*Hoplitophthorus*). Holotype ♂; La Cuchilla, Sevilla, Colombia; Wood Collection. Synonymy: Wood 1985: 267.
References: (**ds**) Bright 1985c: 171. (**tx**) Bright 1985c: 171; Wood, S. L. 1961c: 3, 1961d: 107, 1985: 267.

***major* (Eggers)** 1940a: 125 (*Hoplites*). Holotype, sex?; Guadeloupe (Trois-Rivieres); MNHN, Paris, cotype Eggers Collection, this cotype in NHMW, Wien.
Distribution: Antilles Islands (Guadeloupe).
Hosts: *Ficus laurifolia*.
References: (**ds**) Bright 1985c: 171. (**tx**) Bright 1985c: 171; Eggers 1940a: 125–126, 1951: 149; Schedl 1979c: 145; Wood, S. L. 1961c: 2.

***natalensis* Eggers** 1936c: 34. Holotype, sex?; Natal: Malvern; BMNH, London.
Figures: Schedl 1959r: 389 (adult).
Distribution: Africa (Natal in South Africa).
Hosts: *Acacia* sp.
References: (**tx**) Eggers 1936c: 34–35; Schedl 1959n: 392, 1979c: 163.

***similis* Nunberg** 1969a: 391. Holotype, sex?; Cote d'Ivoire, Bingerville; MRCB, Tervuren.
Distribution: Africa (Ivory Coast).
References: (**tx**) Nunberg 1969a: 391.

***tuberculatus* Schedl** 1973a: 369. Holotype, sex?; Bolivien, Guayaramerin (Beni), 200 m from river; NHMB, Budapest.
Distribution: South America (Bolivia).
References: (**tx**) Schedl 1973a: 369.

Genus *Phloeosinopsioides* Schedl

PHLOEOSINOPSIOIDES SCHEDL 1964k: 317. Type-species: *Phloeosinopsis triseriatus* Schedl, automatic, replacement name for *Phloeosinopsis* Schedl 1964c: 297 (nec 1936j: 23).

Phloeosinopsis Schedl 1964c: 297. Type-species: *Phloeosinopsis triseriatus* Schedl, original designation, preoccupied by Schedl 1936j: 23.

° ***wolffi* (Schedl)** 1947a: 40 (*Phloeosinites*). Holotype, sex?; Baltic ambre; Geologisch-Paleontologische Institut, Albertus Universitat, Konigsberg.
Figures: Schedl 1947a: 41 (adult).
Distribution: Europe (fossil in Baltic amber).
References: (**ds**) Spahr 1981. (**tx**) Schedl 1947a: 17, 40.

Genus *Hyledius* Sampson

HYLEDIUS SAMPSON 1921: 35. Type-species: *Hylesius asper* Sampson = *Olonthogaster nitidicollis* Motschulsky, monobasic.

Holonthogaster Gemminger & Harold 1872: 2676. Type-species: *Olonthogaster nitidicollis* Motschulsky, automatic.
References: (**tx**) Gemminger & Harold 1872: 2676; Lucas 1920: 331.

Olonthogaster Motschulsky 1866: 401. Type-species: *Olonthogaster nitidicollis* Motschulsky, subsequent designation by Hopkins 1914: 67.
Status: International Commission on Zoological Nomenclature (ICZN 1981: 67) suppressed this name to preserve *Phloeosinus*.
Synonymy: Wood 1986a: 52.
References: (**tx**) Hagedorn 1910a: 161, 1910d: 118; Lucas 1920: 455; Motschulsky 1866: 410; Wood, S. L. 1969c: 113, 1974: 236, 1986a: 52.

Hylurgulus Eggers 1927b: 392. Type-species: *Hylurgulus sumatranus* Eggers, monobasic.
Synonymy: Wood 1986a: 52.
References: (**tx**) Eggers 1927b: 382–393; Schedl 1959a: 472; Wood, S. L. 1986a: 52.

Phloeosinopsis Schedl 1936j: 23. Type-species: *Phloeosinopsis armatus* Schedl = *Phloeosinus spinifer* Schedl, original designation.
Synonymy: Wood 1986a: 52.
References: (**tx**) Browne 1963c: 53; Schedl 1936j: 23; Wood, S. L. 1974g: 236.

Notes: (3) Browne 1961c: 64 (cites *rugicollis* Schedl, nomen nudum).
References: (**hb**) Wood, S. L. 1986a: 52. (**ds**) Wood, S. L. 1986a: 52. (**tx**) Sampson 1921: 35; Schedl 1958k: 152; Wood, S. L. 1986a: 52.

***birmanus* (Eggers)** 1923a: 138 (*Phloeosinus*). Holotype ♀; Birma; Hamburg Museum, lost, Prague Museum, Eggers cotype apparently in NHMW, Wien.
Distribution: Asia (Burma).
References: (**ds**) Nobuchi 1983: 299; Razzauti 1956: 141; Schedl 1966b: 6. (**tx**) Eggers 1923a: 138, 1925: 152, 1927b: 391; Schedl 1958k: 141.

***borneensis* (Schedl)** 1942a: 172 (*Phloeosinus*). Holotype ♀; Borneo; Schedl Collection in NHMW, Wien.
Distribution: Asia (Vietnam), Indonesia (Borneo).
References: (**hb**) Zocchi 1956: 141. (**ds**) Razzauti 1956: 141; Schedl 1965a: 339, 1975a: 454. (**tx**) Schedl 1942a: 172, 1953b: 123; Zocchi 1956: 141.

***brunneus* (Browne)** 1980a: 373 (*Phloeosinus*). Holotype ♀; Pontianak (Kalimantan) to Shimizu (imported to Japan from Indonesia); BMNH, London.
Distribution: Probably Indonesia.
References: (**tx**) Browne 1980a: 373.

***canus* (Browne)** 1972: 20 (*Phloeosinus*). Holotype, sex?; Thailand; BMNH, London.
Distribution: Asia (Thailand).
References: (**ds**) Beaver & Browne 1975: 292. (**tx**) Browne 1972: 20.

***ceylonicus* (Schedl)** 1959a: 473 (*Phloeosinus*). Syntypes ♂; Millawitiya Estate, Ceylon; Schedl Collection in NHMW, Wien.
Distribution: Asia (Yunnan in China/ Sri Lanka).
Hosts: *Myristica dactyloides*.
References: (**ds**) Schedl 1959a: 473. (**tx**) Schedl 1959a: 473.

***concinnulus* (Walker)** 1859: 261 (*Hylurgus*). Holotype ♂; Ceylon; BMNH, London.
Distribution: Asia (Sri Lanka).
Hosts: *Myristica dactyloides*.
References: (**hb**) Zocchi 1956: 141. (**ds**) Hagedorn 1910d: 26; Kleine 1912b: 183, 1914b: 273; Lacordaire 1866: 359; Razzauti 1956: 141; Schedl 1959a: 473, 1979c: 361. Distribution: New Guinea.
References: (**hb**) Zocchi 1956: 141. (**ds**) Razzauti 1956: 141; Schedl 1936g: 521. (**tx**) Schedl 1936g: 521, 1979c: 184; Zocchi 1956: 141.

***penangensis* (Schedl)** 1975j: 295 (*Phloeosinus*). Holotype ♀; Penang, Lamb; Schedl Collection in NHMW, Wien.
Distribution: Asia (Malaya).
References: (**tx**) Beaver & Browne 1978: 592; Schedl 1975j: 295.

***regalis* (Wood)** 1988b: 198 (*Olonthogaster*). Holotype ♀; Weddegala, Ratnapura District, Sri Lanka; USNM, Washington.
Distribution: Asia (Sri Lanka).
Hosts: *Myristica dactyloides*.
References: (**tx**) Wood, S. L. 1988b: 198.

***solomonicus* (Browne)** 1980c: 494 (*Phloeosinus*). Holotype, sex?; Viru Harbour (Solomon Islands) to Tagonoura (imported to Japan from Solomon Islands); BMNH, London.
Distribution: Solomon Islands.
References: (**ds**) Ohno et al. 1988a: 91, 1989: 60. (**tx**) Browne 1980c: 494.

***spinifer* (Browne)** 1963c: 53 (*Phloeosinus*). Holotype, sex?; Malay Peninsula, Selangor: Sungai Buloh; BMNH, London, automatic.
Figures: Schedl 1936j: 24.
Distribution: Asia (Malaya).
References: (**ds**) Browne 1986c: 662. (**tx**) Browne 1963c: 53.

armatus Schedl 1936j: 23 (*Phloeosinopsis*). Holotype, sex?; Malay Peninsula, Selangor: Sungai Buloh; BMNH, London, preoccupied by Reitter 1887b: 192.
References: (**ds**) Browne 1961c: 64, 1963c: 24; Schedl 1936j: 23.

***subcarinatus* (Schedl)** 1942a: 173 (*Phloeosinus*). Holotype, sex?; Malaya, Rotan Tunggal F. R.; Schedl Collection in NHMW, Wien.
Distribution: Asia (Malaya).
Hosts: Myristicaceae.
References: (**hb**) Zocchi 1956: 142. (**ds**) Browne 1961c: 64; Razzauti 1956: 142. (**tx**) Schedl 1942a: 173; Zocchi 1956: 142.

***sumatranus* (Eggers)** 1923a: 140 (*Phloeosinus*). Holotype ♀; Si Rambe auf Sumatra; MCG, Genova.
Distribution: Indonesia (Si Rambe Island near Sumatra).
References: (**hb**) Zocchi 1956: 142. (**ds**) Razzauti 1956: 142. (**tx**) Anderson, W. H. & Anderson 1971: 33; Eggers 1923a: 140, 1925: 152, 1927b: 393, 1940: 62; Zocchi 1956: 142.

***takahashii* (Browne)** 1981b: 600 (*Phloeosinus*). Holotype, sex?; Katapang (Borneo) to Omaegaki (imported to Japan from Borneo); BMNH, London.
Distribution: Indonesia (Borneo).
References: (**tx**) Browne 1981b: 600.

***tuberculosus* (Browne)** 1970: 544 (*Phloeosinus*). Holotype ♀; Burma: Katha, Pinwe; BMNH, London.
Distribution: Asia (Burma).
Hosts: *Castanopsis* sp.
References: (**ds**) Browne 1980c: 483; Mathew 1982, 1987: 188. (**tx**) Beaver & Browne 1978: 593; Browne 1970: 544.

***vilis* (Blandford)** 1896b: 199 (*Phloeosinus*). Syntypes ♂ ♀; Sumatra; BMNH, London.
Distribution: Indonesia (Sumatra).
References: (**hb**) Zocchi 1956: 142. (**ds**) Browne 1970: 539, 1980a: 371; Hagedorn 1910d: 118; Kleine 1912b: 183, 1914b: 285. (**tx**) Blandford 1896b: 199; Hagedorn 1910a: 66; Schedl 1942a: 173; Zocchi 1956: 142.

***xanthophylli* (Browne)** 1949b: 896 (*Phloeosinus*). Holotype, sex?; Malaya: Kelantan, Jeram; BMNH, London.
Distribution: Asia (Malaya).
Hosts: *Xanthophyllum* sp.
References: (**hb**) Browne 1961c: 64; Zocchi 1956: 142. (**ds**) Browne 1961c: 64. (**tx**) Browne 1949b: 896; Zocchi 1956: 141.

Genus *Pseudochramesus* Blackman

PSEUDOCHRAMESUS BLACKMAN 1939: 87. Type-species: *Chramesus acuteclavatus* Hagedorn, original designation.
Keys: Blackman 1939: 88.
References: (**hb**) Wood, S. L. 1986a: 52. (**ds**) Wood, S. L. 1986a: 52. (**tx**) Blackman 1939: 87–88; Schedl 1958f: 33–46; Wood, S. L. 1986a: 52.

***abbreviatus* Schedl** 1951m: 94. Syntypes, sex?; Brasilien, Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Distribution: South America (Brazil).

Notes: (1) Schedl 1979c: 8 (citation of holotype invalid).
References: (**tx**) de Ruette 1970: 112; Schedl 1951m: 90, 94, 1979c: 8.

***acuteclavatus* (Hagedorn)** 1909a: 742 (*Chramesus*). Holotype, sex?; La Plata, Argentina; Hamburg Museum, lost.
Distribution: South America (Argentina/ Bolivia/ Brazil).
Notes: (1) Blackman 1939: 87 (to *Pseudochramesus*), (3) Blackman 1939: 87 (redescribed).
References: (**ds**) Blackwelder 1947; Bruch 1914a; Hagedorn 1910d: 19; Kleine 1914b: 333; Nunberg 1962: 223; Schedl 1972g: 42. (**tx**) Blackman 1938b: 534, 1939: 87; Hagedorn 1909a: 742, 1910a: 67; Nunberg 1962: 223; Schedl 1938i: 23.

***brasiliensis* Schedl** 1948f: 265. Syntypes ♀; Brasil, Nova Teutonia; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Distribution: South America (Brazil).
Notes: (1) Schedl 1979c: 45 (citation of holotype invalid).
References: (**ds**) Schedl 1966f: 82. (**tx**) Schedl 1948f: 265, 1979c: 45.

***costulatus* Blackman** 1939: 91. Holotype ♂; Boyuibe to Charagua, Bolivia; USNM, Washington.
Distribution: South America (Argentina/ Bolivia).
References: (**ds**) Blackwelder 1947. (**tx**) Blackman 1939: 91.

***duplosquamosus* Schedl** 1963d: 215. Holotype ♀; Brasilien: Matto Grosso, Rio Caraguata; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1963d: 215.

***harringtoni* Blackman** 1939: 93. Holotype ♂; Aguio, Bolivia; USNM, Washington.
Distribution: South America (Argentina/ Bolivia).
References: (**ds**) Blackwelder 1947; Nunberg 1962: 223. (**tx**) Blackman 1939: 93; Nunberg 1962: 223.
multiseriatus Schedl 1978c: 296. Holotype ♀; Argentina, Tablillas Salta; Schedl Collection in NHMW, Wien. Synonymy: Wood 1988b: 189.
References: (**tx**) Schedl 1978c: 296; Wood, S. L. 1988b: 189.

***jaliscoensis* Wood** 1987: 549. Holotype ♂; Carretera Barra Navidad-Puerto Vallarta, Jalisco, Mexico; Wood Collection.
Figures: Atkinson 1989a: 64.
Distribution: North America (Jalisco in Mexico).
Hosts: *Cynometra oaxacana*.
References: (**tx**) Atkinson 1989a: 64; Wood, S. L. 1987: 549.

***manni* Blackman** 1939: 88. Holotype ♀; Beni River, below Riberalta, Bolivia; USNM, Washington.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947. (**tx**) Blackman 1939: 88; Schedl 1948f: 265.

***opacus* Schedl** 1963d: 216. Syntypes ♂; Brasilien: Matto Grosso, Rio Caraguata; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Distribution: South America (Brazil).
Notes: (3) Schedl 1979c: 179 (citation of holotype invalid).
References: (**hb**) Beaver 1973b. (**ds**) Beaver 1973b; Schedl 1973d: 153. (**tx**) Schedl 1963d: 216, 1979c: 179.

***semibrunneus* (Eggers)** 1951: 145 (*Chramesus*). Holotype ♀; Brasil; USNM, Washington.
Distribution: South America (Brazil).
Hosts: *Piptadenia* sp.
Notes: (1) Wood 1986c: 269 (to *Pseudochramesus*).
References: (**tx**) Anderson, W. H. & Anderson 1971: 29; Eggers 1951: 145; Schedl 1979c: 223; Wood, S. L. 1986c: 269.

***setifer* Schedl** 1951m: 93. Holotype ♀; Brasilien, Bahia, Cachoerinha-Una; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**ds**) Schedl 1966f: 82. (**tx**) Schedl 1951m: 93.

***vianai* Schedl** 1958f: 39. Syntypes ♂ ♀; Argentinien: Buenos Aires: Tigre; Schedl Collection in NHMW, Wien, and Viana Collection.
Distribution: South America (Argentina).
Notes: (3) Schedl 1979c: 267 (citation of holotype invalid).
References: (**hb**) Viana 1964: 128. (**ds**) Schedl 1979e: 57; Viana 1964: 128. (**tx**) Schedl 1958f: 39, 1979c: 267.

Genus *Chramesus* LeConte

CHRAMESUS LECONTE 1868: 168. Type-species: *Chramesus hicoriae* LeConte, monobasic.
Rhopalopleurus Chapuis 1869: 46. Type-species: *Rhopalopleurus tuberculatus* Chapuis, subsequent designation by Hopkins 1914: 128. Synonymy: LeConte 1876: 374.
References: (**tx**) Blackman 1938b: 535; Chapuis 1869: 46, 1873: 254; Hopkins 1914: 128; LeConte 1876: 374; Lucas 1920: 572; Swaine 1909: 88, 1918a: 58.
Thaumasinulus Reitter 1913a: 39. Type-species: *Dendrosinus bonnairei* Reitter = *Rhopalopleurus rotundatus* Chapuis, monobasic. Synonymy: Eggers 1940h: 61.
References: (**tx**) Eggers 1940h: 61; Lucas 1920: 636; Reitter 1913a: 39.
Prochramesus Wood 1956c: 254. Type-species: *Prochramesus annectans* Wood, original designation. Synonymy: Schedl 1963h: 258.
References: (**tx**) Schedl 1963h: 258; Wood, S. L. 1956c: 254.
Keys: Blackman 1938b: 536, Wood 1982b: 316.
References: (**hb**) Wood, S. L. 1986a: 52. (**ds**) Wood, S. L. 1986a: 52. (**tx**) Beal & Massey 1945:

L. 1956c: 253, 1967b: 79–96, 1986a: 52.

***aberrans* Schedl** 1951m: 90. Syntypes ♂; Brasilien, Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Distribution: South America (Brazil).
Notes: (1) Schedl 1979c: 8 (citation of holotype invalid).
References: (**tx**) Nunberg 1962: 226; Schedl 1951m: 90, 1979c: 8.

***acacicolens* Wood** 1969b: 3. Holotype ♂; Finca La Pacifica, 4 km NW Canas, Guanacaste Prov., Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Acacia* sp.
References: (**hb**) Wood, S. L. 1982b: 346. (**ds**) Wood, S. L. 1982b: 346. (**tx**) Wood, S. L. 1969b: 3, 1982b: 346.

***advena* Schedl** 1951m: 91. Syntypes ♀; Brasilien, Bahia, Cachoeirinha-Una; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
Notes: (3) Schedl 1979c: 12 (citation of holotype invalid).
References: (**ds**) Schedl 1972g: 42, 1976a: 51. (**tx**) Schedl 1951m: 91, 1979c: 12.

***annectens* (Wood)** 1956c: 254 (*Prochramesus*). Holotype ♀; Nochixtlan, Oaxaca, Mexico; SMUK, Lawrence.
Distribution: North America (Hidalgo, Morelos, Oaxaca, Puebla in Mexico).
Hosts: *Agave* sp., *Hechtia podantha, Nolena* sp.
Notes: (1) A typographical error in the original description qualifies as a lapsus calami; consequently, the spelling is corrected here from *annectans* to *annectens*. Schedl 1963h: 262 (to *Chramesus*).

***asperulus* Schedl** 1978c: 294. Holotype ♀; Brasilien, Encruzilhada, 980 m, Bahia; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).

References: (**ds**) Schedl 1976a: 51. (**tx**) Schedl 1978c: 294.

***atkinsoni* Wood** 1981: 123. Holotype ♂; Cerro Chipinque, Monterrey, Nuevo Leon, Mexico; Wood Collection.
Distribution: North America (Nuevo Leon in Mexico).
Hosts: *Carya* sp., *Persea* sp.
References: (**hb**) Atkinson & Equihua 1985b: 231. (**ds**) Atkinson & Equihua 1985b: 231; Wood, S. L. 1982b: 335. (**tx**) Wood, S. L. 1981: 123, 1982b: 335.

***badius* Schedl** 1951m: 88. Holotype ♂; Brasilien, Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1951m: 88, 1979c: 32.

***bicolor* Wood** 1967b: 91. Holotype ♂; La Lima, Cortez, Honduras; Wood Collection.
Distribution: North America (Honduras).
Hosts: *Cestrum scandens*.
References: (**hb**) Wood, S. L. 1982b: 345. (**ds**) Wood, S. L. 1982b: 345. (**tx**) Wood, S. L. 1967b: 91–92, 1982b: 345.

***bispinus* Wood** 1982a: 225. Holotype ♂; Tenerife, Valle, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Passiflora mollisima*.
References: (**tx**) Wood, S. L. 1982a: 225.

***bolivianus* Schedl** 1973a: 370. Holotype ♀?; Bolivien, Valle of Rio Abaho (La Paz), 3,200 m; NHMB, Budapest.
Distribution: South America (Bolivia).
References: (**tx**) Schedl 1973a: 370.

***brasiliensis* Nunberg** 1962: 224. Holotype ♂; Serra do Urucum, Corumba, Estado de Mato Grosso, Brasilien; DZSA, Sao Paulo.
Figures: Nunberg 1962: 225.
Distribution: South America (Brazil).
Notes: (3) In his collection, Schedl treated this as a synonym of *corumbensis* [not examined by us].
References: (**tx**) Nunberg 1962: 224–225.

***cecropiae* Wood** 1969b: 5. Holotype ♂; 4 km SW Rincon de Osa, Puntarenas, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Cecropia* leaf petiole.
References: (**ds**) Wood, S. L. 1982b: 330. (**tx**) Wood, S. L. 1969b: 5, 1982b: 330.

***chapuisi* LeConte** 1876: 375. Holotype ♀; Louisiana [USA]; MCZ, Cambridge.
Distribution: North America (San Luis Potosi, Veracruz in Mexico/ Florida, E Kansas, Louisiana, Maryland, Mississippi, Pennsylvania, Texas in USA).
Hosts: *Celtis occidentalis*, *C.* sp., *Rhamnus capraefolia*, possibly *Robinia* sp.
Notes: (3) Blackman 1938b: 542 (redescribed).

Distribution: North America (Chiapas in Mexico).
Hosts: *Acacia* sp.
References: (**ds**) Wood, S. L. 1982b: 346. (**tx**) McNamara 1984: 752; Wood, S. L. 1974a: 9, 1982b: 346.

***editus* (Bright)** 1972b: 1495 (*Prochramesus*). Holotype ♀; 20.5 km N Oaxaca, Oaxaca, Mexico; CNCI, Ottawa.
Figures: Bright 1972b: 1490.
Distribution: North America (Durango, Morelos, Oaxaca in Mexico).
Hosts: *Lupinus* sp.
References: (**hb**) Atkinson & Equihua 1985a: 78; Atkinson et al. 1986: 22. (**ds**) Atkinson & Equihua 1985a: 78; Atkinson et al. 1986: 22; Wood, S. L. 1982b: 327. (**tx**) Bright 1972b: 1490, 1495; McNamara 1977: 198; Wood, S. L. 1982b: 327.

***erinaceus* Schedl** 1967d: 7. Holotype ♂; Brasilien, Nova Teutonia; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
Notes: (3) Schedl 1978c: 295 (described female).
References: (**tx**) Schedl 1967d: 7, 1978c: 295, 1979c: 91.

***eurypterus* Schedl** 1963d: 214. Holotype ♂; Brasilien, Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**ds**) Schedl 1973d: 153. (**tx**) Schedl 1963d: 214, 1973d: 168–169, 1979c: 93.

***exilis* Wood** 1983a: 653. Holotype ♂; El Tuito, Jalisco, Mexico; Wood Collection.
Distribution: North America (Jalisco in Mexico).
Hosts: *Smilax* sp.
References: (**hb**) Atkinson & Equihua 1985b: 231. (**ds**) Atkinson & Equihua 1985b: 231. (**tx**) Wood, S. L. 1983a: 653.

***exul* Wood** 1983a: 653. Holotype ♂; 9 km SE Totolapan, Oaxaca, Mexico; Wood Collection.
Distribution: North America (Jalisco, Oaxaca in Mexico).
Hosts: Leguminosae, *Croton pseudoniveus*, *C.* sp.
References: (**ec**) Equihua & Atkinson 1986: 625. (**hb**) Equihua & Atkinson 1986: 625. (**ds**) Equihua & Atkinson 1986: 625. (**tx**) Wood, S. L. 1983a: 653.

***globosus* Hagedorn** 1909a: 742. Holotype, sex?; Argentinien, La Plata; Hamburg Museum, lost.
Distribution: South America (Argentina).
References: (**hb**) Bruch 1940; Viana 1964: 127. (**ds**) Blackwelder 1947; Bruch 1914a; Hagedorn 1910d: 19; Kleine 1912b: 175, 1914b: 333; Schedl 1978c: 291, 1979e: 57; Viana 1964: 127. ***hylurgoides* Schedl** 1963d: 214. Syntypes ♀; Brasilien: Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
Notes: (3) Schedl 1979c: 120 (citation of holotype invalid).
References: (**tx**) Schedl 1963d: 214, 1979c: 120.

***impolitus* Wood** 1971: 6. Holotype ♂; Campamento Rio Grande, 30 km E Palmar, Bolivar, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Rosa de Montana (prob. *Brownia* sp.).
References: (**tx**) Wood, S. L. 1971: 6.

***imporcatus* Wood** 1971: 5. Holotype ♂; 7 km NW Socopo, Barinas, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Palito de Cruz.
References: (**tx**) Wood, S. L. 1971: 5–6.

***incomptus* Wood** 1967b: 90. Holotype ♂; Morelia, Michoacan, Mexico; Wood Collection.
Distribution: North America (Michoacan in Mexico).
Hosts: *Clematis* sp.
References: (**hb**) Wood, S. L. 1982b: 322. (**ds**) Wood, S. L. 1982b: 322. (**tx**) Wood, S. L. 1967b: 90, 1982b: 322.

***ingens* Wood** 1969b: 3. Holotype ♂; Tapanti, Cartago Prov., Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: Liana.

References: (**hb**) Wood, S. L. 1982b: 328. (**ds**) Wood, S. L. 1982b: 328. (**tx**) McNamara 1977: 194; Wood, S. L. 1969b: 3, 1982b: 328.

***macrocornis* Wood** 1971: 3. Holotype ♂; Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Bambusia vulgaris*.
References: (**tx**) Wood, S. L. 1971: 3.

***marginatus* Wood** 1974a: 11. Holotype ♂; Mexico; USNM, Washington.
Distribution: North America (Guerrero, Morelos in Mexico).
Hosts: *Crotolaria* sp., *Dalea lasiostachys, Desmodium cogantii*.
References: (**hb**) Atkinson et al. 1986: 22; Burgos & Saucedo 1983: 69. (**ds**) Atkinson & Equihua 1988: 88; Atkinson et al. 1986: 22, 50; Burgos & Saucedo 1983: 69; Wood, S. L. 1982b: 337. (**tx**) Wood, S. L. 1974a: 11, 1982b: 337.

***microporosus* Wood** 1974a: 10. Holotype ♂; El Sumidero, 24 km N Tuxtla Gutierrez, Chiapas, Mexico; CNCI, Ottawa.
Distribution: North America (Chiapas in Mexico).
References: (**ds**) Wood, S. L. 1982b: 343. (**tx**) McNamara 1984: 752; Wood, S. L. 1974a: 10, 1982b: 343.

***mimosae* Blackman** 1938b: 544. Holotype ♀; Brownsville, Texas [USA]; USNM, Washington.
Distribution: North America (Nuevo Leon, Tamaulipas in Mexico/ Texas in USA).
Hosts: *Cassia lindheimeriana, Leucaena pulverulenta, Mimosa* sp.
References: (**hb**) Chamberlin 1939: 139; Wood, S. L. 1982b: 326. (**ds**) Blackwelder 1939, 1947; Chamberlin 1939: 139; Ferrer 1942; Wood, S. L. 1982b: 326. (**tx**) Blackman 1938b: 544; Chamberlin 1939: 139; McNamara 1984: 753; Schedl 1940a: 337; Wood, S. L. 1982b: 326.

***minor* Eggers** 1951: 144. Lectotype ♂; Brasil (Corumba, im Staate Mato Grosso); USNM, Washington, designated by Anderson & Anderson 1971: 20.
Distribution: South America (Brazil).
References: (**tx**) Anderson, W. H. & Anderson 1971: 20; Eggers 1951: 144; Schedl 1951m: 88, 1962r: 97, 1979c: 154.

***minulus* Wood** 1969c: 126. Holotype ♀; La Ceiba, Honduras; Wood Collection.
Distribution: North America (Honduras/ Oaxaca in Mexico).
Hosts: Leguminosae.
References: (**ds**) Atkinson & Equihua 1986a: 420; Wood, S. L. 1982b: 345. (**tx**) Wood, S. L. 1969c: 126, 1982b: 345.

***neglectus* Schedl** 1978c: 296. Holotype, ♀; Brasilien, Nova Teutonia, Santa Catarina; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1978c: 296.

***opacicollis* Eggers** 1940a: 124. Holotype, sex?; Guadeloupe (Environ de Trois-Rivieres); MNHN, Paris.
Distribution: Antilles Islands (Guadeloupe).
References: (**ds**) Bright 1981c: 153, 1985c: 171. (**tx**) Bright 1972d: 35, 74, 1985c: 171, 177; Eggers 1940a: 124; Schedl 1979c: 178.

References: (**tx**) Eggers 1940a: 124–125; Schedl 1979c: 179.

brevisetosus Bright 1972d: 40. Holotype, ♂; Whitefield Hall, St. Thomas Parish, Jamaica; CNCI, Ottawa. Synonymy: Bright 1985c: 177.
References: (**ds**) Bright 1972d: 40, 1985c: 177; McNamara 1977: 194.

***orinocensis* Wood** 1971d: 4. Holotype ♂; Campamento Rio Grande, 30 km E Palmar, Bolivar, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: apparently *Celtis iguanae*.
References: (**hb**) Wood, S. L. 1971d: 4. (**tx**) Wood, S. L. 1971d: 4.

***ovalis* Schedl** 1952a: 454. Holotype ♀; not given with description, added by Schedl (1979c: 181) as: Loreto Missiones, Rep. Argentina; Schedl Collection in NHMW, Wien.
Distribution: South America (Argentina).
References: (**tx**) Schedl 1952a: 454, 1979c: 181.

***parcus* Wood** 1971: 6. Holotype ♂; Rancho Grande, Aragua, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Tabebuia* sp.
References: (**hb**) Beaver 1973b; Wood, S. L. 1971: 6. (**ds**) Beaver 1973b. (**tx**) Wood, S. L. 1971: 6.

***peniculus* Wood** 1971: 8. Holotype ♂; 30 km N Canon Zancudo, Zulia, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Liana.
References: (**tx**) Wood, S. L. 1971: 8.

***periosus* Wood** 1969b: 5. Holotype ♂; 5 km W Jaltipan, Veracruz, Mexico; Wood Collection.
Distribution: North America (Veracruz in Mexico).
Hosts: probably *Lonchocarpus* sp.
References: (**hb**) Wood, S. L. 1982b: 342. (**tx**) Wood, S. L. 1969b: 5, 1982b: 342.

***peruanus* Schedl** 1961i: 223. Holotype ♂; Peru, Urubamba, Ollantaitembo, Dept. Cruzea; Schedl Collection in NHMW, Wien.
Distribution: South America (Peru).
References: (**ds**) Schedl 1960a: 77. (**tx**) Schedl 1960a: 77, 1961i: 223, 1979c: 191.

***phloeosinites* Schedl** 1951m: 89. Syntypes ♀; Brasilien, Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien.

Distribution: South America (Brazil).
Notes: (3) Schedl 1979c: 193 (citation of holotype invalid).
References: (**tx**) Schedl 1951m: 89, 1979c: 192.

***phloeotriboides* Schedl** 1958f: 41. Holotype, sex?; Argentinien: Gran Chaco; Schedl Collection in NHMW, Wien.
Distribution: South America (Argentina).
References: (**tx**) Schedl 1958f: 41, 1979c: 193.

***priscus* Wood** 1971: 7. Holotype ♂; La Carbonera Experimental Forest, 50 km NW Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Phoradendron* sp.
References: (**tx**) Wood, S. L. 1971: 7.

***pumilus* (Chapuis)** 1869: 47 (*Rhopalopleurus*). Holotype ♂; Teapa, Tabasco, Mexico; IRSNB, Brussels.
Figures: Atkinson et al. 1986: 24, 51.
Distribution: North America (Costa Rica/ Guatemala/ Honduras/ Chiapas, Jalisco, Michoacan, Morelos, Nayarit, Tabasco in Mexico/ Panama).
Hosts: *Canavalia marivendbergi, C. villosa, Phaseolus* sp.
Notes: (1) Schwarz 1886: 54 (to *Chramesus*).
References: (**ec**) Wichmann 1955a: 107. (**hb**) Atkinson et al. 1986: 23, 50; Burgos & Saucedo 1983: 68; Wood, S. L. 1982b: 332. ***securus* Wood** 1983a: 653. Holotype ♂; Estacion de Biologia, Chemela, Jalisco, Mexico; Wood Collection.
Distribution: North America (Jalisco in Mexico).
Hosts: Leguminosae, *Lonchocarpus* sp.
References: (**ec**) Equihua & Atkinson 1986: 626. (**hb**) Equihua & Atkinson 1986: 626; (**ds**) Equihua & Atkinson 1986: 626. (**tx**) Wood, S. L. 1983a: 653.

***secus* Wood** 1969b: 4. Holotype ♂; Laguna Santa Maria, Nayarit, Mexico; Wood Collection.
Distribution: North America (Nayarit, Oaxaca in Mexico).
Hosts: Liana, and *Acacia* sp.
References: (**hb**) Wood, S. L. 1982b: 325. (**ds**)

Wood, S. L. 1982b: 325. (**tx**) Wood, S. L. 1969b: 4, 1982b: 325.

***setiger* Schedl** 1951m: 92. Syntypes ♂ ♀; Brasilien, Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Distribution: South America (Brazil).
Notes: (3) Schedl 1979c: 226 (citation of holotype invalid).
References: (**ds**) Schedl 1972g: 42. (**tx**) Schedl 1951m: 91–92, 1979c: 226.

***setosus* Wood** 1960b: 61. Holotype ♂; Madera Canyon, Santa Cruz Co., Arizona [USA]; Wood Collection.
Distribution: North America (Chihuahua in Mexico/ Arizona in USA).
Hosts: *Rhamnus betulaefolia*, *Morus alba*.
References: (**ds**) Wood, S. L. 1982b: 337. (**tx**) Wood, S. L. 1960b: 61, 1982b: 337.

***signatipennis* Schedl** 1962r: 97. Holotype ♀; Hamburgfarm on Rio Reventazon, Limon, Costa Rica; Schedl Collection in NHMW, Wien.
Distribution: North America (Costa Rica).
References: (**hb**) Wood, S. L. 1982b: 333. (**ds**) Wood, S. L. 1982b: 333. (**tx**) Schedl 1962r: 97, 1979c: 228; Wood, S. L. 1982b: 333.

***simplicis* Wood** 1971: 3. Holotype ♂; La Carbonera Experimental Forest 50 km NW Merida, Merida, Venezuela.
Distribution: South America (Venezuela).
Hosts: Native bamboo.
References: (**tx**) Wood, S. L. 1971: 3.

***solicitatus* Wood** 1971: 8. Holotype ♂; Campamento Rio Grande, 30 km E Palmar, Bolivar, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Liana.
References: (**tx**) Wood, S. L. 1971: 8.

***spinosus* Brethes** 1921: 167. Syntypes, sex?; La Plata, Argentina; not located.
Distribution: South America (Argentina/ Brazil).
Hosts: *Acacia cavenia*.
References: (**hb**) Viana 1964: 127. (**ds**) Schedl 1973d: 153; Viana 1964: 127. (**tx**) Brethes 1921: 167; Schedl 1952a: 446.

cristatus Schedl 1963d: 213. Syntypes ♀; Brasilien, Santa Catarina, Nova Teutonia, 300 bis 500 m; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Notes: (3) Schedl 1979c: 70 (citation of holotype invalid). Schedl note in his collection treats this as a synonym of *spinosus* Brethes.
References: (**ds**) Escalera 1919. (**tx**) de Ruette 1970: 99; Schedl 1963d: 213, 1979c: 69.

***striatus* Eggers** 1943a: 344. Holotype ♀?; Bolivien (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
References: (**tx**) Anderson, W. H. & Anderson 1971: 31; Eggers 1943a: 344; de Ruette 1970: 99.

***strigatus* Wood** 1960b: 62. Holotype ♂; Atlixco, Puebla, Mexico; Wood Collection, automatic.
Distribution: North America (Morelos, Puebla in Mexico).
Hosts: *Acacia* sp.
References: (**hb**) Atkinson et al. 1986: 23, 50; Wood, S. L. 1982b: 339. (**ds**) Atkinson et al. 1986: 23, 50; Wood, S. L. 1982b: 339. (**tx**) Wood, S. L. 1960b: 62, 1982b: 339.

striatus Wood 1956c: 256. Holotype ♂; Atlixco, Puebla, Mexico; Wood Collection, preoccupied by Eggers 1943a: 344.
References: (**tx**) Wood, S. L. 1956c: 256, 1960b: 62.

***strigilis* Wood** 1971: 4. Holotype ♂; La Carbonera Experimental Forest, 50 km NW Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
References: (**tx**) Wood, S. L. 1971: 4–5.

***subopacus* Schaeffer** 1908: 221. Lectotype ♀; Huachuca Mts., Arizona [USA]; USNM, Washington, designated by Blackman 1938b: 541.
Distribution: North America (Honduras/ Colima, Jalisco, Oaxaca, Tamaulipas in Mexico/ Arizona, Louisiana, Texas in USA).
Hosts: *Celtis iguanaea*, *C.* sp., *Condalia obtusifolia*, *C.* sp.
References: (**ec**) Equihua & Atkinson 1986: 626. (**hb**) Chamberlin 1939: 138; Equihua & Atkinson 1986: 626; Wood, S. L. 1982b: 334. ***subtuberculatus* Eggers** 1951: 146. Holotype ♂; Colombia (Hochland von Bogota); Eggers Collection, in NHMW, Wien.
Distribution: South America (Colombia).
References: (**tx**) Eggers 1951: 146; Schedl 1951: 146, 1979c: 245.

***tibialis* Wood** 1983a: 654. Holotype ♂; Urpanapan, Veracruz, Mexico; Wood Collection.
Distribution: North America (Veracruz in Mexico).
Hosts: *Olmeca recta*.
References: (**hb**) Atkinson & Equihua 1986a: 420. (**ds**) Atkinson & Equihua 1986a: 420. (**tx**) Wood, S. L. 1983a: 654.

***tuberculatus* (Chapuis)** 1869: 47 (*Rhopalopleurus*). Syntypes 2 ♂; Nouvelle-Grenade; IRSNB, Brussels.
Distribution: South America (Colombia).
References: (**ds**) Blackwelder 1947; Hagedorn 1910d: 19; Kleine 1912b: 175, 1914b: 341. (**tx**) Chapuis 1869: 47, 1873: 255; Eggers 1951: 146; Gemminger & Harold 1872: 2677; Hagedorn 1910a: 67; Hopkins 1914: 128.

***unicornis* Wood** 1969b: 4. Holotype ♂; Laguna Santa Maria, Nayarit, Mexico; Wood Collection.
Distribution: North America (Colima, Jalisco, Nayarit in Mexico).
Hosts: *Mimosa ervendbergi*.
References: (**hb**) Wood, S. L. 1982b: 323. (**ds**) Atkinson & Equihua 1988: 88; Wood, S. L. 1982b: 323. (**tx**) McNamara 1977: 194; Wood, S. L. 1969b: 4, 1982b: 323.

***variabilis* Wood** 1974a: 9. Holotype ♂; Lago Catemaco, Veracruz, Mexico; CNCI, Ottawa.
Distribution: North America (Veracruz in Mexico).
References: (**ds**) Wood, S. L. 1982b: 343. (**tx**) McNamara 1984: 753; Wood, S. L. 1974a: 9, 1982b: 343.

***variegatus* Eggers** 1943a: 345. Holotype ♀?; Bolivia (Cochabamba); Eggers Collection, in NHMW, Wien.
Distribution: South America (Bolivia).
References: (**tx**) Eggers 1943a: 345; Schedl 1979c: 264.

***varius* Wood** 1969b: 4. Holotype ♂; 27 km N Ixmiquilpan, Hidalgo, Mexico; Wood Collection.
Distribution: North America (Hidalgo in Mexico).
Hosts: *Acacia* sp.
References: (**hb**) Wood, S. L. 1982b: 325. (**ds**) Wood, S. L. 1982b: 325. (**tx**) Wood, S. L. 1969b: 4, 1982b: 325.

***vastus* Wood** 1967b: 92. Holotype ♂; Cerro Punta, Chiriqui, Panama; Wood Collection.
Distribution: North America (Panama).
Hosts: *Inga* sp.
References: (**hb**) Wood, S. L. 1982b: 340. (**ds**) Wood, S. L. 1982b: 340. (**tx**) Wood, S. L. 1967b: 92, 1982b: 340.

***vinealis* Wood** 1971: 7. Holotype ♂; 30 km N Canon Zancudo, Zulia, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Liana.
References: (**tx**) Wood, S. L. 1971: 7.

***vitiosus* Wood** 1969c: 125. Holotype ♂; Rosamorada, Nayarit, Mexico; Wood Collection.
Distribution: North America (Jalisco, Nayarit in Mexico).
Hosts: *Inga paterno*, *Lonchocarpus constrictus*, *L. guatemalensis*.
References: (**ec**) Equihua & Atkinson 1986: 626. (**hb**) Equihua & Atkinson 1986: 626; Wood, S. L. 1982b: 340. (**ds**) Equihua & Atkinson 1986: 626; Wood, S. L. 1982b: 340. (**tx**) Wood, S. L. 1969c: 125, 1982b: 340.

***wisteriae* Wood** 1974a: 11. Holotype ♂; Bay St. Louis, Mississippi [USA]; USNM, Washington.
Distribution: North America (Mississippi in USA).
Hosts: *Wisteria* sp.
Notes: (3) Atkinson 1989: 327 treated this as a synonym of *chapuisii*, apparently on the basis of female characters; males differ strikingly.
References: (**ds**) Drooz 1985: 352; Wood, S. L. 1982b: 341. (**tx**) Atkinson 1989: 327; Wood, S. L. 1974a: 11, 1982b: 341.

***xalapae* Atkinson** 1989: 58. Holotype ♂; Mexico: Veracruz, Xalapa; USNM, Washington.
Distribution: North America (Veracruz in Mexico).
References: (**tx**) Atkinson 1989: 58.

***xylophagus* Wood** 1956c: 255. Holotype ♂; Rosario, Sinaloa, Mexico; SMUK, Lawrence.
Distribution: North America (Nayarit, Sinaloa in Mexico).
Hosts: *Inga paterno*.
References: (**hb**) Wood, S. L. 1982b: 344. (**ds**) Wood, S. L. 1982b: 344. (**tx**) de Ruette 1970: 99; Wood, S. L. 1956c: 255, 1982b: 344.

L. 1982b: 361.

***phoradendri* Wood** 1969b: 8. Holotype ♂; Zamorano, Morazan, Honduras; Wood Collection.
Distribution: North America (Costa Rica/Honduras).
Hosts: *Phoradendron robustissimum, P.* sp.
Notes: Wood 1969c: 122 (correction of spelling lapsus calami).
References: (**ds**) Wood, S. L. 1982b: 360. (**tx**) Wood, S. L. 1967b: 96, 1969b: 8, 1969c: 122, 1982b: 360.

***pouteriae* Wood** 1986c: 269. Holotype ♂; Campo Experimental, INIF, Escarcega, Campeche, Mexico; Wood Collection.
Distribution: North America (Campeche in Mexico).
Hosts: *Pouteria campechana.*
References: (**ds**) Estrada & Atkinson 1988: 204. (**tx**) Wood, S. L. 1986c: 269.

***pruinosus* (Blackman)** 1940b: 383 (*Renocis*). Holotype ♀; San Bernardino Co., California [USA]; USNM, Washington.
Distribution: North America (S Arizona, S California in USA).
Hosts: *Encelia farinosa.*
References: (**hb**) Bright & Stark 1973: 55. (**ds**) Blackwelder & Blackwelder 1948; Bright & Stark 1973: 55; Wood, S. L. 1982b: 353. (**tx**) Blackman 1940b: 383; McNamara 1984: 759; Wood, S. L. 1982b: 353.

***struthanthi* Wood** 1967b: 96. Holotype ♂; Volcan de Colima, Jalisco, Mexico; Wood Collection.
Distribution: North America (Jalisco, Morelos, Oaxaca, Puebla, Veracruz in Mexico).
Hosts: *Phoradendron* spp., *Psittacanthus schiedeanus, Struthanthus deppeanus, S. venetus.*
References: (**hb**) Wood, S. L. 1982b: 359. (**ds**) Wood, S. L. 1982b: 359. (**tx**) McNamara 1977: 194; Wood, S. L. 1967b: 96, 1982b: 359.

***sulcatus* (Wood)** 1956c: 252 (*Renocis*). Holotype ♀; Ixmiquilpan, Hidalgo, Mexico; SMUK, Lawrence.
Distribution: North America (Hidalgo, San Luis Potosi in Mexico).
Hosts: *Flourensia cernula,* (?) *Rhus* sp.
References: (**hb**) Atkinson & Equihua 1988: 88. (**ds**) Atkinson & Equihua 1985b: 231, 1988: 88; Wood, S. L. 1982b: 356. (**tx**) Wood, S. L. 1956c: 252, 1982b: 356.

Genus *Cryphyophthorus* Schedl

CRYPHYOPHTHORUS SCHEDL 1953c: 294. Type-species: *Cryphyophthorus eggersi* Schedl, original designation.
References: (**hb**) Wood, S. L. 1986a: 54. (**ds**) Wood, S. L. 1986a: 54. (**tx**) Schedl 1953c: 294; Wood, S. L. 1986a: 54.

***eggersi* Schedl** 1953c: 294. Holotype, sex?; Sumatra, Siboelangit; Eggers specimens in Schedl Collection in NHMW, Wien.
Distribution: Indonesia (Sumatra).
Hosts: "in Blutenstielen einer Euphorbiaceae."
Notes: (3) Schedl 1953c: 295 (*Eriosinus sumatranus,* nomen nudum).
References: (**tx**) Schedl 1953c: 294–295, 1961e: 132, 1979c: 87.

***hylesiniformis* (Schedl)** 1961e: 132 (*Ptilopodius*). Holotype, sex?; Madagascar, Montagne d'Ambre, Plateau; IRSM, Madagascar.
Distribution: Madagascar.
References: (**hb**) Schedl 1977a: 43. (**tx**) Schedl 1961e: 132, 1962r: 93, 1977a: 43.

Genus *Liparthrum* Wollaston

LIPARTHRUM WOLLASTON 1854: 294. Type-species: *Liparthrum bituberculatum* Wollaston, original designation.

Erineosinus Blackman 1920a: 53. Type-species: *Erineosinus squamosus* Blackman, monobasic. Synonymy: Wood 1957c: 399.
References: (**tx**) Blackman 1920a: 53, 1922b: 74–75, 1928a: 186; Wood, S. L. 1957c: 399.

***meridensis* Wood** 1971: 10. Holotype ♂; 5 km E Lagunillas, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Compositae shrub.
References: (**tx**) Wood, S. L. 1971: 10.

mexicanum Wood 1983a: 657. Holotype ♂; Cuernavaca, Morelos, Mexico; Wood Collection.
Distribution: North America (Morelos in Mexico).
Hosts: *Ficus* sp.
References: (**hb**) Atkinson & Equihua 1985b: 231; Atkinson et al. 1986: 52. (**ds**) Atkinson & Equihua 1985b: 231; Atkinson et al. 1986: 52. (**tx**) Wood, S. L. 1983a: 657.

***mori* (Aube)** 1862: 387 (*Hypoborus*). Syntypes, sex?; Frejus; not located.
Figures: Balachowsky 1949a: 154.
Distribution: Africa (Algeria/ Tunisia), Europe (Corsica/ S France/ Greece/ Hungary/ Italy/ Yugoslavia).
Hosts: *Genista corsica, G. scorpius, Morus alba*.
Notes: Schedl 1959f: 41–42 (redescription; cites *brevi* Eggers, nomen nudum, *elongatum* Eggers, nomen nudum, synonymy).

***palaquius* (Schedl)** 1953c: 292 (*Phloeochilus*). Syntypes, sex?; Malaya, Selangor Kepong; BMNH, London, and Schedl Collection in NHMW, Wien.

Distribution: Asia (Malaya).

Hosts: *Palaquium maingayi.*

Notes: (1) Schedl 1963h: 263 (to *Liparthrum*). (3) Schedl 1979c: 182 (citation of holotype invalid).

References: (**ds**) Browne 1961c: 70, 1980a: 372. (**tx**) Schedl 1953c: 292, 294, 1963h: 263, 1979c: 182.

***palauensis* (Wood)** 1960a: 17 (*Phloeotrypetus*). Holotype ♀; Caroline Islands (Palau); USNM, Washington.

Figures: Wood 1960a: 17 (outline of adult).

Distribution: Micronesia (Palau in Caroline Islands).

References: (**tx**) Wood, S. L. 1960a: 17.

***pruni* Wood** 1983a: 657. Holotype ♂; Aranza, Michoacan, Mexico; Wood Collection.

Distribution: North America (Michoacan in Mexico).

Hosts: *Prunus serotina.*

References: (**ds**) Atkinson & Equihua 1985b: 231. (**tx**) Wood, S. L. 1983a: 657.

***sabahensis* Bright** 1990: 485. Holotype ♀; Borneo: Sabah, Mt. Kinabalu N. P., Liwagu Trail, 1558–1890 m; CNCI, Ottawa.

Figures: Bright 1990: 486–487 (adult).

Distribution: Indonesia (Borneo).

Hosts: Fallen rotten fruit.

References: (**tx**) Bright 1990: 485.

***squamosum* (Blackman)** 1920a: 53 (*Erineosinus*). Lectotype, sex?; Agricultural College (Starkville), Mississippi [USA]; USNM, Washington, designated by Wood 1982b: 367.

Distribution: North America (Indiana, Mississippi in USA).

Hosts: *Maclura pomifera.*

Notes: (1) Wood 1957c: 399 (to *Liparthrum*).

References: (**hb**) Blackman 1922b: 74–75; Bright 1968a: 637; Chamberlin 1939: 272; Wood, S. L. 1982b: 367. ivoriensis Nunberg 1969a: 393. Holotype ♂; Bringerville, Ivory Coast; MRCB, Tervuren. Synonymy: Schedl 1972q: 261.
References: (**tx**) Nunberg 1969a: 393; Schedl 1972q: 261.

Genus *Halystus* Schedl

HALYSTUS SCHEDL 1982: 283. Type-species: *Halystus namibiae* Schedl, monobasic.

Phloeographus Wood 1984b: 229. Type-species: *Phloeographus mamibiae* Wood = *Halystus namibiae* Schedl, original designation. Synonymy: Wood 1988b: 188.
References: (**tx**) Wood, S. L. 1984b: 229, 1988b: 188.
References: (**hb**) Wood, S. L. 1986a: 56. (**ds**) Wood, S. L. 1986a: 56. (**tx**) Schedl 1982: 283; Wood, S. L. 1986a: 56, 1988b: 188.

***namibiae* Schedl** 1982: 283. Holotype ♀; Namibia; Schedl Collection in NHMW, Wien.
Distribution: Africa (Namibia).
References: (**tx**) Schedl 1982: 283; Wood, S. L. 1988b: 188.

mamibiae Wood 1984b: 229 (*Phloeographus*). Holotype ♀; SW Africa, Damara, Farm Bethanis 20.25, S-14–24E; NHMW, Wien. Synonymy: Wood 1988b: 188.
References: (**tx**) Wood, S. L. 1984b: 229, 1986a: 56, 1988b: 188.

Genus *Cardroctonus* Schedl

CARDROCTONUS SCHEDL 1965e: 361. Type-species: *Cardroctonus orientalis* Schedl, original designation.
References: (**hb**) Wood, S. L. 1986a: 56. (**ds**) Wood, S. L. 1986a: 56. (**tx**) Schedl 1965e: 361; Wood, S. L. 1986a: 56.

***africanus* (Nunberg)** 1964b: 433 (*Carphoborus*). Holotype, sex?; Ost-Afrika; NHMB, Budapest.
Figures: Nunberg 1964b: 432.
Distribution: Africa (Tanzania).
Notes: (1) Schedl 1965e: 361 (to *Cardroctonus*).
References: (**tx**) Nunberg 1964b: 432–433; Schedl 1965e: 361.

***congonus* Schedl** 1965e: 362. Holotype ♂?; Congo, Mayumbe; Schedl Collection in NHMW, Wien.
Distribution: Africa (Zaire).
References: (**tx**) Schedl 1965e: 362, 1979c: 62.

***orientalis* Schedl** 1965e: 361. Holotype, sex?; Tanganyika, Mpala; Schedl Collection in NHMW, Wien, lost?
Distribution: Africa (Tanzania).
Notes: (1) Specimen labeled as the holotype is missing from its pin.
References: (**tx**) Schedl 1965e: 361, 1979c: 180; Wood, S. L. 1986a: 56.

Genus *Polygraphus* Erichson

POLYGRAPHUS ERICHSON 1836: 57. Type-species: *Hylesinus pubescens* Fabricius = *Dermestes poligraphus* Linnaeus, monobasic.

Lepisomus Kirby 1837: 193. Type-species: *Apate (Lepisomus) rufipennis* Kirby, subsequent designation by Hopkins 1914: 124. Synonymy: Swaine 1918a: 55.
References: (**tx**) Hopkins 1914: 124, 1915c: 226; Kirby 1837: 57, 193; Swaine 1918a: 55.

Spongotarsus Hagedorn 1908: 372. Type-species: *Spongotarsus quadrioculatus* Hagedorn, monobasic. Synonymy: Schedl 1972p: 153.

References: (**tx**) Hagedorn 1908: 372, 1910a: 78, 1910d: 39; Hopkins 1914: 129, 135, 1915c: 226; Schedl 1972p: 153; Wood, S. L. 1986a: 56.

Pseudopolygraphus Seitner 1911: 99, 105. Type-species: *Polygraphus grandiclava* Thomson, subsequent designation by Hopkins 1914: 128. Synonymy: Hopkins 1915c: 222.

References: (**tx**) Endrodi 1957b: 415; Hopkins 1914: 128, 1915c: 222; Seitner 1911: 99–109; Schedl 1955a: 3; Swaine 1918a: 55.

Ozophagus Eggers 1919: 234. Type-species: *Ozophagus camerunus* Eggers, subsequent designation by Wood 1982b: 386. Synonymy: Schedl 1950d: 2.

References: (**tx**) Eggers 1919: 234–235; Schedl 1950d: 2; Wood, S. L. 1982b: 386.

Nipponopolygraphus Nobuchi 1981c: 12. Type-species: *Nipponopolygraphus kaimochii* Nobuchi, original designation. Synonymy: Wood 1992b: 81.

References: (**tx**) Nobuchi 1981c: 12; Wood, S. L. 1992b: 81.

Keys: Schedl 1955a: 5, Murayama 1956: 278, Wood 1982b: 387.

Notes: (3) Beeson 1941: 379–380, 1961: 301, (*Urdugraphus,* nomen nudum, no status, with *U. difficilis* Beeson, nomen nudum = *Polygraphus difficilis* Wood as the only species). Scudder 1893: 158 (*Polygraphus worthini,* a fossil [is not a Scolytidae]).

***occidentalis* Schedl** 1954d: 879. Syntypes ♂♀; Cote d'Ivoire, Adiopodoume; type restricted to MNHN, Paris specimens by Schedl 1979c: 176.
Distribution: Africa (Ivory Coast).
References: (**ds**) Browne 1980a: 373; Schedl 1966c: 223, 1972e: 280, 1979b: 415. (**tx**) Schedl 1954d: 879, 1961k: 379, 1979c: 176–177.

occidentalis minusculus Schedl 1966c: 236. Holotype ♀; Dimonika, Cote d'Ivoire; MNHN, Paris.
Notes: (3) Either this is a good species or else it is an aberration with no standing in nomenclature, status doubtful.
References: (**tx**) Schedl 1966c: 236.

***orientalis* (Eggers)** 1922b: 166 (*Ozophagus*). Syntypes 2 ♀; Kirumba, Deutsch-Ostafrika; 1 in Methner Collection, 1 Eggers syntype, in NHMW, Wien.
Distribution: Africa (Tanzania/ Zaire).
Notes: (3) Schedl 1979c: 181 (citation of holotype invalid).
References: (**ds**) Schedl 1961k: 379, 1972k: 295. (**tx**) Eggers 1922b: 166–167; Schedl 1950d: 2, 1961k: 379, 1979c: 181.

***parvulus* Murayama** 1956a: 279, 283. Holotype ♀; West Park, Fukuoka City, Japan; Murayama Collection in USNM, Washington.
Figures: Nakane et al. 1963:pl. 191, Nobuchi 1979b:pl. 3.
Distribution: Asia (Japan).
Hosts: *Prunus* sp.
References: (**cn**) Anonymous 1980g. (**ds**) Anonymous 1980g; Murayama 1956a: 276; Nakane et al. 1963: 382; Nobuchi 1979b: 8, 1985c: 9. (**tx**) Murayama 1956a: 276–279, 283; Nakane et al. 1963: 382, pl. 191; Nobuchi 1979b: 8, pl. 3.

***perlaetus* Schedl** 1953d: 84. Lectotype ♂; Madagascar, Mt. d'Ambre; Schedl Collection in NHMW, Wien, designated by Schedl 1979c: 189.
Distribution: Madagascar.
References: (**tx**) Murayama 1956: 290; Schedl 1953d: 84, 1977b: 21, 1979c: 189.

***pini* Stebbing** 1914: 522. Syntypes ♂♀; labeled Chogaum Dist., Bashar, Uttar Pradesh, India, published as NW Himalayas, India; FRI, Dehra Dun, automatic.
Figures: Stebbing 1914: 524–525 (galleries).
Distribution: Asia (Himachal Pradesh, Kashmir, Punjab, Uttar Pradesh in India).
Hosts: *Abies webbiana, Cedrus deodara, Picea morinda, Pinus excelsa*.
References: (**cn**) Beeson 1922a; Browne 1968b: 580; Huque 1966; Pierce, W. D. 1917: 69; Stebbing 1914: 522. (**ec**) Beeson 1922c: 497; Chararas 1959c; Stebbing 1914: 522. laticollis Eggers 1926b: 135. Holotype ♂; Nopporo; Eggers Collection, in NHMW, Wien. Synonymy: Murayama 1956: 287.
References: (**tx**) Eggers 1926b: 135; Murayama 1956: 287; Niisima 1941: 123–124; Schedl 1934f: 1636, 1955a: 11; Sokanovskii 1960: 675

magnus Murayama 1956a: 279, 282. Holotype ♀; Nishimata, Aki County, Kochi pref., Japan; Murayama Collection in USNM, Washington. Synonymy: Wood 1992b: 84.
References: (**ds**) Murayama 1956a: 276, 279, 282; Nobuchi 1979b: 7, 1985c: 9. (**tx**) Murayama 1956a: 276, 279, 282; Nobuchi 1979b: 7; Wood, S. L. 1992b: 84.

***pseudobrunneus* Schedl** 1971e: 7. Holotype ♀; Kamerun; Schedl Collection in NHMW, Wien.
Distribution: Africa (Cameroon).
References: (**tx**) Schedl 1971e: 7.

***quadrioculatus* (Hagedorn)** 1908: 373 (*Spongotarsus*). Holotype, sex?; Sumatra; Hamburg Museum, lost.
Distribution: Indonesia (Sumatra).
References: (**ds**) Hagedorn 1910d: 39; Kleine 1913b: 117, 1914b: 285. (**tx**) Hagedorn 1908: 373, 1910a: 78; Hopkins 1914: 129.

***ruandae* Schedl** 1957d: 34. Holotype ♀; Ruanda: Ihembe; MRCB, Tervuren.
Figures: Schedl 1961k: 381 (adult).
Distribution: Africa (Zaire).
Hosts: *Chrysophyllum africanum, Clitandra* cf *staudtii*.
References: (**ec**) Schedl 1961k: 381. (**hb**) Schedl 1961k: 381. (**ds**) Schedl 1961k: 381, 1979b: 415. (**tx**) Schedl 1957d: 34, 1961k: 381.

***rudis* Eggers** 1933a: 99. Syntypes, sex?; Nitou Tatsienlu, Szechuan, China; Eggers Collection, in NHMW, Wien.

Figures: Schedl 1955a: 19 (antenna).

Notes: (3) Schedl 1955a: 19 (redescribed).

References: (**ds**) Murayama 1937b: 369; Yin & Huang 1981: 560. (**tx**) Eggers 1933a: 99; Murayama 1937b: 369; Schedl 1955a: 19; Yin & Huang 1981: 560.

rudis likiangensis Tsai & Yin 1965: 334. Holotype ♂; Likiang, Yunnan, China; IZAS, Beijing.

Distribution: Asia (Yunnan in China).

Hosts: *Larix potanini, Picea likiangensis, Pinus armandi*.

References: (**tx**) Tsai & Yin 1965: 328–329, 334.

rudis retiventriculus Tsai & Yin 1965: 334. Holotype ♂; Kangding, Szechwan, China; IZAS, Beijing.

Distribution: Asia (Sichuan in China).

Hosts: *Picea asperata*.

Notes: (1) If subspecies are justified, then this one must automatically take the name *rudis rudis*.

References: (**tx**) Tsai & Yin 1965: 328–329, 334.

***rufipennis* (Kirby)** 1837: 193 (*Apate*). Syntypes, sex?; Boreal America, Lat. 65; BMNH, London.

Figures: Bright 1976d: 202, 209, Clarke & Carew 1983c, Kusch 1967: 10, Swaine 1918a:pl. 21 (male).

Distribution: North America (Alaska/ all provinces in Canada/ Arizona, Colorado, District of Columbia, Idaho, Maine, Massachusetts, Michigan, Minnesota, Montana, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Pennsylvania, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming in USA). Apparently introduced into South Africa (Schedl 1961k: 380).

Hosts: *Picea engelmannii, P. glauca, P. pungens, P. rubra, P.* spp., *Abies fraseri, Larix laricina, Pinus strobus*.

Genus *Bothinodroctonus* Schedl

BOTHINODROCTONUS SCHEDL 1969a: 208. Type-species: *Bothinodroctonus bicinctus* Schedl, monobasic.
References: (**hb**) Wood, S. L. 1986a: 57. (**ds**) Wood, S. L. 1986a: 57. (**tx**) Schedl 1969a: 208; Wood, S. L. 1986a: 57.

***bicinctus* Schedl** 1969a: 209. Holotype ♂; Borneo (Sarawak), Sejingkat to Tokyo, intercepted; PPST, Tokyo.
Figures: Schedl 1969a: 209.
Distribution: Indonesia (Borneo).
Notes: (3) Schedl 1969a: 209 (had the sexes reversed).
References: (**tx**) Schedl 1969a: 209, 1979c: 37.

***indicus* Wood** 1988b: 191. Holotype ♀; Tavargati, Belgaum Div., Bombay [India]; FRI, Dehra Dun.
Distribution: Asia (Bengal, Maharastra in India/ Sri Lanka).
Hosts: *Odina wodier*.
References: (**tx**) Wood, S. L. 1988b: 191.

***setosus* Wood** 1988b: 192. Holotype ♀; North Andaman Island; Wood Collection.
Distribution: Asia (North Andaman in Andaman Islands).
Hosts: *Canarium euphyllum*.
References: (**tx**) Wood, S. L. 1988b: 192.

Genus *Carphobius* Blackman

CARPHOBIUS BLACKMAN 1943c: 398. Type-species: *Carphobius arizonicus* Blackman, original designation.
Keys: Wood 1982b: 369.
References: (**hb**) Wood, S. L. 1982b: 369, 1986a: 57. (**ds**) Wood, S. L. 1982b: 369, 1986a: 57. (**tx**) Arnett 1960: 1041; Blackman 1943c: 398; Schedl 1972q: 255; Wood, S. L. 1982b: 369, 1986a: 57.

arizonicus Blackman 1943c: 398. Holotype ♀; Miller Canyon, Huachuca Mountains, Arizona [USA]; USNM, Washington.
Figures: Atkinson & Equihua 1988: 87; Blackman 1943c:figs. 41–45.
Distribution: North America (Chihuahua, Durango, Mexico in Mexico/ Arizona, New Mexico in USA).
Hosts: *Juniperus deppeana*.
Notes: Breeds in insect-girdled twigs in living trees.
References: (**hb**) Wood, S. L. 1982b: 370. (**ds**) Atkinson & Equihua 1988: 86; Thomas, J. B. 1966; Wood, S. L. 1960b: 60, 1982b: 370. (**tx**) Atkinson & Equihua 1988: 87; Blackman 1943c: 398; Wood, S. L. 1960b: 60, 1982b: 370.

cupressi **Wood** 1974a: 12. Holotype ♂; San Marcos, Guatemala; Wood Collection.
Distribution: North America (Guatemala).
Hosts: *Cupressus lucitanica*.
References: (**hb**) Wood, S. L. 1982b: 370. (**ds**) Wood, S. L. 1982b: 370. (**tx**) Wood, S. L. 1974a: 12, 1982b: 370.

pilifer **Wood** 1983a: 652. Holotype ♀; Tres Marias, Morelos, Mexico; Wood Collection.
Distribution: North America (Morelos in Mexico).
Hosts: *Cupressus lindleyi*.
References: (**hb**) Atkinson et al. 1986: 25. (**ds**) Atkinson & Equihua 1985a: 79; Atkinson et al. 1986: 25. (**tx**) Wood, S. L. 1983a: 652.

Genus *Chortastus* Schaufuss

CHORTASTUS SCHAUFUSS 1905: 15. Type-species: *Chortastus camerunus* Schaufuss, monobasic.
Afrochramesus Schedl 1971g: 197. Type-species: *Afrochramesus baguenai* Schedl, original designation. Synonymy: Wood 1984b: 224.
References: (**tx**) Schedl 1971g: 197; Wood, S. L. 1984b: 224.
Keys: Browne 1973c: 17–30; Schedl 1977a: 37–38.

L. 1972g: 244.

***glaber* (Eggers)** 1929d: 64 (*Loganius*). Holotype ♂; Ostbolivia; USNM, Washington.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947: 788. (**tx**) Anderson, W. H. & Anderson 1971: 13; Eggers 1929d: 64; Wood, S. L. 1972g: 244.

***glabratus* (Schedl)** 1940a: 329 (*Loganius*). Holotype ♀; Tumbala, Chiapas, Mexico; Schedl Collection in NHMW, Wien.
Distribution: North America (Chiapas, Oaxaca in Mexico).
References: (**hb**) Atkinson & Equihua 1986a: 420. (**ds**) Atkinson & Equihua 1986a: 420; Blackwelder 1947: 788; Ferrer 1942; Wood, S. L. 1982b: 398. (**tx**) Schedl 1939k: 722, 1940a: 329, 1979c: 105; Wood, S. L. 1972g: 244, 1982b: 398.

***gracilens* Wood** 1969b: 10. Holotype ♂; 57 km SE El Cameron, Oaxaca, Mexico; Wood Collection.
Distribution: North America (Oaxaca in Mexico).
Hosts: Euphorbiaceae.
References: (**hb**) Wood, S. L. 1982b: 410. (**ds**) Wood, S. L. 1982b: 410. (**tx**) Wood, S. L. 1969b: 10, 1972g: 244, 1982b: 410.

***hylurgoides* (Schedl)** 1948f: 262 (*Coptodryas*). Holotype, sex?; Brasil, St. Catharina; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
Notes: (1) Wood 1972g: 244 (to *Cnemonyx*). (3) Schedl 1952b: 363 (treated in *Coptosomus*).
References: (**tx**) Schedl 1948f: 262, 1952b: 363, 1979c: 120; Wood, S. L. 1972g: 244.

***impressus* (Wood)** 1961d: 90 (*Loganius*). Holotype ♂; Chilpancingo, Guerrero, Mexico; Wood Collection.
Distribution: North America (Guerrero in Mexico).
Notes: Wood 1972g: 244 (to *Cnemonyx*).
References: (**ds**) Wood, S. L. 1982b: 407. (**tx**) Wood, S. L. 1961d: 90, 1972g: 244, 1982b: 407.

***insidiosus* (Schedl)** 1939m: 171 (*Loganius*). Syntypes, sex?; Buenos Aires, Isla Martin Garcia; Schedl Collection in NHMW, Wien, and Viana Collection.
Distribution: South America (Argentina/ Bolivia).
Notes: (1) Schedl 1952d: 344 (to *Cnemonyx*), 1979c: 125 (citation of holotype invalid).
References: (**ds**) Blackwelder 1947: 788. (**tx**) Schedl 1939m: 171, 1952d: 344, 1979c: 125; Wood, S. L. 1972g: 244.

***insignis* Wood** 1969b: 9. Holotype ♂; Moravia, Cartago Prov., Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Virola* sp.
References: (**hb**) Wood, S. L. 1982b: 397. (**ds**) Wood, S. L. 1982b: 397. (**tx**) Wood, S. L. 1969b: 9, 1972g: 244, 1982b: 397.

***jucundus* (Chapuis)** 1869: 52 (*Ceratolepis*). Holotype ♂; Nova-Fribourg; IRSNB, Brussels.
Distribution: South America (Brazil).
References: (**ds**) Blackwelder 1947: 787; Gemminger & Harold 1872: 2694; Hagedorn 1910d: 82; Kleine 1913b: 150, 1914b: 336; Schedl 1973d: 151. (**tx**) Chapuis 1869: 52, 1873: 260; Eggers 1933: 14; Hagedorn 1910a: 127; Hopkins 1914: 117; Schedl 1952d: 349, 1962q: 486; Wood, S. L. 1972g: 244.

***liratus* (Wood)** 1961d: 92 (*Loganius*). Holotype ♀; 20 km E Matamoros, Puebla, Mexico; Wood Collection.
Distribution: North America (Puebla in Mexico).
Hosts: Euphorbiaceae.
Notes: (1) Wood 1972g: 244 (to *Cnemonyx*).
References: (**hb**) Atkinson & Equihua 1985b: 231; Atkinson et al. 1986: 52; Wood, S. L. 1982b: 409. (**ds**) Atkinson & Equihua 1985b: 231, 1988: 86; Atkinson et al. 1986: 52; Wood, S. L. 1982b: 409. (**tx**) Wood, S. L. 1961d: 92, 1967c: 119, 1972g: 244, 1982b: 409.

***longicollis* (Blandford)** 1896e: 128 (*Loganius*). Holotype ♀; "Mexico" tobacco refuse intercepted at Paris; BMNH, London.
Figures: Blandford 1896e:pl. 6.
Distribution: South America (Brazil).
Notes: (1) Wood 1982b: 411 (to *Cnemonyx*; the "Mexican" tobacco refuse cited in the original description is now known to have originated in Brazil).
References: (**ec**) Wichmann 1955a: 107. (**ds**) Blackwelder 1947: 788; Ferrer 1942; Hagedorn 1910d: 82; Kleine 1913b: 150, 1914b: 353; Wichmann 1955a: 107. (**tx**) Blandford 1896e: 128; Hagedorn 1910a: 128; Schedl 1940a: 329; Wood, S. L. 1972g: 244, 1982b: 411.

***maculicornis* (Blandford)** 1896e: 127 (*Ceratolepis*). Lectotype ♀; Tole, Panama; BMNH, London, designated by Wood 1982b: 399.
Distribution: North America (Costa Rica/ Honduras/ Panama), South America (Colombia).
Hosts: *Virola* sp.
References: (**hb**) Wood, S. L. 1982b: 399. (**ds**) Blackwelder 1947: 788; Hagedorn 1910d: 82; Kleine 1913b: 150, 1914b: 365; Wood, S. L. 1982b: 399. (**tx**) Blandford 1896e: 127; Hagedorn 1910a: 127; Schedl 1962q: 486; Wood, S. L. 1972g: 244, 1982b: 399.

***minor* Schedl** 1951m: 75. Syntypes, sex?; Brasilien, Santa Catarina; Schedl Collection in NHMW, Wien, and Plaumann Collection.

Distribution: South America (Argentina/ Brazil).
Notes: (1) Schedl 1979c: 154 (citation of holotype invalid).
References: (**ds**) Nunberg 1964a: 234; Schedl 1966f: 82. (**tx**) Nunberg 1964a: 234; Schedl 1951m: 75, 1979c: 154; Wood, S. L. 1972g: 244.

***minusculus* (Blandford)** 1896e: 130 (*Loganius*). Holotype ♂; Volcan de Chiriqui, Panama; BMNH, London.
Distribution: North America (Costa Rica/ Guatemala/ Veracruz in Mexico/ Panama).
Hosts: *Vismia* spp.
References: (**ds**) Blackwelder 1947: 788; Hagedorn 1910d: 82; Kleine 1913b: 150, 1914b: 365; Wood, S. L. 1982b: 401. (**tx**) Blandford 1896e: 130; Hagedorn 1910a: 128; Wood, S. L. 1972e: 193, 1972g: 244, 1982b: 401.

vismiae Eggers 1929d: 63 (*Loganius*). Holotype ♂; Costa Rica (La Caja, 8 km westlich San Jose); MNB, Berlin. Synonymy: Wood 1972e: 193.
References: (**bv**) Winning 1930: 42. (**hb**) Winning 1930: 42. (**ds**) Blackwelder 1947. (**tx**) Eggers 1929d: 63; Wood, S. L. 1972e: 193, 1972g: 244.

***niger* (Eggers)** 1933b: 13 (*Ceratolepis*). Holotype, sex?; Franz. Guayana (St. Laurent du Maroni); MNHN, Paris.
Distribution: South America (Cayenne).
Notes: (3) Schedl 1962q: 485 (erroneously transferred this species to *Camptocerus* and renamed it *nigricans*; because the error occurred after 1960, the name has no status in nomenclature, since homonymy did not exist).
References: (**ds**) Blackwelder 1947: 787; Schedl 1960a: 77. (**tx**) Eggers 1933b: 13–14; Schedl 1952d: 349, 1960a: 77, 1962q: 486, 1979c: 166; Wood, S. L. 1974d: 278.

***nigrellus* Wood** 1974d: 278. Holotype ♀; 16 miles W Tehuantepec, Oaxaca, Mexico; Wood Collection, automatic.
Distribution: North America (Oaxaca in Mexico).
Hosts: Euphorbiaceae.
References: (**hb**) Wood, S. L. 1982b: 404. (**ds**) Wood, S. L. 1982b: 404. (**tx**) Wood, S. L. 1974d: 278, 1982b: 404.

niger Wood 1961d: 95 (*Loganius*). Holotype ♀; 16 miles W Tehuantepec, Oaxaca, Mexico; Wood Collection, preoccupied by Eggers 1933.
References: (**tx**) Wood, S. L. 1961d: 95, 1972g: 244, 1974d: 278.

***opacus* Wood** 1969b: 10. Holotype ♂; Playa del Coco, Guanacaste, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Hippomane macinella*.
References: (**hb**) Wood, S. L. 1982b: 408. (**ds**) Wood, S. L. 1982b: 408. (**tx**) Wood, S. L. 1969b: 10, 1972g: 244, 1982b: 408.

***panamensis* (Blandford)** 1896e: 129 (*Loganius*). Lectotype ♂; Tole, Chiriqui, Panama; BMNH, London, designated by Wood 1982b: 400.
Distribution: North America (Costa Rica/ Panama), South America (Venezuela).
Hosts: *Vismia guianensis*.
Notes: (3) Wood 1972g: 244 (to *Cnemonyx*).
References: (**hb**) Wood, S. L. 1982b: 400. (**ds**) Blackwelder 1947: 788; Hagedorn 1910d: 82; Kleine 1913b: 150, 1914b: 365; Wood, S. L. 1982b: 400. (**tx**) Blandford 1896e: 129; Eggers 1929d: 62–63; Hagedorn 1910a: 128; Schedl 1972q: 255; Wood, S. L. 1969b: 9, 1972g: 244, 1982b: 400.

***parvus* (Nunberg)** 1972b: 195 (*Loganius*). Holotype ♂; Sao Paulo, Itaquera; MZUSP, Sao Paulo.
Figures: Nunberg 1972b: 196.
Distribution: South America (Brazil).
References: (**tx**) Nunberg 1972a, 1972b: 195–196.

***prociduus* (Wood)** 1961d: 91 (*Loganius*). Holotype ♀; La Ceiba, Honduras; Wood Collection.
Distribution: North America (Honduras/ Veracruz in Mexico).
Notes: (1) Wood 1972g: 244 (to *Cnemonyx*).
References: (**ds**) Wood, S. L. 1982b: 407. (**tx**) Wood, S. L. 1961d: 91, 1972g: 244, 1982b: 407.

***protivorus* Wood** 1979b: 137. Holotype ♂; 40 km SE Socopo, Barinas, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Protium* sp.
References: (**tx**) Wood, S. L. 1979b: 137.

***recavus* Wood** 1969b: 11. Holotype ♂; 48 km E Tehuantepec, Oaxaca, Mexico; Wood Collection.
Distribution: North America (Oaxaca, Puebla in Mexico).
Hosts: "Leche Sillo" (Euphobiaceae).
References: (**hb**) Wood, S. L. 1982b: 404. (**ds**) Wood, S. L. 1982b: 404. (**tx**) Wood, S. L. 1969b: 11, 1982b: 404.

***rugulosus* (Eggers)** 1929d: 64 (*Loganius*). Holotype ♀; Ostbolivia; USNM, Washington.
Distribution: South America (Bolivia).
Notes: (1) Wood 1972g: 244 (to *Cnemonyx*).
References: (**ds**) Blackwelder 1947: 788. (**tx**) Anderson, W. H. & Anderson 1971: 28; Eggers 1929d: 64; Wood, S. L. 1972g: 244.

***setulosus* (Eggers)** 1929d: 62 (*Loganius*). Holotype ♂; Ostbolivia; Eggers Collection, in NHMW, Wien.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947: 788. (**tx**) Eggers 1929d: 62; Schedl 1979c: 226; Wood, S. L. 1972g: 244.

***similis* (Eggers)** 1929d: 63 (*Loganius*). Lectotype ♂; Ostbolivia; USNM, Washington, designated by Anderson & Anderson 1971: 30.
Distribution: South America (Bolivia).
Notes: (1) Wood 1972g: 244 (to *Cnemonyx*).
References: (**ds**) Blackwelder 1947: 788; Schedl 1966f: 80. (**tx**) Anderson, W. H. & Anderson 1971:

30; Eggers 1929d: 63; Schedl 1979c: 229; Wood, S. L. 1972g: 244.

***splendens* (Wood)** 1961d: 88 (*Loganius*). Holotype ♂; "Mexico" (intercepted at San Pedro, California); USNM, Washington.
Distribution: North America ("Mexico," Jalisco in Mexico).
Hosts: *Cybistax donnell-smithii, Hyppomane mancinella*.
References: (**ec**) Equihua & Atkinson 1986: 626. (**hb**) Atkinson & Equihua 1988: 86; Equihua & Atkinson 1986: 626. (**ds**) Atkinson & Equihua 1988: 86; Equihua & Atkinson 1986: 626; Wood, S. L. 1982b: 405. (**tx**) Wood, S. L. 1961d: 88, 1972g: 244, 1982b: 405.

***squamifer* Wood** 1979b: 138. Holotype ♂; Tikal, Peten, Guatemala; Wood Collection.
Distribution: North America (Guatemala).
References: (**ds**) Estrada & Atkinson 1988: 204; Wood, S. L. 1982b: 406. (**tx**) Wood, S. L. 1979b: 138, 1982b: 406.

***vagabundus* (Wood)** 1961d: 89 (*Loganius*). Holotype ♂; Key West, Florida [USA]; USNM, Washington.
Distribution: Antilles Islands (Antigua/ Dominican Republic in Hispanola/ Puerto Rico/ Virgin Islands), North America (Panama/ Florida in USA).
Hosts: *Pisida piscipala*.
References: (**ds**) Atkinson et al. 1991: 157; Bright 1981c: 153, 1985c: 171; Browne 1970: 543; Wood, S. L. 1982b: 406. (**tx**) Bright 1985c: 171; Browne 1970: 543; Wood, S. L. 1961d: 89, 1972g: 244, 1982b: 406.

***vestitus* (Eggers)** 1929d: 59 (*Loganius*). Lectotype ♂; Ostbolivia; USNM, Washington, designated by Anderson & Anderson 1971: 35.
Distribution: South America (Bolivia/ Venezuela).
Hosts: *Trichilis propinguus*.
References: (**ds**) Blackwelder 1947: 788; Schedl 1966f: 80, 1976a: 50. (**tx**) Anderson, W. H. & Anderson 1971: 35; Eggers 1929d: 59; Schedl 1979c: 266; Wood, S. L. 1972g: 244.

***vismiacolens* Wood** 1979b: 138. Holotype ♀; Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Vismia* sp.
Notes: (1) Wood, S. L. 1981: 123 (lapsus calami corrected).
References: (**tx**) Wood, S. L. 1979b: 138, 1981: 123.

Genus *Camptocerus* Latreille

CAMPTOCERUS LATREILLE 1829: 91. Type-species: *Hylesinus aeneipennis* Fabricius, monobasic.
Keys: Wood 1982b: 412.
References: (**hb**) Wood, S. L. 1986a: 58. (**ds**) Wood, S. L. 1986a: 58. (**tx**) Blandford 1896e: 124–126; Chapuis 1869: 50–51, 1873: 258–259; Erichson 1836: 59; Hagedorn 1910a: 125–126, 1910d: 82; Lacordaire 1860: 368; Latreille 1829: 91; Schedl 1962q: 485; Wood, S. L. 1972g: 243, 1982b: 411–412, 1986a: 58.

***aeneipennis* (Fabricius)** 1801: 392 (*Hylesinus*). Lectotype ♂; lectotype labeled Essequibo (Guyana), published as America meridionali; UZMC, Copenhagen, designated by Wood 1982b: 412.
Distribution: North America (Costa Rica/ Panama), South America (Argentina/ Bolivia/ Brazil/ Cayenne/ Colombia/ Guyana/ Suriname/ Venezuela).
Hosts: *Protium* spp.

L. 1961d: 101, 1982b: 451–455, 1986a: 60.

***aberrans* Wichmann** 1914b: 143. Syntypes, sex? Nouveau Chantier, Guyane Francaise; Wichmann Collection.
Distribution: Antilles Islands (Guadeloupe), South America (Brazil/ Cayenne/ Venezuela).
Hosts: *Clusia* sp.
References: (**ds**) Blackwelder 1947: 786; Kleine 1914b: 339. (**tx**) Eggers 1933b: 19, 1940a: 131; Schedl 1962r: 86; Wichmann 1914b: 143; Wood, S. L. 1972e: 196.

setulosus Eggers 1933b: 19. Holotype, sex?; Franz. Guayana; MNHN, Paris. Synonymy: Schedl 1962r: 87.
References: (**ds**) Blackwelder 1947: 786. (**tx**) Eggers 1933b: 19, 1940a: 131; Schedl 1962r: 86–87.

imitans Eggers 1940a: 131. Holotype ♂; Insel Guadeloupe; USNM, Washington. Synonymy: Schedl 1962r: 86.
References: (**ds**) Bright 1985c: 172. (**tx**) Anderson, W. H. & Anderson 1971: 15; Bright 1985c: 172; Eggers 1940a: 131; Schedl 1962r: 86.

***ambitus* Wood** 1969b: 13. Holotype ♀; 25 km E Coatzocoalcos, Veracruz, Mexico; Wood Collection.
Distribution: North America (Tabasco, Veracruz in Mexico).
Hosts: Tree limbs and bole, not identified.
References: (**hb**) Wood, S. L. 1982b: 454. (**ds**) Wood, S. L. 1982b: 454. (**tx**) Wood, S. L. 1969b: 13, 1982b: 454.

***bicolor* Eggers** 1933b: 19. Holotype ♀; Franz. Guayana (Nouveau Chantier); MNHN, Paris.
Distribution: South America (Cayenne).
References: (**ds**) Blackwelder 1947: 786. (**tx**) Eggers 1933b: 19; Schedl 1962r: 86; Wood, S. L. 1972e: 196.

***boops* Blandford** 1897a: 175. Holotype ♀; Tamahu, Alta Verapaz, Guatemala; BMNH, London.
Figures: Nunberg 1965b:pl. 1, Schedl 1961k: 736.
Distribution: Africa (introduced into: Cameroon/ Ghana), Antilles Islands (Jamaica), North America (Costa Rica/ Guatemala/ Honduras/ Panama), South America (Cayenne).
Hosts: *Rheedia edulis*.
References: (**ay**) Van Ryn-Tournel 1975. (**hb**) Wood, S. L. 1982b: 454. (**ds**) Blackwelder 1947: 786; Bright 1985c: 172; Hagedorn 1910d: 76; Kleine 1913b: 144, 1914b: 339, 370; Wood, S. ***lautus* Wood** 1961d: 101. Holotype ♀; Leper Island, San Juan, Puerto Rico; USNM, Washington.
Distribution: Antilles Islands (Puerto Rico).
Hosts: *Nerium* twigs.

References: (**ds**) Bright 1985c: 172. (**tx**) Bright 1985c: 172; Wood, S. L. 1961d: 101.

***lectus* Wood** 1971: 17. Holotype ♂; La Carbonera Experimental Forest, 50 km NW Merida, Merida, Venezuela; Wood Collection.
Distribution: Antilles Islands (Dominica), South America (Venezuela).
Hosts: *Clusia* limbs and bole.
References: (**hb**) Wood, S. L. 1971: 17. (**ds**) Bright 1981c: 155, 1985c: 172. (**tx**) Bright 1985c: 172; Wood, S. L. 1971: 17.

***limatus* Wood** 1969b: 13. Holotype ♂; Finca Gromaco on Rio Coto Brus, Puntarenas, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: (?) *Protium* sp.
References: (**hb**) Wood, S. L. 1982b: 453. (**ds**) Wood, S. L. 1982b: 453. (**tx**) Wood, S. L. 1969b: 13, 1982b: 453.

***mexicanus* Wood** 1981: 123. Holotype ♂; Las Piedras, Moyotepec, Morelia, Mexico; Wood Collection.
Figures: Atkinson et al. 1986: 59.
Distribution: North America (Morelos in Mexico).
Hosts: *Bursera* sp.
References: (**hb**) Atkinson et al. 1986: 54. (**ds**) Atkinson et al. 1986: 54; Wood, S. L. 1982b: 453. (**tx**) Atkinson et al. 1986: 59; Wood, S. L. 1981: 123, 1982b: 453.

Genus *Pycnarthrum* Eichhoff

PYCNARTHRUM EICHHOFF 1878b: 41, 104. Type-species: *Pycnarthrum gracile* Eichhoff = *Hypoborus hispidum* Ferrari, subsequent designation by Hopkins 1914: 128.

Nemobius Chapuis 1869: 41. Type-species: *Nemobius lambottei* Chapuis =*Hypoborus hispidum* Ferrari, subsequent designation by Hopkins 1914: 128, preoccupied by Serville 1839.
References: (**tx**) Blandford 1897a: 116; Chapuis 1869: 41, 1873: 249; Gemminger & Harold 1872: 2673; Hopkins 1914: 128; Vickery 1963: 17.

Monebius Hopkins 1914: 125. Type-species: *Nemobius lambottei* Chapuis =*Hypoborus hispidum* Ferrari, automatic, an isotypical junior synonym.
References: (**tx**) Hopkins 1914: 125.

Nomebius Navas 1915: 34. Type-species: *Nemobius lambottei* Chapuis =*Hypoborus hispidum* Ferrari, automatic, an isotypical junior synonym.
References: (**tx**) Navas 1915: 34.

***amersum* Wood** 1983: 658. Holotype ♂; Tenacatita, Jalisco, Mexico; Wood Collection.
Distribution: North America (Jalisco in Mexico).
Hosts: *Brosimum alicastrum*.
References: (**ec**) Equihua & Atkinson 1986: 627. (**hb**) Equihua & Atkinson 1986: 627. (**ds**) Atkinson & Equihua 1986: 627; Estrada & Atkinson 1988: 204. (**tx**) Wood, S. L. 1983: 658.

***brosimi* Wood** 1971: 14. Holotype ♂; 9 km S Barrancas, Barinas, Venezuela; Wood Collection.
Distribution: North America (Costa Rica), South America (Colombia/ Venezuela).
Hosts: *Brosimum* sp. (Charo amarillo).
Notes: (1) Wood 1982b: 461 (correction of lapsus calami).
References: (**ds**) Atkinson & Equihua 1988: 100. (**tx**) Wood, S. L. 1971: 14, 1982b: 461.

***carinatum* Wood** 1971: 13. Holotype ♂; near Leonpampa, Dept. Huanuco, Peru, 800 m; Wood Collection.
Distribution: South America (Peru).
References: (**tx**) Wood, S. L. 1971: 13.

***fulgidum* Wood** 1977b: 217. Holotype ♂; 8 km S Colonia, Valle de Cauca, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Guarea trichiloides*.
References: (**tx**) Wood, S. L. 1977b: 217.

***funerium* Wood** 1971: 11. Holotype ♀; La Ceiba, Atlantida, Honduras; Wood Collection.
Distribution: North America (Honduras).
References: (**ec**) Equihua & Atkinson 1986: 627. (**hb**) Equihua & Atkinson 1986: 627. (**ds**) Equihua & Atkinson 1986: 627; Wood, S. L. 1982b: 458. (**tx**) Wood, S. L. 1971: 11, 1982b: 458.

***hispidum* (Ferrari)** 1867: 19 (*Hypoborus*). Holotype, sex?; Cuba; NHMW, Wien, lost from pin.
Figures: Atkinson et al. 1986: 61.
Distribution: Antilles Islands (Cuba/ Guadeloupe/ Jamaica/ Puerto Rico/ Virgin Islands), North America (Costa Rica/ El Salvador/ Guatemala/ Honduras/ almost all states of Mexico/ Nicaragua/ Panama/ Florida, Texas in USA), South America (Guyana/ Venezuela).
Hosts: *Ficus* spp.

***acares* Wood** 1969b: 15. Holotype ♀; Rio Damitas, Dota Mts., San Jose, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica/ Guatemala/ Panama).
Hosts: *Cecropis* sp. leaf petioles.
References: (**hb**) Wood, S. L. 1982b: 493. (**ds**) Wood, S. L. 1982b: 493. (**tx**) Wood, S. L. 1969b: 15, 1982b: 493.

***adustus* (Eggers)** 1943a: 368 (*Hylocurosoma*). Holotype ♂?; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
References: (**tx**) Anderson, W. H. & Anderson 1971: 3; Eggers 1943a: 368; Schedl 1952d: 346.

***aequipunctatus* Eggers** 1943a: 361. Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris.
Distribution: South America (Bolivia).
References: (**tx**) Eggers 1943a: 361.

***alni* Wood** 1969b: 20. Holotype ♀; Volcan Irazu, Cartago, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Alnus acuminatus*.
References: (**hb**) Wood, S. L. 1982b: 499. (**ds**) Wood, S. L. 1982b: 499. (**tx**) Wood, S. L. 1969b: 20, 1982b: 499.

***amabilis* Wood** 1975a: 26. Holotype ♀; Mt. Tzontehuitz, Chiapas, Mexico; CNCI, Ottawa.
Distribution: North America (Chiapas in Mexico).
Hosts: *Quercus* sp.
References: (**ds**) Wood, S. L. 1982b: 490. (**tx**) McNamara 1984: 759; Wood, S. L. 1975a: 26, 1982b: 490.

***amoenus* Wood** 1967c: 128. Holotype ♀; 35 km N Juchitlan, Jalisco, Mexico; Wood Collection.
Distribution: North America (Jalisco, Tamaulipas in Mexico).
Hosts: *Ficus* sp.
References: (**ec**) Equihua & Atkinson 1986: 627. (**hb**) Equihua & Atkinson 1986: 627; Wood, S. L. 1982b: 479. (**ds**) Atkinson et al. 1986: 56; Equihua & Atkinson 1986: 627; Wood, S. L. 1982b: 479. (**tx**) Wood, S. L. 1967c: 128, 1982b: 479.

***anceps* Wood** 1981: 126. Holotype ♀; Piedras Blancas, 11 km W Medellin, Antioquia, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Cecropia* sp. leaf petioles.
References: (**tx**) Wood, S. L. 1981: 126.

***argentinensis* (Eggers)** 1928c: 87 (*Prionosceles*). Lectotype, sex?; Argentina; USNM, Washington, designated by Anderson & Anderson 1971.
Distribution: South America (Argentina).
References: (**ds**) Blackwelder 1947: 786. (**tx**) Anderson, W. H. & Anderson 1971: 4; Eggers 1928c: 87.

***ater* (Eggers)** 1943a: 365 (*Prionosceles*). Holotype, sex?; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
Notes: (1) Originally spelled *atrum*, gender change required the spelling correction.
References: (**tx**) Anderson, W. H. & Anderson 1971: 5; Eggers 1943a: 365–366; Schedl 1952d: 346.

***aterrimus* Wood** 1988a: 32. Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris, automatic.
Distribution: South America (Bolivia).
References: (**tx**) Wood, S. L. 1988a: 32.

ater Eggers 1943a: 371 (*Hylocurosoma*). Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris, preocupiedby Eggers 1943.
Notes: (1) This name was originally spelled *atrum* before the gender change.
References: (**tx**) Eggers 1943a: 371; Schedl 1952d: 346.

***atratus* (Blandford)** 1897a: 178 (*Prionosceles*). Lectotype ♂; Senahu, Vera Paz, Guatemala; BMNH, London, designated by Wood 1982b: 475.
Notes: (1) Wood 1982b: 475 (subspecies recognized; however, additional studies in Nicaragua and El Salvador might indicate gradual clinal intergradation, not subspecies).
References: (**hb**) Atkinson & Equihua 1985b: 232, 1986a: 420; Wood, S. L. 1982b: 475. (**ds**) Atkinson & Equihua 1985b: 232, 1986a: 420; Blackwelder

1947: 786; Bright 1972b: 1497; Hagedorn 1910d: 76; Kleine 1914b: 370; Wood, S. L. 1982b: 475. (**tx**) Blandford 1897a: 178; Hagedorn 1910a: 117; Hopkins 1914: 128; Wood, S. L. 1982b: 475.

Distribution: North America (Guatemala/ Honduras/ Chiapas, Oaxaca, Veracruz in Mexico).

Hosts: *Cecropia* sp. leaf petioles.

Notes: (1) Wood 1982b: 475 (subspecies recognized).

References: (**tx**) Blandford 1897a: 178; Wood, S. L. 1982b: 475.

atratus panamensis (Wood) 1961d: 103 (*Prionosceles*). Holotype ♂; Summit, Canal Zone, Panama; USNM, Washington.

Notes: Wood 1982b: 476 (reduced to subspecific rank).

Distribution: North America (Costa Rica/ Panama).

Hosts: *Cecropia* sp. leaf petioles.

References: (**ec**) Wood, S. L. 1983b: 768. (**hb**) Wood, S. L. 1983b: 768. (**ds**) Kleine 1914b: 370; Wood, S. L. 1982b: 476. (**tx**) Wood, S. L. 1961d: 103, 1982b: 476.

***atrotibialis* (Eggers)** 1943a: 365 (*Prionosceles*). Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris.

Distribution: South America (Bolivia).

References: (**tx**) Eggers 1943a: 365; Schedl 1979c: 31.

***banosus* (Hagedorn)** 1909a: 743 (*Hexacolus*). Syntypes 2, sex?; Banos, Ecuador; MNHN, Paris.

Distribution: South America (Ecuador).

References: (**ds**) Blackwelder 1947: 786; Hagedorn 1910d: 77; Kleine 1914b: 343. (**tx**) Hagedorn 1909a: 743, 1910a: 114; Schedl 1979c: 33.

***bicolor* (Eggers)** 1931b: 33 (*Hexacolus*). Holotype ♂; Sao Paulo, Brazil); Prague Museum.

Distribution: South America (Brazil).

References: (**ds**) Blackwelder 1947: 786. (**tx**) Eggers 1931b: 33, 1940a: 132; Schedl 1954b: 22.

***blandfordi* (Schedl)** 1936i: 104 (*Hexacolus*). Holotype ♂; Costa Rica, Hamburgfarm, Rio Reventazon, Ebene Limon; Schedl Collection in NHMW, Wien.

Distribution: North America (Costa Rica).

Hosts: *Cecropia* sp. leaf petioles.

References: (**hb**) Wood, S. L. 1982b: 484. (**ds**) Blackwelder 1947: 786; Wood, S. L. 1982b: 484. (**tx**) Blackman 1943a: 381; Schedl 1936i: 104, 1937g: 66, 1952d: 346, 355, 1979c: 42.

***boliviae* (Schedl)** 1951m: 80 (*Hexacolus*). Holotype ♂; Bolivien, Cochabamba; Eggers Collection, in NHMW, Wien.

Distribution: South America (Bolivia).

Notes: (3) Schedl 1951m: 80 (*Pityophthorus glaber* Eggers, nomen nudum, synonymy).

References: (**tx**) Schedl 1951m: 80, 1979c: 42.

Distribution: South America (Bolivia).

References: (**ds**) Blackwelder 1947: 784. (**tx**) Anderson, W. H. & Anderson 1971: 7; Eggers 1928a: 86, 1934a: 80–81; Schedl 1935m: 51, 1979c: 43.

***boliviensis* Wood** 1988a: 32. Lectotype, sex?; Boliviens (Cochabamba); USNM, Washington, designated by Anderson & Anderson 1971: 7, automatic.

Distribution: South America (Bolivia).

References: (**tx**) Anderson W. H. & Anderson 1971: 7; Wood, S. L. 1988a: 32.

bolivianus Eggers 1928a: 88 (*Prionosceles*). Lectotype, sex?; Boliviens (Cochabamba); USNM, Washington, designated by Anderson & Anderson 1971: 7, preoccupied by Eggers 1928a: 86.

References: (**ds**) Blackwelder 1947: 786. (**tx**) Anderson, W. H. & Anderson 1971: 7; Eggers 1928a: 88, 1934a: 80f; Schedl 1979c: 43.

***brasilianus* Wood** 1988a: 32. Holotype ♂?; Brazil; Schedl Collection in NHMW, Wien, automatic.

Distribution: South America (Brazil).

References: (**tx**) Wood, S. L. 1988a: 32.

brasiliensis Schedl 1935f: 274 (*Hexacolus*). Holotype ♂?; Brazil; Schedl Collection in NHMW, Wien, preoccupied by Eggers 1928a: 89.

References: (**tx**) Schedl 1935f: 274, 1979c: 45; Wood, S. L. 1988a: 32.

***brasiliensis* (Eggers)** 1928a: 89 (*Prionosceles*). Holotype, sex?; Blumenau, Brazil; USNM, Washington.

Distribution: South America (Brazil).

References: (**ds**) Blackwelder 1947: 786. (**tx**) Eggers 1928a: 89–90; Schedl 1935f: 274.

***bruchi* (Hagedorn)** 1909: 743 (*Hexacolus*). Syntypes (several), sex?; Argentinien; Hamburg Museum, lost.

Distribution: South America (Argentina/ Brazil).

References: (**cn**) Costa Lima 1956. (**hb**) Costa Lima 1956. (**ds**) Blackwelder 1947: 784; Bruch 1914a; Costa Lima 1956; Hagedorn 1910d: 77; Kleine 1914b: 333. (**tx**) Bruch 1938; Costa Lima 1956; Eggers 1931c: 185; Hagedorn 1909a: 743, 1910a: 114; Schedl 1951h: 284, 1958f: 34.

***canaliculus* Wood** 1977d: 517. Holotype ♀; La Carbonera Experimental Forest, 50 km NW Merida, Merida, Venezuela; Wood Collection.

Distribution: South America (Venezuela).

Hosts: *Clusia* sp.

References: (**tx**) Wood, S. L. 1977d: 517.

***canalis* Wood** 1974a: 13. Holotype ♀; Mt. Tzontehuitz, Chiapas, Mexico; CNCI, Ottawa.

Distribution: North America (Chiapas in Mexico).

References: (**ds**) Wood, S. L. 1982b: 490. (**tx**) McNamara 1984: 759; Wood, S. L. 1974a: 13, 1982b: 490.

***cecropiavorus* Wood** 1969b: 17. Holotype ♀; San Ignacio de Acosta, San Jose, Costa Rica; Wood Collection.
Notes: (1) Wood 1982b: 482 (Subspecies are recognized in the upland area and on opposite sides of Costa Rica).
References: (**hb**) Wood, S. L. 1982b: 482. (**ds**) Wood, S. L. 1982b: 482. (**tx**) Wood, S. L. 1969b: 17, 1982b: 482.

cecropiavorus cecropiavorus:
Distribution: North America (central plateau and northern Costa Rica).
Hosts: *Cecropia peltata* leaf petioles.
References: (**tx**) Wood, S. L. 1969b: 17, 1982b: 483.

***cecropiavorus acuminatus* Wood** 1969b: 17. Holotype ♀; Tapanti, Cartago, Costa Rica; Wood Collection.
Distribution: North America (eastern Costa Rica).
Hosts: *Cecropia peltata* leaf petioles.
References: (**tx**) Wood, S. L. 1969b: 17–18, 1982b: 483.

***cecropiavorus punctifer* Wood** 1969b: 18. Holotype ♂; Gatun Dam, Canal Zone, Panama; Wood Collection.
Distribution: North America (Pacific slope of Costa Rica and Panama).
Hosts: *Cecropia peltata* leaf petioles.
References: (**hb**) Wood, S. L. 1982b: 483. (**ds**) Wood, S. L. 1982b: 483. (**tx**) Wood, S. L. 1969b: 18, 1982b: 483.

***cecropicolens* Wood** 1969b: 16. Holotype ♀; Peralta, Cartago, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Cecropia* sp. branch terminal.
References: (**hb**) Wood, S. L. 1982b: 481. (**ds**) Wood, S. L. 1982b: 481. (**tx**) Wood, S. L. 1967c: 123, 1969b: 16, 1982b: 481.

***cecropii* (Schedl)** 1937g: 66 (*Hexacolus*). Holotype ♀; La Hondura, Costa Rica; Schedl Collection in NHMW, Wien.
Distribution: North America (Costa Rica).
Hosts: *Cecropia peltata* leaf petioles.
References: (**hb**) Wood, S. L. 1982b: 484. (**ds**) Blackwelder 1947: 786; Wood, S. L. 1982b: 484. (**tx**) Blackman 1943a; Schedl 1937g: 66, 1952d: 346, 1955d: 274, 1979c: 55; Wood, S. L. 1969b: 17, 1982b: 484.

***cedrelae* Wood** 1969b: 19. Holotype ♀; Rincon de Osa, Puntarenas, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Cedrela mexicana, Vismia guianensis*.
References: (**hb**) Wood, S. L. 1982b: 495. (**ds**) Wood, S. L. 1982b: 495. (**tx**) Wood, S. L. 1969b: 19, 1982b: 495.

***chapuisi* Wood** 1977b: 210. Syntypes 2 ♂; Colombie; IRSNB, Brussels, automatic.
Distribution: North America (Panama), South America (Colombia/ Venezuela).
Hosts: *Cecropia* spp. leaf petioles.
References: (**tx**) Wood, S. L. 1977b: 210, 1977d: 517.

laevigatus Chapuis 1869: 49 (*Ctenophorus*). Syntypes ♂; Colombie; IRSNB, Brussels, preoccupied by Ferrari 1867a: 77.
References: (**tx**) Chapuis 1869: 49, 1873: 257; Schedl 1935f: 273; Wood, S. L. 1977b: 210, 1977d: 517.

levis Blackman 1943a: 382 (*Hexacolus*). Holotype ♀; Paraiso, Canal Zone, Panama; USNM, Washington, preoccupied by *laevis* Eggers 1928 [Code, Article 58(2)]. Synonymy: Wood 1977d: 517.
References: (**hb**) Wood, S. L. 1982b: 478. (**ds**) Wood, S. L. 1982b: 478. (**tx**) Blackman 1943a: 382; Wood, S. L. 1977b: 210, 1977d: 517, 1982b: 478.

***clusiacolens* Wood** 1967c: 121. Holotype ♀; 10 km E Volcan Paricutin, Michoacan, Mexico; Wood Collection.
Distribution: North America (Guatemala/ Honduras/ Chiapas, Michoacan in Mexico).
Hosts: *Clusia* sp.
References: (**hb**) Wood, S. L. 1982b: 489. (**ds**) Atkinson & Equihua 1985b: 233; Wood, S. L. 1982b: 489. (**tx**) Wood, S. L. 1967c: 121, 1982b: 489.

***clusiae* Wood** 1969b: 14. Holotype ♀; Volcan Poas, Heredia, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Clusia* sp.
References: (**hb**) Wood, S. L. 1982b: 488. (**ds**) Wood, S. L. 1982b: 488. (**tx**) Wood, S. L. 1967c: 122, 1969b: 14, 1982b: 488.

***clusiavorus* Wood** 1967c: 122. Holotype ♀; Volcan de Agua, Esquintla, Guatemala; Wood Collection.
Distribution: North America (Guatemala/ Veracruz in Mexico).
Hosts: *Clusia* sp.
References: (**hb**) Wood, S. L. 1982b: 489. (**ds**) Wood, S. L. 1982b: 489. (**tx**) Wood, S. L. 1967c: 122, 1982b: 489.

***columbianus* (Schedl)** 1967f: 160 (*Hexacolus*). Holotype ♂; Colombia, Sierra S. Lorenzo; NHMB, Budapest.
Distribution: South America (Colombia).
References: (**tx**) Schedl 1967f: 160–161.

***comitabilis* Wood** 1978b: 401. Holotype ♀; Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Clusia* sp.
References: (**tx**) Wood, S. L. 1978b: 401.

***confusus* (Eggers)** 1943a: 370 (*Hylocurosoma*). Holotype, sex?; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).

Notes: (1) Name originally spelled *confusum*.
References: (**tx**) Anderson, W. H. & Anderson 1971: 10; Eggers 1943a: 370; Schedl 1952d: 346.

***constrictus* Wood** 1977d: 518. Holotype ♀; Piedras Blancas, 11 km W Medellin, Antioquia, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: (?) *Baccharus* sp.
References: (**tx**) Wood, S. L. 1977d: 518.

***contractus* Wood** 1977d: 518. Holotype ♀; 13 km SE El Vigia, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Liana.
References: (**tx**) Wood, S. L. 1977d: 518.

***costabilis* Wood** 1974a: 13. Holotype ♀; Lago Catemaco, Veracruz, Mexico; CNCI, Ottawa.
Distribution: North America (Veracruz in Mexico).
References: (**ds**) Wood, S. L. 1982b: 481. (**tx**) McNamara 1984: 759; Wood, S. L. 1974a: 13, 1982b: 481.

***crassus* Wood** 1971: 16. Holotype ♂; Barro Colorado Island, Canal Zone, Panama; Wood Collection.
Distribution: North America (Panama).
References: (**ds**) Wood, S. L. 1982b: 487. (**tx**) Wood, S. L. 1971: 16, 1982b: 487.

***crinalis* Wood** 1978b: 402. Holotype ♀; La Carbonera Experimental Forest, 50 km NW Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Clusia* sp.
References: (**tx**) Wood, S. L. 1978b: 402.

***crinitus* Wood** 1978b: 402. Holotype ♀; El Laurel Experimental Farm, 12 km SE Caracas, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Leguminous liana.
References: (**tx**) Wood, S. L. 1978b: 402.

***cubensis* (Schedl)** 1972g: 56 (*Hexacolus*). Holotype ♂; Cuba, Prov. Pinar del Rio, Malas; Schedl Collection in NHMW, Wien.
Distribution: Antilles Islands (Cuba).
Hosts: *Ficus* sp.
Notes: (3) Schedl labeled the male holotype as a female.
References: (**ds**) Bright 1985c: 172. (**tx**) Bright 1985c: 172; Schedl 1972g: 56, 1979c: 71.

***culcitatus* (Blandford)** 1897a: 179 (*Epomadius*). Lectotype ♀?; Pena Blanca, 3000–4000 ft., Chiriqui, Panama; BMNH, London, designated by Wood 1982b: 494.
Distribution: North America (Panama).
References: (**ds**) Blackwelder 1947: 786; Hagedorn 1910d: 76; Kleine 1914b: 370; Wood, S. L. 1982b: 494. (**tx**) Blandford 1897a: 179; Hagedorn 1910a: 118; Hopkins 1914: 121; Lucas 1920: 271; Wood, S. L. 1977c: 384, 1982b: 494. (**ms**) Lucas 1920: 271.

***cylindricus* Schedl** 1978c: 297. Holotype ♀; Peru, Machu-Picchu, 2000 m; Schedl Collection in NHMW, Wien.
Distribution: South America (Peru).
References: (**tx**) Schedl 1978c: 297–298.

***declivistriatus* Schedl** 1967a: 126. Holotype ♂?; Buenaventura, Columbien to Tokyo (Japan), imported; PPST, Tokyo.
Distribution: South America (Colombia).
Notes: *Virola* sp.
References: (**tx**) Schedl 1967a: 126, 1979c: 76.

***decorus* Wood** 1978b: 402. Holotype ♂; 40 km E Canton, Barinas, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Nectandra* sp.
References: (**tx**) Wood, S. L. 1978b: 402.

***discedens* (Eggers)** 1940a: 133 (*Hexacolus*). Holotype ♀; Guadeloupe (Trois Rivieres); Eggers Collection, in NHMW, Wien.
Distribution: Antilles Islands (Guadeloupe).
References: (**ds**) Bright 1985c: 172. (**tx**) Bright 1985c: 172; Eggers 1940a: 133; Schedl 1979c: 82.

***discriminatus* Wood** 1988a: 32. Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris, automatic.
Distribution: South America (Bolivia).
References: (**tx**) Wood, S. L. 1988a: 32.

discedens Eggers 1943a: 360. Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris, preoccupied by Eggers 1940.
References: (**tx**) Eggers 1943a: 360; Schedl 1979c: 82.

***dissimilis* Schedl** 1967d: 5. Holotype ♂; Brasilien, Ibicare, 27 degrees 09′-51 degrees 18′, 600 m; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1967d: 5–6, 1979c: 82–83.

***dubiosus* (Schedl)** 1972g: 55 (*Prionosceles*). Holotype ♂; Brasilien, S. Bocaina, S. J. Berreira, 1650 m; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1972g: 55, 1979c: 84.

***eggersi* (Schedl)** 1952d: 346 (*Hexacolus*). Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris, automatic.
Distribution: South America (Bolivia).
References: (**tx**) Schedl 1952d: 346.

bicolor Eggers 1943a: 363. Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris, preoccupied by Eggers 1931.
References: (**tx**) Eggers 1943a: 363; Schedl 1952d: 346, 1954b: 22.

***elongatissismus* Wood** 1988a: 32. Lectotype, sex?; Bolivia (Cochabamba); USNM, Washington, designated by Anderson & Anderson 1971: 12, automatic.
Distribution: South America (Bolivia).

References: (**tx**) Wood, S. L. 1988a: 32.

elongatus Eggers 1943a: 369 (*Hylocurosoma*). Lectotype, sex?; Bolivia (Cochabamba); USNM, Washington, designated by Anderson & Anderson 1971: 12, preoccupied by Schedl 1935.
Notes: (1) The name *elongatus* Schedl is treated below as a synonym of *trispinosus* Eggers, but it is an available name.
References: (**ds**) Schedl 1970e: 91, 1973a: 366, 1973d: 154. (**tx**) Anderson, W. H. & Anderson 1971: 12; Eggers 1943a: 369; Schedl 1952d: 346, 1979c: 89.

***erineophilus* Wood** 1969b: 20. Holotype ♀; Tapanti, Cartago, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Ficus* sp.
References: (**hb**) Wood, S. L. 1982b: 499. (**ds**) Wood, S. L. 1982b: 499. (**tx**) Wood, S. L. 1969b: 20–21, 1982b: 499.

***exiguus* Wood** 1969b: 22. Holotype ♂; San Isidro del General, San Jose, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Ficus* sp.
References: (**hb**) Wood, S. L. 1982b: 506. (**ds**) Wood, S. L. 1982b: 506. (**tx**) Wood, S. L. 1969b: 22–23, 1982b: 506.

***eximius* Wood** 1981: 122. Holotype ♀; Peru, Machu-Pichu, 2000 m; Schedl Collection in NHMW, Wien, automatic.
Distribution: South America (Peru).
References: (**tx**) Wood, S. L. 1981: 122.

grandis Schedl 1978c: 298. Holotype ♀; Peru, Machu-Pichu, 2000 m; Schedl Collection in NHMW, Wien, preoccupied by Schedl 1962.
References: (**tx**) Schedl 1978c: 298, 1979c: 109.

***facetus* Wood** 1967c: 126. Holotype ♀; Palin, Esquintla, Guatemala; Wood Collection.
Distribution: North America (Guatemala).
Hosts: *Ficus* sp.
References: (**hb**) Wood, S. L. 1982b: 497. (**ds**) Wood, S. L. 1982b: 497. (**tx**) Wood, S. L. 1967c: 126, 1982b: 497.

***festus* Wood** 1977d: 519. Holotype ♀; Piedras Blancas, 11 km W Medellin, Antioquia, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Cecropia* sp. leaf petioles.
References: (**tx**) Wood, S. L. 1977d: 519.

***ficicolens* Wood** 1981: 126. Holotype ♀; Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Ficus* sp.
References:(**tx**) Wood, S. L. 1981: 126.

***ficivorus* Wood** 1967c: 125. Holotype ♀; Paulin, Guatemala; Wood Collection.
Distribution: North America (Guatemala).
Hosts: *Ficus* sp.
References: (**hb**) Wood, S. L. 1982b: 500. (**ds**) Wood, S. L. 1982b: 500. (**tx**) Wood, S. L. 1967c: 125, 1982b: 500.

***frontoglabratus* (Schedl)** 1935f: 274 (*Hexacolus*). Holotype ♀; Argentine: San Ignacio; Schedl Collection in NHMW, Wien.
Distribution: South America (Argentina).
References: (**ds**) Blackwelder 1947: 786. (**tx**) Schedl 1935f: 274, 1979c: 101.

***fulmineus* Wood** 1977b: 217. Holotype ♀; La Carbonera Experimental Forest, 50 km NW Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Clusia* sp.
References: (**tx**) Wood, S. L. 1977b: 217.

***genialis* Wood** 1975a: 27. Holotype ♀; Laguna Santa Maria, Nayarit, Mexico; Wood Collection.
Distribution: North America (Jalisco, Nayarit in Mexico).
Hosts: *Ficus* sp.
References: (**tx**) Wood, S. L. 1975a: 27.

***gennaeus* Wood** 1988a: 33. Holotype ♀; 30 km N Merida, Merida, Venezuela; Wood Collection, automatic.
Distribution: South America (Venezuela).
Hosts: *Podocarpus* sp.
References: (**tx**) Wood, S. L. 1988a: 33.

genialis Wood 1978b: 403. Holotype ♀; 30 km N Merida, Merida, Venezuela; Wood Collection, preoccupied by Wood 1975.

***libidus* Wood** 1978b: 404. Holotype ♀; Rancho Grande, Pittier National Park, Aragua, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Cucurbitaceae vine.
References: (**tx**) Wood, S. L. 1978b: 404.

***limbatus* (Eggers)** 1943a: 370 (*Hylocurosoma*). Holotype, sex?; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
References: (**tx**) Anderson, W. H. & Anderson 1971: 17; Eggers 1943a: 370–371; Schedl 1952d: 346.

***longicollis* (Eggers)** 1951: 152 (*Hexacolus*). Holotype ♂; Guadeloupe; Eggers Collection, in NHMW, Wien.
Distribution: Antilles Islands (Guadeloupe).
References: (**ds**) Bright 1985c: 172. (**tx**) Bright 1985c: 172; Eggers 1951: 152; Schedl 1979c: 140.

***longipennis* Eggers** 1943a: 363. Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris.
Distribution: South America (Bolivia).
References: (**tx**) Eggers 1943a: 363; Schedl 1979c: 141.

***major* (Eggers)** 1928c: 86 (*Prionosceles*). Holotype, sex?; Bolivia; USNM, Washington.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947: 787. (**tx**) Anderson, W. H. & Anderson 1971: 19; Eggers 1928c: 86–87.

***majus* Wood** 1988a: 33. Holotype, sex?; Bolivia (Cochabamba); USNM, Washington, automatic.
Distribution: South America (Bolivia).
References: (**tx**) Wood, S. L. 1988a: 33.
major Eggers 1943a: 361. Holotype, sex?; Bolivia (Cochabamba); USNM, Washington, preoccupied by Eggers 1928.
References: (**tx**) Anderson, W. H. & Anderson 1971: 19; Eggers 1943a: 361; Wood, S. L. 1988a: 33.

***marginatus* Wood** 1969b: 21. Holotype ♀; Dominical Puntarenas, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica/ Chiapas in Mexico).
References: (**hb**) Wood, S. L. 1982b: 501. (**ds**) Wood, S. L. 1982b: 501. (**tx**) Wood, S. L. 1969b: 21, 1982b: 501.

***maurus* (Blandford)** 1897a: 178 (*Prionosceles*). Lectotype ♂; Pantaleon, Guatemala; BMNH, London, designated by Wood 1982b: 474.
Distribution: Antilles Islands (Dominica), North America (Costa Rica/ Guatemala/ Honduras/ Chiapas, Oaxaca, Veracruz in Mexico/ Panama), South America (Venezuela).
Hosts: *Cecropia* spp. leaf petioles.
References: (**hb**) Atkinson & Equihua 1985b: 232; Wood, S. L. 1982b: 474. (**ds**) Atkinson & Equihua 1985b: 232, 1986a: 420; Blackwelder 1947: 787; Bright 1972b: 1497, 1985c: 172; Estrada & Atkinson 1988: 205; Hagedorn 1910d: 76; Kleine 1914b: 370; Wood, S. L. 1982b: 474. 1910a: 117; Muskus 1984: 73; Wood, S. L. 1975a: 22; 1982b: 474.

ellipticus Eggers 1934a: 80 (*Hexacolus*). Holotype ♂; Turrialba, Costa Rica; Strohmeyer Collection. Synonymy: Wood 1975a: 22.
References: (**ds**) Blackwelder 1947: 786. (**tx**) Eggers 1934a: 80; Wood, S. L. 1975a: 22.

***medialis* Wood** 1988a: 33. Holotype ♂; Bolivia (Cochabamba); MNHN, Paris, automatic.
Distribution: South America (Bolivia).
References: (**tx**) Wood, S. L. 1988a: 33.

medius Eggers 1943a: 359. Holotype ♂; Bolivia (Cochabamba); MNHN, Paris, preoccupied by Eggers 1928.
References: (**tx**) Anderson, W. H. & Anderson 1971: 19; Eggers 1943a: 359–360; Wood, S. L. 1988a: 33.

***medius* (Eggers)** 1928c: 89 (*Prionosceles*). Lectotype, sex?; Ostbolivien; USNM, Washington, designated by Anderson & Anderson 1971: 19.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947: 787; Schedl 1970f: 581. (**tx**) Anderson, W. H. & Anderson 1971: 19; Eggers 1928c: 89; Schedl 1979c: 150–151.

***melanocephalus* (Blandford)** 1897a: 181 (*Hexacolus*). Lectotype ♀; Cerro Zunil, Guatemala; BMNH, London, designated by Wood 1982b: 482.
Distribution: North America (Guatemala).
References: (**ec**) Wichmann 1955a: 107. (**ds**) Blackwelder 1947: 786; Hagedorn 1910d: 77; Kleine 1914b: 370; Wichmann 1955a: 107. (**tx**) Blandford 1897a: 181; Eggers 1931b: 33, 1940a: 132; Hagedorn 1910a: 114; Schedl 1952d: 359, 1979c: 15; Wood, S. L. 1982b: 482.

***micidus* Wood** 1971: 17. Holotype ♀; 7 km N Totolapan, Oaxaca, Mexico; Wood Collection.
Distribution: North America (Guatemala/ Oaxaca in Mexico).
Hosts: *Ficus* sp.
References: (**hb**) Atkinson et al. 1986: 56; Burgos & Saucedo 1983: 81; Wood, S. L. 1982b: 506. (**ds**) Atkinson et al. 1986: 56; Burgos & Saucedo 1983: 81; Wood, S. L. 1982b: 506. (**tx**) Wood, S. L. 1971: 17, 1982b: 506.

***minor* (Eggers)** 1928c: 89 (*Prionosceles*). Lectotype, sex?; Ostbolivien; USNM, Washington, designated by Anderson & Anderson 1971: 20.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947: 787. (**tx**) Anderson, W. H. & Anderson 1971: 20; Eggers 1928c: 89; Schedl 1979c: 155.

***minutissimus* Schedl** 1952d: 355. Holotype ♀; Hamburgfarm on Rio Reventazon, Limon, Costa Rica; Schedl Collection in NHMW, Wien.
Distribution: North America (Costa Rica), South America (Brazil).
References: (**ds**) Schedl 1967d: 2; Wood, S. L. 1982b: 478. (**tx**) Schedl 1952d: 355, 1979c: 156–157; Wood, S. L. 1982b: 478.

minutissimus Schedl 1963d: 217 (*Hexacolinus*). Holotype ♂?; Brasilien: Santa Catarina, Nova Teutonia; Schedl Collection in NHMW, Wien, preoccupied by Schedl 1952. Synonymy: Wood 1984b: 228.
References: (**tx**) Schedl 1963d: 217, 1979c: 156; Wood, S. L. 1984b: 228.

***minutus* Wood** 1981: 122. Holotype ♂?; Brasilien, Nova Teutonia, 300–500 m, 27 degrees 11′ Br., 52 degrees 23′ L.; Schedl Collection in NHMW, Wien, automatic.
Distribution: South America (Brazil).
References: (**tx**) Wood, S. L. 1981: 122.

minutissimus Schedl 1978c: 297 (*Hexacolus*). Holotype ♂?; Brasilien, Nova Teutonia, 300–500 m, 27 degrees 11′ Br., 52 degrees 23′ L.; Schedl Collection in NHMW, Wien, preoccupied by Schedl 1952.
References: (**tx**) Schedl 1978c: 297.

***morulus* (Schedl)** 1952d: 356 (*Hexacolus*). Holotype ♂; Brasilien, Santa Catarina; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1952d: 356, 1979c: 160.

***multistriatus* (Wood)** 1961d: 97 (*Hexacolus*). Holotype ♀; 8 km W Villa Juarez, Puebla, Mexico; Wood Collection.
Distribution: North America (Puebla in Mexico).
References: (**hb**) Wood, S. L. 1982b: 503. (**ds**) Atkinson & Equihua 1986a: 420; Wood, S. L. 1982b: 503. (**tx**) Wood, S. L. 1961d: 97, 1967c: 128, 1982b: 503.

***naevius* Wood** 1981: 127. Holotype ♀; 40 km SE Socopo, Barinas, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: *Clusia* sp.
References: (**tx**) Wood, S. L. 1981: 127.

***nanellus* Wood** 1967c: 124. Holotype ♀; Barro Colorado Island, Canal Zone, Panama; Wood Collection.
Distribution: North America (Panama).
References: (**hb**) Wood, S. L. 1982b: 508. (**ds**) Wood, S. L. 1982b: 508. (**tx**) Wood, S. L. 1967c: 124, 1982b: 508.

***nardus* (Schedl)** 1976a: 62 (*Hexacolus*). Holotype ♂?; Brazil [probably Cayenne]; Schedl Collection in NHMW, Wien.
Distribution: South America (Cayenne?).
References: (**tx**) Schedl 1976a: 62.

***nitellus* (Schedl)** 1954b: 22 (*Hexacolus*). Syntypes ♀; Brasilien: Parana, Rondon, 500 m; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Distribution: South America (Brazil).
Notes: (1) Schedl 1979c: 168 (citation of holotype invalid).

References: (**tx**) Schedl 1954b: 22, 1979c: 168.

***nitens* (Schedl)** 1954b: 23 (*Hexacolus*). Syntypes ♀; Brasilien: Parana, Rondon, 500 m; Schedl Collection in NHMW, Wien, and Plaumann Collection.
Distribution: South America (Brazil).
Notes: (1) Schedl 1979c: 168 (citation of holotype invalid).
References: (**tx**) Schedl 1954b: 23, 1979c: 162.

***nitidissimus* (Eggers)** 1940a: 135 (*Hexacolus*). Holotype ♀; Guadeloupe (Trois Rivieres); Eggers Collection, in NHMW, Wien.
Distribution: Antilles Islands (Guadeloupe).
References: (**ds**) Bright 1985c: 172. (**tx**) Bright 1985c: 172; Eggers 1940a: 135; Schedl 1979c: 169.

***nitidus* (Eggers)** 1928c: 88 (*Prionosceles*). Holotype sex?; Ostbolivien; Eggers Collection, in NHMW, Wien.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947: 787; Schedl 1973d: 154. (**tx**) Eggers 1928c: 88; Schedl 1979c: 170.

***notatus* (Eggers)** 1940a: 133 (*Hexacolus*). Holotype, sex?; Guadeloupe (Trois Rivieres); Eggers Collection, not mentioned by Anderson & Anderson 1971 or Schedl 1979c, a female Eggers cotype in NHMW, Wien.
Distribution: Antilles Islands (Cuba/ Dominica/ Guadeloupe/ Puerto Rico), North America (Mexico?).
References: (**ds**) Bright 1981c: 156, 1985c: 172; Schedl 1976a: 50. (**tx**) Bright 1985c: 172; Eggers 1940a: 133; Schedl 1951m: 80, 1954b: 23, 1979c: 171.

pseudobicolor Eggers 1940a: 132 (*Hexacolus*). Holotype ♂; Guadeloupe (Trois Rivieres); USNM, Washington. Synonymy: Wood 1985: 269.
References: (**ds**) Bright 1981c: 156, 1985c: 172; Schedl 1972g: 39, 1976a: 50. (**tx**) Anderson, W. H. & Anderson 1971: 26; Bright 1985c: 172; Eggers 1940a: 132–133; Schedl 1952d: 357, 1954b: 23, 1979c: 200; Wood, S. L. 1985: 269.

subparallelus Eggers 1940a: 134 (*Hexacolus*). Holotype ♂; Guadeloupe (Trois Rivieres); Fleutiaux Collection. Synonymy: Wood 1985: 269.
References: (**ds**) Bright 1985c: 172; Schedl 1976a: 50. (**tx**) Bright 1985c: 172; Eggers 1940a: 134; Schedl 1979c: 243; Wood, S. L. 1985: 269.

pelicerinus Schedl 1952d: 358 (*Hexacolus*). Holotype, sex?; vermutlich Mexico; Schedl Collection in NHMW, Wien. Synonymy: Wood 1985: 269.
Notes: (3) It is doubtful that the holotype came from Mexico; a Caribbean island is a more likely site.
References: (**ds**) Wood, S. L. 1982b: 503. (**tx**) Schedl 1952d: 357–358, 1979c: 187; Wood, S. L. 1982b: 503, 1985: 269.

***obesus* Wood** 1975a: 26. Holotype ♀; Barro Colorado Island, Canal Zone, Panama; Wood Collection.
Distribution: North America (Panama).
References: (**ds**) Wood, S. L. 1982b: 498. (**tx**) Wood, S. L. 1975a: 26, 1982b: 498.

***oblongus* (Eggers)** 1940a: 134 (*Hexacolus*). Holotype ♂; Guadeloupe (Env. de Trois Rivieres); MNHN, Paris.
Distribution: Antilles Islands (Guadeloupe).
References: (**ds**) Bright 1985c: 172. (**tx**) Bright 1985c: 172; Eggers 1940a: 134; Schedl 1979c: 174.

***obscurus* (Wood)** 1961d: 100 (*Hexacolus*). Holotype ♀; 5 km SW Martinez de la Torre, Veracruz, Mexico; Wood Collection.
Distribution: North America (Veracruz in Mexico).
References: (**hb**) Wood, S. L. 1982b: 508. (**ds**) Wood, S. L. 1982b: 508. (**tx**) Wood, S. L. 1961d: 100, 1982b: 508.

***ochromae* Wood** 1969b: 19. Holotype ♀; Playon, San Jose, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Ochroma velutina*.
References: (**hb**) Wood, S. L. 1982b: 493. (**ds**) Wood, S. L. 1982b: 493. (**tx**) Wood, S. L. 1969b: 19, 1982b: 493.

***ommateus* Wood** 1971: 15. Holotype ♀; 8 km S Colonia (near Buenaventura), Valle de Cauca, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Clusia* sp.
References: (**tx**) McNamara 1977: 199; Wood, S. L. 1971: 15.

***opacicollis* (Eggers)** 1928c: 90 (*Prionosceles*). Holotype, sex?; Ostbolivien; Eggers Collection, in NHMW, Wien.
Distribution: South America (Bolivia).
References: (**ds**) Blackwelder 1947: 787. (**tx**) Eggers 1928c: 90; Schedl 1979c: 179.

***opacus* Wood** 1977d: 520. Holotype ♀; Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
References: (**tx**) Wood, S. L. 1977d: 520.

***opimus* Wood** 1977d: 520. Holotype ♀; La Carbonera Experimental Forest, 50 km NW Merida, Merida, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
Hosts: Liana.
References: (**tx**) Wood, S. L. 1977d: 520.

***ovalis* (Eggers)** 1940a: 132 (*Hexacolus*). Holotype, sex?; Guadeloupe; Fleutiaux Collection.
Distribution: Antilles Islands (Guadeloupe).
References: (**ds**) Bright 1985c: 172. (**tx**) Bright 1985c: 172; Eggers 1940a: 132.

***pannuceus* Wood** 1971: 16. Holotype ♀; La Ceiba, Atlantida, Honduras; Wood Collection.
Distribution: North America (Honduras).

References: (**ds**) Wood, S. L. 1982b: 503. (**tx**) Wood, S. L. 1971: 16–17, 1982b: 503.

***parallelus* (Schedl)** 1962r: 99 (*Hexacolus*). Holotype ♂?; Venezuela; Schedl Collection in NHMW, Wien.
Distribution: South America (Venezuela).
Notes: (3) Schedl labeled the holotype as a female; it appears to be a male.
References: (**tx**) Schedl 1962r: 99, 1979c: 185.

***parvulus* Wood** 1969b: 14. Holotype ♀; Pandora, Limon, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica/ Chiapas, Veracruz in Mexico).
Hosts: *Cecropia* sp. leaf petiole.
References: (**hb**) Atkinson & Equihua 1985b: 233; Wood, S. L. 1982b: 492. (**ds**) Atkinson & Equihua 1985b: 233, 1986a: 420; Wood, S. L. 1982b: 492. (**tx**) Wood, S. L. 1969b: 14–15; 1982b: 492

***parvus* (Eggers)** 1943a: 371 (*Hylocurosoma*). Holotype, sex?; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
References: (**ds**) Schedl 1979c: 186. (**tx**) Anderson, W. H. & Anderson 1971: 24; Eggers 1943a: 371; Schedl 1952d: 346, 1979c: 186.

***pelicipennis* (Schedl)** 1952d: 356 (*Hexacolus*). Holotype ♂; Costa Rica, Jimenez, Halbinsel Osa; Schedl Collection in NHMW, Wien.
Distribution: North America (Costa Rica).
References: (**ds**) Wood, S. L. 1982b: 502. (**tx**) Schedl 1952d: 356, 1979c: 187; Wood, S. L. 1982b: 502.

***perditus* Wood** 1967c: 123. Holotype ♀; Fort Clayton, Canal Zone, Panama; Wood Collection.
Distribution: North America (Panama).
Hosts: *Cecropia* sp. branch terminal.
References: (**hb**) Wood, S. L. 1982b: 480. (**ds**) Wood, S. L. 1982b: 480. (**tx**) Wood, S. L. 1967c: 123, 1982b: 480.

***permagnus* (Eggers)** 1943c: 364 (*Prionosceles*). Holotype, sex?; Bolivia (Cochabamba); Eggers Collection, in NHMW, Wien.
Distribution: South America (Bolivia).
References: (**tx**) Eggers 1943c: 364; Schedl 1979c: 189.

***perplexus* Schedl** 1972g: 56. Holotype ♀; Brasilien, Corcovado, Guanabara; Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**tx**) Schedl 1972g: 56, 1979c: 190.

***perpusillus* Wood** 1978b: 404. Holotype ♀; Rancho Grande, Pittier National Park, Aragua, Venezuela; Wood Collection.
Distribution: South America (Venezuela).
References: (**tx**) Wood, S. L. 1978b: 404.

***phoebeae* Wood** 1969b: 16. Holotype ♀; Tapanti, Cartago, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Phoebea mexicana*.
References: (**hb**) Bright 1964b: 16; Wood, S. L. 1982b: 477. (**ds**) Wood, S. L. 1982b: 477. (**tx**) Wood, S. L. 1969b: 16, 1982b: 477.

***piceus* (Blandford)** 1897a: 183 (*Hexacolus*). Lectotype ♂; Volcan de Chiriqui, Chiriqui, Panama; BMNH, London, designated by Wood 1982b: 497.
Distribution: North America (Costa Rica/ Panama).
Hosts: *Cecropia peltata, Phoebea mexicana*.
References: (**hb**) Wood, S. L. 1982b: 497. (**ds**) Blackwelder 1947: 786; Hagedorn 1910d: 77; Kleine 1914b: 370; Wood, S. L. 1982b: 497. (**tx**) Blandford 1897a: 183; Hagedorn 1910a: 114; Schedl 1936i: 104, 1937g: 66, 1954b: 21; Wood, S. L. 1982b: 497.

***pilifer* Wood** 1982a: 230. Holotype ♀; Uxpanapa, Veracruz, Mexico; Wood Collection.
Distribution: North America (Veracruz in Mexico).
References: (**ds**) Atkinson & Equihua 1986a: 420. (**tx**) Wood, S. L. 1982a: 230.

***pilifrons* (Schedl)** 1962r: 100 (*Hexacolus*). Holotype ♂; Venezuela, Maracay, Rancho Grande; Frey Museum, Tutzing (now in NHMBS, Basel).
Distribution: South America (Venezuela).
References: (**tx**) Schedl 1962r: 100, 1979c: 194.

***plumeriae* Wood** 1969b: 17. Holotype ♀; Playa del Coco, Guanacaste, Costa Rica; Wood Collection.
Figures: Atkinson et al. 1986: 63.
Distribution: North America (Costa Rica/ Guatemala).
Hosts: *Plumeria rubra*.
References: (**ec**) Equihua & Atkinson 1986: 627. (**hb**) Atkinson & Equihua 1985b: 232; Atkinson et al. 1986: 56; Equihua & Atkinson 1986: 627; Wood, S. L. 1982b: 476. (**ds**) Atkinson & Equihua 1985b: 232; Atkinson et al. 1986: 56; Equihua & Atkinson 1986: 627; Wood, S. L. 1982b: 476. (**tx**) Atkinson et al. 1986: 63; Wood, S. L. 1969b: 17, 1982b: 476.

***plumericolens* Wood** 1983a: 658. Holotype ♀; Estacion de Biologia, Chamela, Jalisco, Mexico; Wood Collection.
Distribution: North America (Jalisco in Mexico).
Hosts: *Plumeria rubra*.
References: (**ec**) Equihua & Atkinson 1986: 627. (**hb**) Equihua & Atkinson 1986: 627. (**ds**) Equihua & Atkinson 1986: 627. (**tx**) Wood, S. L. 1983a: 658.

***praeceps* Wood** 1977d: 521. Holotype ♀; Piedras Blancas, 10 km E Medellin, Antioquia, Colombia; Wood Collection.
Distribution: South America (Colombia).
Hosts: *Clusia* sp.
References: (**tx**) Wood, S. L. 1977d: 521.

***proximus* Wood** 1967c: 127. Holotype ♀; El Hato del Volcan, Chiriqui, Panama; Wood Collection.
Distribution: North America (Panama).
Hosts: *Clusia* sp.
References: (**hb**) Wood, S. L. 1982b: 505. (**ds**) Wood, S. L. 1982b: 505. (**tx**) Wood, S. L. 1967c: 127, 1982b: 505.

***pseudoacuminatus* (Schedl)** 1935m: 51 (*Hexacolus*). Syntypes, sex?; Saude bei Sao Paulo, Brasilien; Strohmeyer Collection, Eberswald, and Schedl Collection in NHMW, Wien.
Distribution: South America (Brazil).
References: (**ds**) Blackwelder 1947: 784. (**tx**) Schedl 1935f: 274, 1935m: 51, 1952d: 346, 1962r: 100, 1979c: 200.

***pseudopiceus* Wood** 1969b: 18. Holotype ♀; San Isidro del General, San Jose, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Ficus* sp.
References: (**hb**) Wood, S. L. 1982b: 485. (**ds**) Wood, S. L. 1982b: 485. (**tx**) Wood, S. L. 1969b: 18–19, 1982b: 485.

***pubescens* Wood** 1969b: 21. Holotype ♀; San Ignacio de Acosta, San Jose, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
References: (**hb**) Wood, S. L. 1982b: 504. (**ds**) Wood, S. L. 1982b: 504. (**tx**) Wood, S. L. 1967b: 21, 1969b: 21–22, 1982b: 504.

***puer* (Schedl)** 1952d: 359 (*Hexacolus*). Holotype ♂?; Paraguay; Schedl Collection in NHMW, Wien.
Distribution: South America (Paraguay).
References: (**tx**) Schedl 1952d: 359, 1979c: 203.

***pumilus* Wood** 1969b: 23. Holotype ♀; Volcan Poas, Heredia, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Drimys granadensis, Miconia globuliflora, Sapium thelocarpum.*
References: (**hb**) Wood, S. L. 1982b: 507. (**ds**) Wood, S. L. 1982b: 507. (**tx**) Wood, S. L. 1967c: 124, 1969b: 23, 1982b: 507.

***punctatus* (Eggers)** 1943a: 368 (*Hylocurosoma*). Holotype, sex?; Bolivia (Cochabamba); MNHN, Paris.
Distribution: South America (Bolivia).
References: (**tx**) Eggers 1934a: 79, 1943a: 368; Schedl 1952d: 346, 1979c: 204.

***punctiferus* Wood** 1976a: 348. Holotype ♂; Volcan Irazu, Cartago, Costa Rica; Wood Collection, automatic.
Distribution: North America (Costa Rica).
Hosts: *Oreopanax nubigenus.*
References: (**hb**) Wood, S. L. 1982b: 486. (**ds**) Wood, S. L. 1982b: 486. (**tx**) Wood, S. L. 1976a: 348, 1982b: 486.
punctifer Wood 1971: 15. Holotype ♂; Volcan Irazu, Cartago, Costa Rica; Wood Collection, preoccupied by Wood 1969.
References: (**tx**) Wood, S. L. 1971: 15–16, 1976a: 348.

***pusillimus* Wood** 1981: 127. Holotype ♀; 27 km NE Montoya, Santander, Colombia; Wood Collection.
Distribution: South America (Colombia).
References: (**tx**) Wood, S. L. 1981: 127.

***pusillus* (Eggers)** 1943a: 367 (*Hylocurosoma*). Holotype ♂?; Bolivia (Cochabamba); USNM, Washington.
Distribution: South America (Bolivia).
References: (**tx**) Anderson, W. H. & Anderson 1971: 27; Eggers 1943a: 367; Schedl 1952d: 346.

***radiatus* Wood** 1977b: 218. Holotype ♀; La Georgiana, 79 km SE San Jose, Costa Rica; Wood Collection.
Distribution: North America (Costa Rica).
Hosts: *Quercus* sp.
References: (**ds**) Wood, S. L. 1982b: 489. (**tx**) Wood, S. L. 1977b: 218, 1982b: 489.
